PLAN
SCALE: 1" = 100'

GENERAL NOTES:

1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW) 1983-2001 Tidal Epoch.
2. Topography shown is from previous surveys and/or NOAA Chart No. 13326. All topography, including shoreline, bridges, piers, etc., is located approximate unless otherwise noted and should be used as a general reference only.
3. Bench Mark Data: BM No. 1 (1948) is a standard NOS disk stamped "No. 1 1948", set near center on top of an 8 foot by 5 foot section of bedrock at the edge of a rocky bank 2 feet above ground level. It is 99 feet (30 m) south of centerline of blacktop street, across the street and southeast of Sawyer Memorial Congregational Church and 42 feet (13 m) south of Bench Mark J 149. Elevation is 19.61 feet above MLLW.
4. Coordinates shown are based on the Transverse Mercator Grid System for the State of Maine (1801 East Zone) & NAD 1983.
5. Survey was conducted using an Odom MK2 echotrac echosounder. Horizontal positioning was obtained utilizing a Leica 1200 GPS System.
An RTK Base Station was set on BM No. 1 (1948).
6. The sounding information shown on this map represents the SHOALEST soundings of those obtained from hydrographic surveys conducted during January 2012.
7. The sounding information depicted on this map should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
8. The information depicted on this map represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
9. Field Book: R&H 4126
