Recreation season opens at Union Village Dam, construction on Buzzel Bridge Road begins

Thetford, Vermont – Union Village Dam will open for the recreation season on May 23. Buzzell Bridge Road (East Access Road) will be closed to vehicle traffic due to construction to repair road erosion. The work will begin in June and should be completed in July. After the work is completed, the road will reopen to vehicle traffic.

Foot or bicycle traffic will **not** be permitted to pass through the active construction area. You will be allowed to walk/bike to the “chutes” parking area from Rt. 113 and then will have to turn around. If you want to access area 1 or area 2 you will be allowed to walk/bike from the main park entrance and then will have to turn around at area 2.

Reminder – please keep all pets on a leash. Numerous construction vehicles will be using the road, so please use caution if riding or biking.
