## Gulf Street Shore and Bank Protection Project

Gulf Street in Milford extends northward from Welches Point Road, immediately inshore of Gulf Beach, and crosses the lower end of Gulf Pond before terminating at U.S. Route 1.

The project provides for 140 feet of stone slope protection that stabilizes the road embankment behind the southern end of Gulf Beach. Gulf Street is a small project designed to prevent shoreline erosion, and was built under Section 14 of the Corps' Continuing Authorities Program.

The project was initiated and completed in the summer of 1987 at a cost of \$200,000.
