The District Engineer has received a permit application from the applicant below to conduct work in waters of the United States as described below.

APPLICANT: Massachusetts Department of Transportation – Highway Division (“MassDOT”)

ACTIVITY: MassDOT has submitted a Section 404 subject application to discharge dredged and/or fill material into approximately **70,644** square feet of waters of the United States, including jurisdictional wetlands associated with tributaries of Mill Brook, in order to construct safety improvement for a 1.8 mile section of Route 2 from the Route 126 intersection in Concord to the Bedford Road intersection in Lincoln, Massachusetts. The purpose for this project is to provide safe and efficient traffic operations at the Crosby’s Corner intersection and to remove direct driveway and local road access off of the Route 2 mainline. As part of this project MassDOT proposes to construct a new grade separated interchange at Crosby’s Corner and to install a series of service roads to provide alternative local road access to abutting properties. Section 404 discharges for this project include roadway and ramp embankment fills, drainage systems, and temporary construction access areas. As part of their subject application for the Route 2 Crosby’s Corner Interchange Safety Improvement Project, MassDOT has detailed ways that they have designed this project to minimize impacts to waters of the United States. MassDOT is currently proposing a mixture of wetland restoration, wetland creation, and preservation strategies in order to mitigate for unavoidable impacts to waters of the United States, associated with this project.

A project overview map for the Route 2 Crosby’s Corner Interchange is included with this public notice to assist your review of this project. Copies of the detailed plan drawings for this project, entitled “ROUTE 2 – CROSBY’S CORNER INTERCHANGE SAFETY IMPROVEMENT PROJECT,” on a total of 37 sheets, and dated “11/17/10” and revised “02/08/2011”, can be downloaded from the New England District’s web-page at <http://www.nae.usace.army.mil/reg/pubnot2.asp> or requested from Paul Sneeringer at (978) 318-8491.

WATERWAY AND LOCATION OF THE PROPOSED WORK

This work is proposed in unnamed tributaries of Mill Brook within Concord and Lincoln, Massachusetts. The proposed location for the Route 2 Crosby’s Corner Interchange Safety Improvement Project can be found on the USGS Concord quadrangle sheet near 42° 27' N, 71° 19' W.

AUTHORITY

Permits are required pursuant to:

- Section 10 of the Rivers and Harbors Act of 1899
 Section 404 of the Clean Water Act
 Section 103 of the Marine Protection, Research and Sanctuaries Act).

The decision whether to issue a permit will be based on an evaluation of the probable impact of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which may reasonably accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered, including the cumulative effects thereof; among those are: conservation, economics, aesthetics, general environmental concerns, wetlands, cultural value, fish and wildlife values, flood hazards, flood plain value, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food production and, in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Where the activity involves the discharge of dredged or fill material into waters of the United States or the transportation of dredged material for the purpose of disposing it in ocean waters, the evaluation of the impact of the activity in the public interest will also include application of the guidelines promulgated by the Administrator, U.S Environmental Protection Agency, under authority of Section 404(b) of the Clean Water Act, and/or Section 103 of the Marine Protection Research and Sanctuaries Act of 1972 as amended.

SECTION 106 COORDINATION

Based on his initial review, the District Engineer has determined that the proposed work may impact properties listed in, or eligible for listing in, the National Register of Historic Places. Additional review and consultation to fulfil requirements under Section 106 of the National Historic Preservation Act of 1966, as amended, will be ongoing as part of the permit review process.

ENDANGERED SPECIES CONSULTATION

The New England District, Army Corps of Engineers has reviewed the list of species protected under the Endangered Species Act of 1973, as amended, which might occur at the project site. It is our preliminary determination that the proposed activity for which authorization is being sought is designed, situated or will be operated/used in such a manner that it is not likely to adversely affect any Federally listed endangered or threatened species or their designated critical habitat. By this Public Notice, we are requesting that the appropriate Federal Agency concur with our determination.

WETLAND REPLICATION PLAN SHEET 2 OF 5	HORIZONTAL SCALE IN METERS AS NOTED

NOTES

- EARTHWORK ASSOCIATED WITH REPPLICATION AREA = 8,282 SQ M (89,147 SQ. FT.).
- PROPOSED CONTOURS REFLECT FINISHED GRADES AFTER SETTLEMENT OF TOPSOIL.
- TOPSOIL PLACEMENT IS TO BE A 0.3M (12 INCH) DEPTH AFTER SETTLING.
- SOURCES OF ANY SALVAGED TOPSOIL FROM USED WITHIN THE REPPLICATION AREA SHALL BE INSPECTED BY A WETLAND SCIENTIST FOR THE PRESENCE OF INVASIVE SPECIES.
- TOPSOIL SHALL CONSIST OF AT LEAST 8 % ORGANIC CARBON CONTENT (BY WEIGHT) OR 15% ORGANIC MATTER CONTENT.
- SURFACE OF REPPLICATION AREA SHALL BE GRADED TO INCLUDE MOUND-AND-POOL MICROTOPOGRAPHY AS SHOWN ON DETAILS. IN GENERAL, FINISH GRADES OF THE MOUNDS SHALL BE APPROXIMATELY ONE FT ABOVE THE DESIGN GRADE SHOWN ON THE PLANS AND POOLS SHALL BE APPROXIMATELY ONE FT BELOW THE DESIGN GRADE SHOWN ON THE PLANS.
- COARSE WOODY DEBRIS CONSISTING OF LOGS AND STUMPS SHALL BE PLACED OVER A MINIMUM OF 4 % OF THE REPPLICATION AREA PER DIRECTION OF THE WETLAND SCIENTIST.
- NET PLANTING DENSITY HAS BEEN DESIGNED TO EQUAL OR EXCEED A SPACING OF 10 FT O.C. FOR SHRUBS AND 10 FT O.C. FOR SAPLINGS.
- THE EXACT LOCATIONS FOR PLANTINGS WILL BE DESIGNATED ON THE GROUND BY THE WETLAND SCIENTIST, MAKING SUCH CHANGES AS MAY BE REQUIRED TO ADJUST THE PLANTING TO LOCAL CONDITIONS.
- PLANT AND SEED SURVIVAL IS GENERALLY OPTIMIZED BY SPRING PLANTING. EARLY FALL PLANTING IS ALSO ACCEPTABLE. CONTAINER GROWN OR BALLED AND BURLAPPED PLANTS SHALL BE PLANTED ONLY BETWEEN APRIL 1ST TO JUNE 15TH OR AUG. 15TH TO NOV. 1ST. BARE ROOT SHRUBS SHALL BE PLANTED FROM APRIL 1ST TO MAY 31ST.
- WOODY PLANTS SHALL BE KEPT MOIST AND COOL WHILE ON SITE.
- WETLAND SEED MIX SHALL BE HYDROSEEDED AT 20 KG/HECTARE OR 18 LBS./ACRE (PURE LIVE SEED) THROUGHOUT THE WETLAND REPPLICATION AREA. ALL SEEDED AREAS WILL BE MULCHED WITH BLOWN STRAW.
- UPLAND SEED MIX SHALL BE HYDROSEEDED AT 40 KG/HECTARE OR 35 LBS./ACRE THROUGHOUT THE UPLAND REPPLICATION AREA. ALL SEEDED AREAS WILL BE MULCHED WITH BLOWN STRAW.
- ALL CONTAINERIZED AND BALLED AND BURLAPPED PLANTING SHALL BE MULCHED WITH 5 CM (2") LAYER OF BARK MULCH.
