

GENERAL NOTES:

1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW).
2. Topography shown is from previous surveys. All topography, including shoreline, bridges, piers, etc., is located approximately unless otherwise noted and should be used as a general reference only.
3. Bench Mark Data: BM No. 7 (1947) is a US&GS disk set on the third noticeable rock ledge about 0.5 mile (0.8 km) southeast of the first bridge in Belfast, 385 feet (117 m) southeast of a partially burned remains of Wyman Lumber Company at the foot of Commercial Street, 49 feet (15 m) southeast of Bench Mark No. 2 (1911). This Bench Mark was used for the 13-foot anchorage. Elevation is 18.16 feet above Mean Lower Low Water (MLLW).
4. Bench Mark Data: TBM Park (02) is a 1/2" drilled hole in a chiseled square on a concrete walkway adjacent to the Town Landing. It is 0.5 feet to the east edge, 45.2 feet to the south edge and 11.6 feet to the west edge of the concrete walkway. This Temporary Bench Mark was used for the 8-foot anchorage and 15-foot Channel. Elevation is 15.15 feet above Mean Lower Low Water (MLLW).
5. Coordinates shown are based on the Transverse Mercator Grid System for the State of Maine (East Zone) & NAD 1983.
6. The sounding information shown on this map represents the SHALLOWEST soundings of those obtained from hydrographic surveys conducted during March 2002 & April 2003.
7. The sounding information depicted on this map should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
8. The information depicted on this map represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
9. Field Book: R&H 4278.
 Depthsounder Rolls: 02-584/01-02 & 03-651/01-03.
 See NOAA Chart No. 13309

Soundings in the 13-Foot Anchorage are from Condition Survey of March 2002
