INUNDATION MATRIX

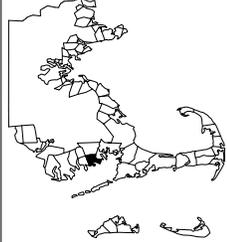

HURRICANE FORWARD SPEED (MPH)			
	0-20	21-40	41+
HURRICANE CATEGORY	3	[Dark Blue]	[Light Blue]
	4	[Dark Blue]	[Cyan]

HURRICANE INUNDATION AREAS	
[Dark Blue]	Inundation Area A
[Light Blue]	Inundation Area B
[Cyan]	Inundation Area C

- NOTES:
- Inundation areas were derived from the National Hurricane Center's application of the SLOSH (Sea, Lake and Overland Surges from Hurricanes) model. Inundation areas reflect "WORST CASE" combination of hurricane direction, forward speed, landfall point, and high astronomical tide.
 - Hurricane categories 1 through 4 refer to the Saffir-Simpson scale of hurricane intensity.
 - Shaded land areas represent areas with coastal flooding potential from hurricanes of the category and forward speed referenced by the inundation matrix shown above. Inland areas that may only be subjected to freshwater flooding are not identified.
 - "WORST CASE" hurricane surge elevations identified for each inundation area are given in the surge tide profiles provided on this map.
