

LEGEND

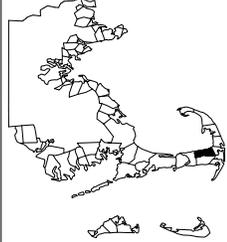

INUNDATION MATRIX

HURRICANE FORWARD SPEED (MPH)		
0-20	21-40	41+
182	Blue	Blue
HURRICANE CATEGORY		
3	Light Blue	Light Blue
4	Cyan	Cyan
HURRICANE INUNDATION AREAS		
Blue	Inundation Area A	
Light Blue	Inundation Area B	
Cyan	Inundation Area C	

- NOTES:
- Inundation areas were derived from the National Hurricane Center's application of the SLOSH (Sea, Lake, and Overland Surges from Hurricanes) model. Inundation areas reflect "WORST CASE" combination of hurricane direction, forward speed, landfall point, and high astronomical tide.
 - Hurricane categories 1 through 4 refer to the Saffir-Simpson scale of hurricane intensity.
 - Shaded land areas represent areas with coastal flooding potential from hurricanes of the category and forward speed referenced by the inundation matrix above. Inland areas that may only be subjected to freshwater flooding are not identified.
 - "WORST CASE" hurricane surge elevations identified for each inundation area are given in the surge tide profiles provided on this map.
