

ANNOUNCING...THE PREMIER OF THE

Regulatory VIDEO LIBRARY

The Regulatory Video Library is now available for your viewing pleasure and for your use as an educational and outreach tool, a dialogue opener and a training instrument. Topics were selected by regulators Corps-wide and are explained in non-technical, understandable language, including:

- Regulatory Process 101
- Cumulative Impacts
- Wetland Delineation
- Endangered Species
- Clean Water Act Section 404(b)(1) Guidelines
- Cultural Resources
- Alternatives Analysis
- Mitigation
- Public Interest Review

And as an added bonus, a children's video, Regulatory 101 with Jessie, has also been developed for use in environmental education and outreach to students.

To view the videos in the Regulatory Video Library, visit www.saj.usace.army.mil or www.youtube.com/JaxStrong. Downloads and complete instructions are available on Jacksonville District's FTP site at: ftp://ftp83.saj.usace.army.mil/pub/CEEIS_Dissemination/Regulatory_Video_Library.

And – coming soon – videos will be available as free podcasts on the BUILDING STRONG® channel on iTunes!

Many thanks to all of the Corps team members who contributed to this project, which was 100% funded by the American Recovery and Reinvestment Act of 2009. Jacksonville District's Project Delivery Team wishes to thank HQUSACE and the following districts for hosting our field work: Vicksburg, Detroit, Albuquerque, Honolulu, Seattle and Alaska, as well as subject matter experts, including Regulatory PROSPECT Instructors and Office of Counsel, who reviewed for accuracy and consistency.
