BALL MOUNTAIN LAKE

LAND CLASSIFICATIONS

1977 MASTER PLAN

This map does not attempt to depict the land classifications from the 1977 Ball Mountain Lake Master Plan. The Master Plan identified acreages for land classifications but did not map the extent or shape of those classifications. The map instead shows the rough locations of these land classifications.

"OPERATIONS: RECREATION - LOW DENSITY USE - Winhall Brook camping area has been zoned for low density recreational use... This area contains 120 acres."

"OPERATIONS: NATURAL AREA - The remaining 675 acres have been allocated for preservation of ecological and visual values."

"PROJECT OPERATIONS - The dam, spillway, maintenance buildings and surrounding land are located on land reserved for project operations. This reserved land totals approximately 170 acres."
