Notes
-- = Not Evaluated
C = Combined Primary/Field Duplicate Sample
CASRN = Chemical Abstracts Service Registry Number
LOD = Limit of Detection
mEQ/100g = millequivalents per 100 grams of soil
mg/kg = millgram per kilogram
N/A = Not Applicable
N = Primary Sample
ND = Non-Detect or Not Detected
SL = Screening Level
% = Percent

Legend

| | |
|---|---|
| ND | ND at the LOD |
| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions
J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

Notes

-- = Not Evaluated
C = Combined Primary/Field Duplicate Sample
CASRN = Chemical Abstracts Service Registry Number
LOD = Limit of Detection
mEQ/100g = millequivalents per 100 grams of soil
mg/kg = millgram per kilogram
N/A = Not Applicable
N = Primary Sample
ND = Non-Detect or Not Detected
SL = Screening Level
% = Percent

Legend

| | |
|---|---|
| ND | ND at the LOD |
| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions

J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

Notes

-- = Not Evaluated
C = Combined Primary/Field Duplicate Sample
CASRN = Chemical Abstracts Service Registry Number
LOD = Limit of Detection
mEQ/100g = millequivalents per 100 grams of soil
mg/kg = millgram per kilogram
N/A = Not Applicable
N = Primary Sample
ND = Non-Detect or Not Detected
SL = Screening Level
% = Percent

Legend

| | |
|---|---|
| ND | ND at the LOD |
| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions

J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

Notes

-- = Not Evaluated
C = Combined Primary/Field Duplicate Sample
CASRN = Chemical Abstracts Service Registry Number
LOD = Limit of Detection
mEQ/100g = millequivalents per 100 grams of soil
mg/kg = millgram per kilogram
N/A = Not Applicable
N = Primary Sample
ND = Non-Detect or Not Detected
SL = Screening Level
% = Percent

Legend

| | |
|---|---|
| ND | ND at the LOD |
| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions

J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

Notes

-- = Not Evaluated
C = Combined Primary/Field Duplicate Sample
CASRN = Chemical Abstracts Service Registry Number
LOD = Limit of Detection
mEQ/100g = millequivalents per 100 grams of soil
mg/kg = millgram per kilogram
N/A = Not Applicable
N = Primary Sample
ND = Non-Detect or Not Detected
SL = Screening Level
% = Percent

Legend

| | |
|---|---|
| ND | ND at the LOD |
| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions

J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

Notes

-- = Not Evaluated
C = Combined Primary/Field Duplicate Sample
CASRN = Chemical Abstracts Service Registry Number
LOD = Limit of Detection
mEQ/100g = millequivalents per 100 grams of soil
mg/kg = millgram per kilogram
N/A = Not Applicable
N = Primary Sample
ND = Non-Detect or Not Detected
SL = Screening Level
% = Percent

Legend

| | |
|---|---|
| ND | ND at the LOD |
| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions

J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

| Detect | Detected result |

(1) See Section 4.0 for data reduction steps.

Qualifier Definitions
J – The reported result was an estimated value (+/- indicates a positive/negative bias).
U – The analyte was not detected and was reported as less than the limit of detection (LOD).
UJ – The analyte was not detected and was reported as less than the LOD. However, the associated numerical value is approximate.
R – The presence or absence of the analyte cannot be substantiated by the data provided.

Table E.1-6
Non-detected Analyte LOQs Compared with Screening Levels - Soil - Mammals
Phase 1 Risk Screening and Data Gaps Analysis
Former New York Ordnance Works, Baldwinsville, NY

| AOC | Subarea | Sample ID | Analyte | Units | LOQ | Screening Level[1] | Ratio of LOQ to Screening Level |
|---|---|---|---|---|---|---|---|
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Carbazole | mg/kg | 0.39 | 79 | 0.004936709 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Cresols, m- & p- | mg/kg | 0.39 | 3.49 | 0.111747851 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Diethyl phthalate | mg/kg | 0.39 | 3600 | 0.000108333 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Dimethyl phthalate | mg/kg | 0.39 | 38 | 0.010263158 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | di-n-Octyl phthalate | mg/kg | 0.39 | 0.91 | 0.428571429 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Hexachlorobenzene | mg/kg | 0.39 | 0.2 | 1.95 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Hexachlorobutadiene | mg/kg | 0.39 | 0.04 | 9.75 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Hexachlorocyclopentadiene | mg/kg | 0.39 | 0.755 | 0.516556291 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Hexachloroethane | mg/kg | 0.39 | 0.6 | 0.65 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Isophorone | mg/kg | 0.39 | 139 | 0.002805755 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Nitrobenzene | mg/kg | 0.39 | 4.8 | 0.08125 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | N-Nitrosodi-n-propylamine | mg/kg | 0.39 | 0.544 | 0.716911765 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | N-Nitrosodiphenylamine | mg/kg | 0.39 | 0.545 | 0.71559633 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Pentachlorophenol | mg/kg | 2 | 2.8 | 0.714285714 |
| AOC 5 | Possible Dump | NYOW-05-SL005-A | Phenol | mg/kg | 0.39 | 37 | 0.010540541 |

Notes:
AOC = area of concern
LOQ = limit of quantitation
mg/kg = micrograms per kilogram
NA = not applicable
