B. TECHNICAL

1. BOUNDARY LINE MAINTENANCE EXECUTION

a. SUMMARY

i. The Contractor will provide all labor, equipment, materials as specified, and transportation necessary to perform USACE boundary identification and marking at Buffumville Lake and Hodges Village Dam. Boundary

lines are maintained lines of site to ensure abutters are aware of Federal boundary lines on USACE projects. Maintenance to clear these lines requires routine identification, clearing, painting, signing, reporting encroachments (documenting via photo), and reporting broken or missing monuments.

- ii. This includes 5.23 miles of boundary at Buffumville Lake (114 monuments total: 100 monuments at Buffumville Lake and 14 monuments at Pierpont Meadow Pond parcel) and 5.9 miles of boundary at Hodges Village Dam (79 monuments total). See Figures 1 & 2 for location details.
- iii. Provide a written report at the conclusion of the boundary maintenance noting missing monuments, monuments not located, damaged monuments, encroachments, trespasses, and any other noteworthy observations, etc. containing photographic evidence to be submitted upon completion of the contract.

b. IDENTIFICATION OF BOUNDARY

- i. Contractor will receive detailed maps and information of service areas from the USACE upon contract award. Maps will not be released to the public and must be returned after work has been accepted. Services performed under this contract are to be based on boundary surveyed data as indicated on maps furnished to the Contractor by USACE.
- ii. The detailed boundary survey maps indicate the location of project boundary monuments and the distances and bearings of the property lines.
- iii. At the end of the contract period of performance all maps furnished to the Contractor shall be returned to the USACE.
- iv. Any boundary line to be marked and posted must be a straight line connecting two adjacent monuments. The location of boundary lines may be used to determine distance between boundary markers. The test line shall be marked by flagging as needed by the Contractor to establish a true line between found boundary markers. If the test line is not the true line, the flagging shall be relocated to the true line or removed. Flagging is to be removed once boundary line is cut and painted.

c. CLEARING OF BOUNDARY LINES

- i. Contractor will clear/maintain a four-foot (4') wide, from U.S. Government boundary, by eight feet (8') high line of site by cutting all branches, trees three inches (3") diameter and under at breast height, and brush/fallen trees intruding into this line; stumps will be cut no higher than three inches (3") above the ground (see Figure No. 1).
- ii. Branches will be cut back to the main stem of the tree/shrub.

- iii. Clearing is still required where the bound is defined by roads, hedges, stone walls, fences, streams, or bodies of water.
- iv. All cuttings will be disposed onto USACE property and not left hung up in trees or placed on abutters' property.

d. MARKING OF BOUNDARY LINE, MONUMENTS, AND CORNER TREES

i. Permanent boundary lines shall be marked by repainting old blazes, replacing old blazes on dead or dying trees on adjacent healthy tree, or adding additional blazes where needed so that the blazes are visible from one blaze to the next. Blazes shall be made by scraping rough outer bark from the tree leaving a smooth paintable surface consisting of a three-inch wide by six-inch high vertical strip. Bark shall not be removed so deeply as to expose live wood (see Figure No. 3).

ii. Marking Boundary Line Blaze

- 1) Marking boundary line blaze shall be made by painting the closest tree within the four feet (4') boundary clearing, approximately five feet above the ground, with an RED six inch (6") **square** blaze painted over a WHITE six inch (6") **square** blaze.
- 2) Trees to be blazed shall be greater than four inches (4") in diameter at breast height and shall be either on the boundary line or on Government property within four feet of the boundary line.
- 3) Signs will be placed on closest tree within the four feet boundary clearing, at a height of approximately five feet (5') and facing outward from Government property. Boundary line signs (BLM-01 type) will be placed as close to the boundary line as possible. Signs should face away from the project land being marked.
- 4) Signs should be placed (where terrain, vegetation, and common-sense permit) so that a least two of the signs can be clearly viewed by and individual approaching the Government property line from any point on adjacent property, generally between 75 and 150 feet apart.
- 5) In open or lightly wooded areas, where a painted blaze is not possible, an integrated U.S. Government supplied fiberglass stake with decal "Boundary Line" shall be placed in the ground at or near the boundary line.
- 6) Marking is still required where the bound is defined by roads, hedges, stone walls, fences, streams, or bodies of water.

iii. Marking Boundary Monument and Corner Trees

1) Marking Monument and Corner Blazes shall be made by painting closest tree, within the four feet (4') boundary clearing on Government property, approximately five feet (5') above the ground, with an RED horizontal **band** painted over a WHITE horizontal **band** around the circumference of the tree (See Figure No. 3).

- 2) Blazes, signs, and stakes shall be made to be seen as entering USACE property and installed only on USACE property.
- 3) Trees to be blazed shall be greater than four inches (4") in diameter at breast height and shall be either on the boundary line or on Government property within four feet (4") of the boundary line (see Figure No. 3). Be aware of boundary monuments that are offset from the true property corner, the actual boundary line is what must be delineated on the ground.

e. MONUMENT INSPECTION AND DOCUMENTATION

- i. Contractor shall be responsible to use a metal detector, where appropriate, to locate monuments that may not be immediately visible.
- ii. Contractor will provide the Technical Point of Contact documented conditions of all monuments on site with notes and photos of each monument. Contractor shall make note of any missing, damaged, or incorrect monument identification on provided maps.

f. ENCROACHMENT REPORTING

- i. Discovery of encroachments and suspected encroachments are to be immediately reported to the Technical Point of Contact throughout the course of the contract.
- ii. Contractor will provide a photo album with pictures of possible encroachment and indicate where the encroachment is on provided maps with a brief description of each encroachment and include this information in the final report.
- iii. The contractor SHALL NOT attempt to resolve any encroachments.

2. FINAL REPORT

- a. Provide a written report at the conclusion of the boundary maintenance noting missing monuments, monuments not located, damaged monuments, encroachments, trespasses, and any other noteworthy observations, etc. containing photographic evidence to be submitted upon completion of the contract.
- b. A photo album of every monument located will be included with the final report.

3. RESTRICTIONS

All boundary marking and maintenance shall be completed and inspected by the Contractor's Quality Control Inspector prior to approval of payment. The Contractor shall notify TPOC immediately upon completion of services, so that USACE may inspect the work. (i) Taxes are con	sidered delinquent if	both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

- (B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.
- (ii) Examples.
- (A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.
- (B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.
- (C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.
- (D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).
