¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
1A	0.18	acre(s)	(b)(1) Non-adjacent wetland.	This wetland does not abut any (a)(1) through (a)(3) waters, nor does it receive waters from any (a)(1) through (a)(3) waters in a typical year.
13	0.14	acre(s)	(b)(1) Non-adjacent wetland.	This wetland does not abut any (a)(1) through (a)(3) waters, nor does it receive waters from any (a)(1) through (a)(3) waters in a typical year.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

Information submitted by, or on behalf of, the applicant/consultant: **REQUEST FOR APPROVED JURISDICTIONAL DETERMINATION UNDERSECTION 404 U.S. CLEAN WATER ACT – P&G Gillette Facility, 30 Burt Road, Andover, MA; 11 February 2021**

This information is sufficient for purposes of this AJD.

Rationale: **N/A or describe rationale for insufficiency (including partial insufficiency).**

- Data sheets prepared by the Corps: **Title(s) and/or date(s).**
- Photographs: **Select. Title(s) and/or date(s).**
- Corps site visit(s) conducted on: **Date(s).**
- Previous Jurisdictional Determinations (AJDs or PJDs): **ORM Number(s) and date(s).**
- Antecedent Precipitation Tool: **provide detailed discussion in Section III.B.**
- USDA NRCS Soil Survey: **Title(s) and/or date(s).**
- USFWS NWI maps: **Title(s) and/or date(s).**
- USGS topographic maps: **Title(s) and/or date(s).**

Other data sources used to aid in this determination:

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	N/A.

B. Typical year assessment(s): **N/A or provide typical year assessment for each relevant data source used to support the conclusions in the AJD.**

C. Additional comments to support AJD: **This Approved Jurisdictional Determination only addresses Wetlands 1A and 13 on the above referenced site and not any other wetlands and streams on this site.**

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

These wetlands appear to have been created from human activity, fully or partially. The "Request for AJD" submission included information and maps from USGS, NRCS Soils and Soil Survey, FEMA, MADEP, acceptably-completed USACE Wetland Determination Data Forms (NCNE), aerial photographs, and ground photographs, so these resources were examined in completing this determination, but were not highlighted individually above. Wetland 1A and Wetland 13 are isolated wetlands that appear to have no surface water connections to any (a)(1) through (a)(3) waters and are not separated from such waters by only a manmade or natural structure.
