A non-mandatory, fillable Abbreviated APP template is available upon request. However, the contractor is permitted to submit their own plan, at a minimum it must meet the requirements of EM 385-1-1, Appendix A, Section K.

A preparatory meeting shall be conducted by the prime contractor to discuss the Abbreviated APP contents with all effected onsite employees. B. TECHNICAL

1. MOWING & TRIMMING REQUIREMENTS

- a. Cut and power mow grass to a height of not more than three (3) inches or less than two and one-half (2 ½) inches in each area around each facility. Mowing shall be uniform with no uncut or uneven areas resulting from mowing, overlap, wheel rollover, etc. Mowing shall be conducted in such a manner so there is no wheel damage to the turf or any damage to concrete edges, signs, fences, or trees.

Following mowing, roads, parking lots, and walkways shall be blown of debris and clippings.

Mowing shall not take place close enough to facilities to cause damage. Mowing with heavy equipment will not be permitted when the ground is so wet or boggy that the mowing operations will cause wheel rutting. Mowing under these conditions shall be accomplished by use of smaller mowing equipment and/or handheld trimmers. **It should be noted that some areas consist of steep slopes that may require**

specialized equipment.

- b. Trim grass to a height of not more than three (3”) inches or less than two and one-half (2 ½”) inches in the area around all obstacles. Trimming, edging shall be conducted in such a manner so there is no damage to the turf or any damage to concrete edges, signs, fences, or trees.

Areas adjacent to facilities must be trimmed using other types of equipment such as string trimmers. Trimming shall be accomplished around all vertical objects such as buildings, guard posts, fences, tables, trash receptacles, electrical pedestals, boulders, parking bumpers, water fountains, hose bibs, cookers/grills, etc. Trimming shall be done each time mowing is performed, at a minimum. **Following all trimming, roads, parking lots, flower beds and walkways shall be blown of debris and clippings.**

- c. Grounds cleaning will be performed in conjunction with scheduled mowing services, in order to leave the mowing area with an overall neat and clean appearance. The grounds cleaning shall remove all obvious and noticeable trash and litter from the mowing limits which are designated as the mowing boundaries on the location maps attached to these specifications. All trash and litter shall be removed and properly disposed of as directed by the Technical Point of Contact.
- d. Upon the completion of each mowing cycle, the contractor and Technical Point of Contact will conduct a quality assurance inspection for all work areas to ensure compliance with specifications. The contractor, or their representative(s), must be able to commit manpower, equipment, and resources to correct any deficiencies.

Turf damaged by the contractor must be repaired immediately by raking, smoothing, and re-seeding with the Manufacturer’s suggested application rates, and covering the repaired area with hay.

Any deficiencies noted will be corrected within original contract time frames or appropriate deductions in payment will be made.

2. SPRING CLEAN-UP REQUIREMENT

The contractor shall remove all leaves, logs, debris, litter, etc. from all lawn areas, roadsides, and parking areas maintained under this contract. Damaged turf from winter activities shall be repaired as directed by the Technical Point of Contact. All biodegradable material removed from these locations will be deposited in a designated location for composting. All litter and garbage will be removed from the site by the contractor.

3. FALL CLEAN-UP REQUIREMENT

The contractor shall remove all leaves, debris, litter, etc. from all lawn areas, roadsides, and parking areas maintained under this contract. All biodegradable material removed

from these locations will be deposited in a designated location for composting. All litter and garbage will be removed from the site by the contractor.

4. BRUSH CUTTING DIKE TOES REQUIREMENT

The contractor will provide all labor, equipment, materials, and transportation necessary to brush cut approximately 2.25 mile intermittent stretch along the dike system of Mansfield Hollow Dam, approximately 50 feet wide, which equates to approximately 13.5 acres total.

The areas to be brush cut had trees removed in 2013 and the goal is to prevent trees/vegetation from growing back in those areas.

There is a separate area referred to as “Dike B”, located off of Rt. 89 which requires brush cutting of approximately one (1) acre. The spillway of the dam (located on both sides of the river channel at the dam site) is to have all brush and vegetation cut as well. This area is approximately 1.90 acres.

All debris shall be cut up into chip size or smaller and left to decompose or removed if larger. **It should be noted that some areas are wet, steep, and may have rocks and other obstacles that may require specialized equipment.**

5. BOUNDARY LINE MARKING REQUIREMENT

- a. The contractor will provide all labor, equipment, materials, and transportation necessary to perform U.S. Army Corps of Engineers boundary marking at Mansfield Hollow Dam which includes locating, marking, and clearing brush along approximately eight (8) miles of USACE property boundary line. See Figure 6.
- b. Precise boundary marker/monument numbers and maps will be provided to the contractor upon award of the contract.
- c. Boundary marking should be completed in the early spring before full leaf-out (April/early May) OR in the fall after final leaf drop (November) to locate boundary lines and monuments accurately. Boundary marking must be totally completed during ONE of these time frames and cannot span spring into fall.
- d. Services to be performed under this contract are to be based on boundary survey data as indicated on maps furnished to the contractor by the U.S. Army Corps of Engineers. These boundary survey maps indicate the location of project boundary corners (concrete or aluminum bounds with brass caps, or others) and the distances and bearings of the property lines. **At the end of the contract period, all maps furnished shall be returned to the U.S. Army Corps of Engineers.**
- e. Paint, nails, and flagging will be supplied by the contractor. No storage area, shop equipment or facilities will be supplied by the Government. The contractor

shall supply all transportation and materials not supplied by the government. The Government will supply boundary marking signs as needed. Government furnished supplies valued under \$100 each.

- f. Marking includes clearing brush along the property line, which could impede travel by All-Terrain Utility Vehicle, at least four (4) feet in width. Stone walls shall not be disturbed. Contractor will mark blazes along the line and painting blazes.
- g. Posting consists of placing signs on the property line. Any boundary line to be marked and posted must be a straight line connecting two adjacent corner monuments. The location of boundary lines may be used to determine distance between boundary markers. The test line shall be marked by flagging as needed by the contractor to establish a true line between found boundary markers. If the test line is not the true line the flagging shall be relocated to the true line or removed. Flagging is to be removed once boundary line is cut and painted.
- h. Permanent boundary lines shall be marked by repainting old blazes, replacing old blazes on dead or dying trees on adjacent healthy tree, or adding additional blazes where needed so that the blazes are visible from one blaze to the next. Blazes shall be approximately five feet off the ground and made by scraping rough outer bark from the tree leaving a smooth paintable surface consisting of a three-inch-wide by six-inch-high vertical strip. Bark shall not be removed so deeply as to expose live wood. The top half of each blaze shall be painted red and the bottom painted white. See Figure 6.
- i. Trees to be blazed shall be greater than four inches in diameter at breast height (dbh) and shall be either on the boundary line or on government property within four feet of the boundary line (See Figure 8). Be aware of boundary monuments that are offset from the true property corner, the actual boundary line is what must be delineated on the ground.
- j. At each boundary monument, one or two trees nearby on government property will be painted with a band approximately six inches wide around the circumference of the tree. The top half of the band shall be painted red and the bottom half painted white (See Figure 8). If no tree is available, a metal post with a boundary sign attached shall be placed in the ground. Signs will be placed at a height of approximately five feet and facing outward from Government property.
- k. Boundary line signs (BLM-01 type) will be placed as close to the boundary line as possible. Signs should face away from the project land being marked. Signs should be placed (where terrain, vegetation, and common sense permit) so that at least two of the signs can be clearly viewed by an individual approaching the government property line from any point on adjacent property, generally between 75 and 150 feet apart. In open or lightly wooded areas, an integrated post and panel marker or signs mounted on metal posts shall be placed in the ground at or

near the boundary line.

- l. Designated lengths of marked or flagged boundary lines of sight to be cleared shall have all brush and saplings less than three inches in diameter cut off as close to the ground as conditions allow; *cleared lines shall be at least four feet in width to allow passage by All-Terrain Utility Vehicle. Stone walls shall not be disturbed.* All cut vegetation shall be placed on Government property. Clearing is not required where the boundary line is defined by features such as roads. Boundaries fronting on roadways or other visually sensitive areas shall be marked with signs only.
- m. Any encroachment or suspected encroachment and any missing or broken boundary monuments observed shall be immediately reported to the Technical Point of Contact or Project Manager. **Contractor shall provide a written report of all findings including missing monuments, encroachments, etc.**

6. RESTRICTIONS

All mowing and trimming shall be completed and inspected by the contractor's Quality Control Inspector prior to beginning work in another area. The contractor shall notify Technical Point of Contact immediately upon completion of services, so that the U.S. Army Corps of Engineers may inspect the work. The contractor shall be responsible for correction of all deficiencies discovered by the Quality Assurance inspection within twenty-four (24) hours at no additional cost to the Government.

7. CHANGES TO FREQUENCY/QUANTITY

The Government reserves the option, should it become necessary, to decrease or increase service frequencies and/or facility quantities in any or all project areas. The Government may also, at any time during the duration of this contract, close any property or portion of the property and delete any subsequent service in the closed property or area.

The contractor shall be given adequate notification to prepare for either contingency. This decrease or increase will be deducted from or paid for in accordance with the bidding schedule or a negotiated cost. For increases in services, a formal modification will be issued, signed by the Contracting Officer prior to the performance of services.

The Technical Point of Contact may, on special occasions decide to reschedule a service frequency to avoid conflict with visitation or unnecessary expense. The quantity of frequencies of individual tasks in the contract are estimated, not guaranteed. A minimum of twenty-four (24) hours notification shall be given to the contractor in such cases.

In addition, for any work not completed as required by the CONTRACT SCHEDULE (section 8 below), the contractor will submit accurate invoice reflecting only actual services completed.

- (4) [____] Have, [____] have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 9.104-5(a)(2) for which the liability remains unsatisfied.
- (i) Taxes are considered delinquent if both of the following criteria apply:
- (A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.
- (B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.
- (ii) Examples.
- (A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.
- (B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals Contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.
- (C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.
- (D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

52.219-28 POST-AWARD SMALL BUSINESS PROGRAM REREPRESENTATION (SEP 2021)

(a) Definitions. As used in this clause--

Long-term contract means a contract of more than five years in duration, including options. However, the term does not include contracts that exceed five years in duration because the period of performance has been extended for a cumulative period not to exceed six months under the clause at 52.217-8, Option to Extend Services, or other appropriate authority.

Small business concern--

(1) Means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria in 13 CFR part 121 and the size standard in paragraph (d) of this clause. Such a concern is "not dominant in its field of operation" when it does not exercise a controlling or major influence on a national basis in a kind of business

activity in which a number of business concerns are primarily engaged. In determining whether dominance exists, consideration shall be given to all appropriate factors, including volume of business, number of employees, financial resources, competitive status or position, ownership or control of materials, processes, patents, license agreements, facilities, sales territory, and nature of business activity.

(2) Affiliates, as used in this definition, means business concerns, one of whom directly or indirectly controls or has the power to control the others, or a third party or parties control or have the power to control the others. In determining whether affiliation exists, consideration is given to all appropriate factors including common ownership, common management, and contractual relationships. SBA determines affiliation based on the factors set forth at 13 CFR 121.103.

(b) If the Contractor represented that it was any of the small business concerns identified in 19.000(a)(3) prior to award of this contract, the Contractor shall rerepresent its size and socioeconomic status according to paragraph (f) of this clause or, if applicable, paragraph (h) of this clause, upon occurrence of any of the following:

(1) Within 30 days after execution of a novation agreement or within 30 days after modification of the contract to include this clause, if the novation agreement was executed prior to inclusion of this clause in the contract.

(2) Within 30 days after a merger or acquisition that does not require a novation or within 30 days after modification of the contract to include this clause, if the merger or acquisition occurred prior to inclusion of this clause in the contract.

(3) For long-term contracts--

(i) Within 60 to 120 days prior to the end of the fifth year of the contract; and

(ii) Within 60 to 120 days prior to the date specified in the contract for exercising any option thereafter.

(c) If the Contractor represented that it was any of the small business concerns identified in 19.000(a)(3) prior to award of this contract, the Contractor shall rerepresent its size and socioeconomic status according to paragraph (f) of this clause or, if applicable, paragraph (h) of this clause, when the Contracting Officer explicitly requires it for an order issued under a multiple-award contract.

(d) The Contractor shall rerepresent its size status in accordance with the size standard in effect at the time of this rerepresentation that corresponds to the North American Industry Classification System (NAICS) code(s) assigned to this contract. The small business size standard corresponding to this NAICS code(s) can be found at <https://www.sba.gov/document/support--table-size-standards>.

(e) The small business size standard for a Contractor providing an end item that it does not manufacture, process, or produce itself, for a contract other than a construction or service contract, is 500 employees if the acquisition--

(1) Was set aside for small business and has a value above the simplified acquisition threshold;

(2) Used the HUBZone price evaluation preference regardless of dollar value, unless the Contractor waived the price evaluation preference; or

(3) Was an 8(a), HUBZone, service-disabled veteran-owned, economically disadvantaged women-owned, or women-owned small business set-aside or sole-source award regardless of dollar value.

(f) Except as provided in paragraph (h) of this clause, the Contractor shall make the representation(s) required by paragraph (b) and (c) of this clause by validating or updating all its representations in the Representations and Certifications section of the System for Award Management (SAM) and its other data in SAM, as necessary, to ensure that they reflect the Contractor's current status. The Contractor shall notify the contracting office in writing within the timeframes specified in paragraph (b) of this clause, or with its offer for an order (see paragraph (c) of this clause), that the data have been validated or updated, and provide the date of the validation or update.

(g) If the Contractor represented that it was other than a small business concern prior to award of this contract, the Contractor may, but is not required to, take the actions required by paragraphs (f) or (h) of this clause.

(h) If the Contractor does not have representations and certifications in SAM, or does not have a representation in SAM for the NAICS code applicable to this contract, the Contractor is required to complete the following rerepresentation and submit it to the contracting office, along with the contract number and the date on which the rerepresentation was completed:

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: Under the SCA at section 8(b) this wage determination does not apply to any employee who individually qualifies as a bona fide executive administrative or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than \$27.63 (or on a salary or fee basis at a rate not less than \$455 per week) an hour would likely qualify as exempt computer professionals (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds \$27.63 per hour conformances may be necessary for certain nonexempt employees. For example if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally because job titles vary widely and change quickly in the computer industry job titles are not determinative of the application of the computer professional exemption. Therefore the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

- (1) The application of systems analysis techniques and procedures including

consulting with users to determine hardware software or system functional specifications;

(2) The design development documentation analysis creation testing or modification of computer systems or programs including prototypes based on and related to user or system design specifications;

(3) The design documentation testing creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you

work at night as part of a regular tour of duty you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am.

If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

** HAZARDOUS PAY DIFFERENTIAL **

An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance explosives and incendiary materials. This includes work such as screening blending dying mixing and pressing of sensitive ordnance explosives and pyrotechnic compositions such as lead azide black powder and photoflash powder.

All dry-house activities involving propellants or explosives. Demilitarization modification renovation demolition and maintenance operations on sensitive ordnance explosives and incendiary materials. All operations involving re-grading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that

represents a low degree of hazard when working with or in close proximity to ordnance (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands face or arms of the employee engaged in the operation irritation of the skin minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving unloading storage and hauling of ordnance explosive and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance explosives and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract by the employer by the state or local law etc.) the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition where uniform cleaning and maintenance is made the responsibility of the employee all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount or the furnishing of contrary affirmative proof as to the actual cost) reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However in those instances where the uniforms furnished are made of ""wash and wear"" materials may be routinely washed and dried with other personal garments and do not require any special treatment such as dry cleaning daily washing or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract by the contractor by law or by the nature of the work there is no requirement that employees be reimbursed for uniform maintenance costs.

**** SERVICE CONTRACT ACT DIRECTORY OF OCCUPATIONS ****

The duties of employees under job titles listed are those described in the ""Service Contract Act Directory of Occupations"" Fifth Edition (Revision 1) dated September 2015 unless otherwise indicated.

**** REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE Standard Form 1444 (SF-1444) ****

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e. the work to be performed is not performed by any classification listed in the wage determination) be classified by the contractor so as to provide a reasonable relationship (i.e. appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination (See 29 CFR 4.6(b)(2)(i)). Such conforming procedures shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees (See 29 CFR 4.6(b)(2)(ii)). The Wage and Hour Division shall make a final determination of conformed classification wage rate and/or fringe benefits which shall be paid to all employees performing in the classification from the first day of work on which contract work is performed by them in the classification. Failure to pay such unlisted employees the compensation agreed upon by the interested parties and/or fully determined by the Wage and Hour Division retroactive to the date such class of employees commenced contract work shall be a violation of the Act and this contract. (See 29 CFR 4.6(b)(2)(v)). When multiple wage determinations are included in a contract a separate SF-1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).

- 2) After contract award the contractor prepares a written report listing in order the proposed classification title(s) a Federal grade equivalency (FGE) for each proposed classification(s) job description(s) and rationale for proposed wage rate(s) including information regarding the agreement or disagreement of the authorized representative of the employees involved or where there is no authorized representative the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.

- 3) The contracting officer reviews the proposed action and promptly submits a report of the action together with the agency's recommendations and pertinent information including the position of the contractor and the employees to the U.S. Department of Labor Wage and Hour Division for review (See 29 CFR 4.6(b)(2)(ii)).

- 4) Within 30 days of receipt the Wage and Hour Division approves modifies or disapproves the action via transmittal to the agency contracting officer or notifies the contracting officer that additional time will be required to process the request.

- 5) The contracting officer transmits the Wage and Hour Division's decision to the contractor.

- 6) Each affected employee shall be furnished by the contractor with a written copy of such determination or it shall be posted as a part of the wage determination (See 29 CFR 4.6(b)(2)(iii)).

Information required by the Regulations must be submitted on SF-1444 or bond paper.

When preparing a conformance request the ""Service Contract Act Directory of Occupations"" should be used to compare job definitions to ensure that duties requested are not performed by a classification already listed in the wage determination. Remember it is not the job title but the required tasks that determine whether a class is included in an established wage determination.

Conformances may not be used to artificially split combine or subdivide classifications listed in the wage determination (See 29 CFR 4.152(c)(1))."
