

ROCKLAND DISPOSAL SITE

Description: The Rockland Disposal Site (RDS) is one of the three regional dredged material disposal sites located in the waters of Maine. RDS covers a 0.25 nmi² (0.87 km²) area of seafloor within West Penobscot Bay and is centered at 44° 07.105' N, 69° 00.269' W (NAD 83). It is located approximately 3.1 nmi (5.7 km) east-southeast of Brewster Point, Glen Cove, Maine. The authorized disposal point (within the overall disposal area) is specified for each dredging project in other project documents.
