US Army Corps of Engineers
New England District

DATE	APR 12 2012
DESCRIPTION	STONINGTON HARBOR, CONNECTICUT CONDITION SURVEY
SCALE	1" = 100'
PROJECT	10 & 12-FOOT ANCHORAGES
SHEET	V-101
OF	1

GENERAL NOTES:

1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW) 1983-2001 Tidal Epoch.
2. Topography shown is from previous surveys and/or NOAA Chart No. 13214. All topography, including shoreline, bridges, piers, etc., is located approximate unless otherwise noted and should be used as a general reference only.
3. Bench Mark Data: TBM Tornado (2011) is the top of a 5/8" rebar in concrete parking curb. The curb is located at Waylands Wharf off Broad Street in the Borough of Stonington. The mark is the most westerly rebar in the parking area adjacent to the public dog park. Elevation is 5.90 feet above MLLW.
4. Coordinates shown are based on the Lambert Grid System for the State of Connecticut (Zone 0600) & NAD 1983.
5. Survey was performed using an Odom MK3 echotrac echosounder. Horizontal positioning and vertical depths were obtained utilizing a Leica 1200 GPS System. RTK base station MTS Pawcatuck was used.
6. The sounding information shown on these maps represents the SHORTEST soundings of those obtained from hydrographic surveys conducted during January 2012.
7. The sounding information depicted on these maps should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
8. The information depicted on these maps represents the results of surveys made on the dates indicated, and can only be considered as reflecting the general conditions existing at that time.
9. Field Books: R&H 2338

10-foot depth contour shown thus:
12-foot depth contour shown thus:
