- GENERAL NOTES:**
1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW) 1983-2001 Tidal Epoch.
  2. Topography shown is from September 2011, previous surveys, and/or NOAA Chart No. 13229. All topography, including shoreline, bridges, piers, etc. is located approximate unless otherwise noted and should be used as a general reference only.
  3. Bench Mark Data: BM USED 1941 (2007) is a cut square in the concrete ramp, 11.5 feet south of the small door in the center of the south side of the U.S. Coast Guard Boat House, 0.3 foot east of the expansion joint in the concrete ramp and 0.3 foot south of the plank part of the ramp. Elevation is 6.61 feet above MLLW.
  4. Coordinates shown are based on the Lambert Grid System for the Commonwealth of Massachusetts (Island Zone 2002) and NAD 1983.
  5. Survey was performed using an Odom MK2 echotrac echosounder. Horizontal positioning was obtained utilizing a Leica 1200 GPS. RTK base station BM Landing (2007) was used.
  6. The sounding information shown on this map represents the SHOALEST soundings of those obtained from hydrographic surveys conducted during June 2012.
  7. The sounding information depicted on this map should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
  8. The information depicted on this map represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
