The information shown on the map represents the Corps of Engineers' best assessment of the current condition of the navigational aids, channels, and waterways. It is based on the most recent surveys and does not necessarily reflect the current operational status.

Access Constraints: The United States Government furnishes this map for use in determining the extent of navigable waters. The information shown is the best available at the time of publication. Temporal changes may have occurred since this dataset was surveyed. The recipient may not transfer or use this material for any purpose except for determining the extent of navigable waters in accordance with the laws of the United States.

The information shown on this map is intended to be used in conjunction with the Corps of Engineers' regulatory and engineering guidance to determine the extent of navigable waters. The information is not intended to be used for navigation, surveying, or other purposes.
