- GENERAL NOTES:**
1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW).
  2. Topography shown is from previous surveys and/or NOAA Chart No. 13214. All topography, including shoreline, bridges, piers, etc., is located approximate unless otherwise noted and should be used as a general reference only.
  3. Bench Mark Data: B.M. 1 (1961) is a standard USC&GS disk set in the center of a 10 foot (3.00 m) square concrete slab near the intersection of the stone Jetty and the shoreline, 197 feet (60.05 m) north of Bench Mark No Stamping I, 134.3 feet (40.93 m) northwest of the northeast corner of a US Coast Guard bulkhead at the harbor entrance, and 7.1 feet (2.16 m) south of the north corner of the concrete slab. Elevation is 8.40 feet above MLLW.
  4. Coordinates shown are based on the Lambert Grid System for the State of Connecticut & NAD 1983.
  5. The sounding information shown on this map represents the SHOALEST soundings of those obtained from hydrographic surveys conducted during April and May 2002.
  6. The sounding information depicted on this map should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
  7. The information depicted on this map represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
