

PUBLIC NOTICE

Information Request Period Begins: May 01, 2025
Information Request Period Ends: June 01, 2025

The purpose of this notice is to request information on the private and public needs for confined aquatic disposal facilities for dredged material in the New England District region. Your input will be used by the U.S. Army Corps of Engineers, New England District in the preparation of a report to Congress, authorized by Section 8128 of WRDA 2022.

Participants will be asked specifically about future dredging plans such as estimated quantities, characterization of dredge materials (i.e. suitable or unsuitable for open water disposal), and location of participants' facilities.

Your participation is voluntary but is extremely valuable as it will assist us in identifying disposal needs and will provide information that will allow us to summarize the needs for dredged material management options that could assist you in the future.

Your responses are confidential and only summaries of the results will be included in the report. Please proceed to the following site or scan the QR code to complete the assessment no later than June 1, 2025.

Thank you for your assistance.
