

GENERAL NOTES:

1. Soundings and elevations are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW) 1983-2001 Tidal Epoch.
2. Topography shown is from previous surveys and/or NOAA Chart No. 13224. All topography, including shoreline, bridges, piers, etc., is located approximate unless otherwise noted and should be used as a general reference only.
3. Bench Mark Data: TBM Ramp (2005) is a 5/16" drill hole in a cut triangle at the edge of a concrete walking ramp to the dock between two boat ramps at the north end of Oakland Beach. Elevation is 7.80 feet above MLLW.
4. Coordinates shown are based on the Transverse Mercator Grid System for the State of Rhode Island (Zone 3800) and NAD 1983.
5. Survey was performed using an Odom MK3 echotrac echosounder. Horizontal and vertical data was obtained utilizing a Leica 1200 GPS System.
6. The sounding information shown on these maps represents the SHOALEST soundings of those obtained from hydrographic surveys conducted from May to June 2007.
7. The sounding information depicted on these maps should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
8. The information depicted on these maps represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
9. Field Books: R&H 2526 and 2569
 Depthsounder Rolls: 07-899/01
 Surveyed by: Robert MacGovern and Crew
