GENERAL NOTES:

1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW).
2. Topography shown is from previous surveys and/or NOAA Chart No. 13221. All topography, including shoreline, bridges, piers, etc., is located approximate unless otherwise noted and should be used as a general reference only.
3. Bench Mark Data: B.M. 3572 H (1983) is a survey disk set in the top of a concrete seawall along the south shore of the Coast Guard Light Station, 124.7 feet (38.0 m) southeast of the lighthouse base, and 101.8 feet (31.0 m) east of Bench Mark 3572 K (1983).
Elevation is 10.48 feet above MLLW.
4. Bench Mark Data: T.B.M. Oakland (2000) is a chiseled square on north end of a concrete seawall under 0.2 foot of gravel just south of the top of the most southerly of two ramps at Oakland Beach Boat Ramp. To reach station, follow Oakland Beach Avenue to Suburban Parkway to Bay Avenue.
Elevation is 7.49 feet above MLLW.
4. Coordinates shown are based on the Transverse Mercator Grid System for the State of Rhode Island & NAD 1983.
5. The sounding information shown on this map represents the SHOALEST soundings of those obtained from hydrographic surveys conducted during December 2004.
6. The sounding information depicted on this map should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
7. The information depicted on this map represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
