

GENERAL NOTES:

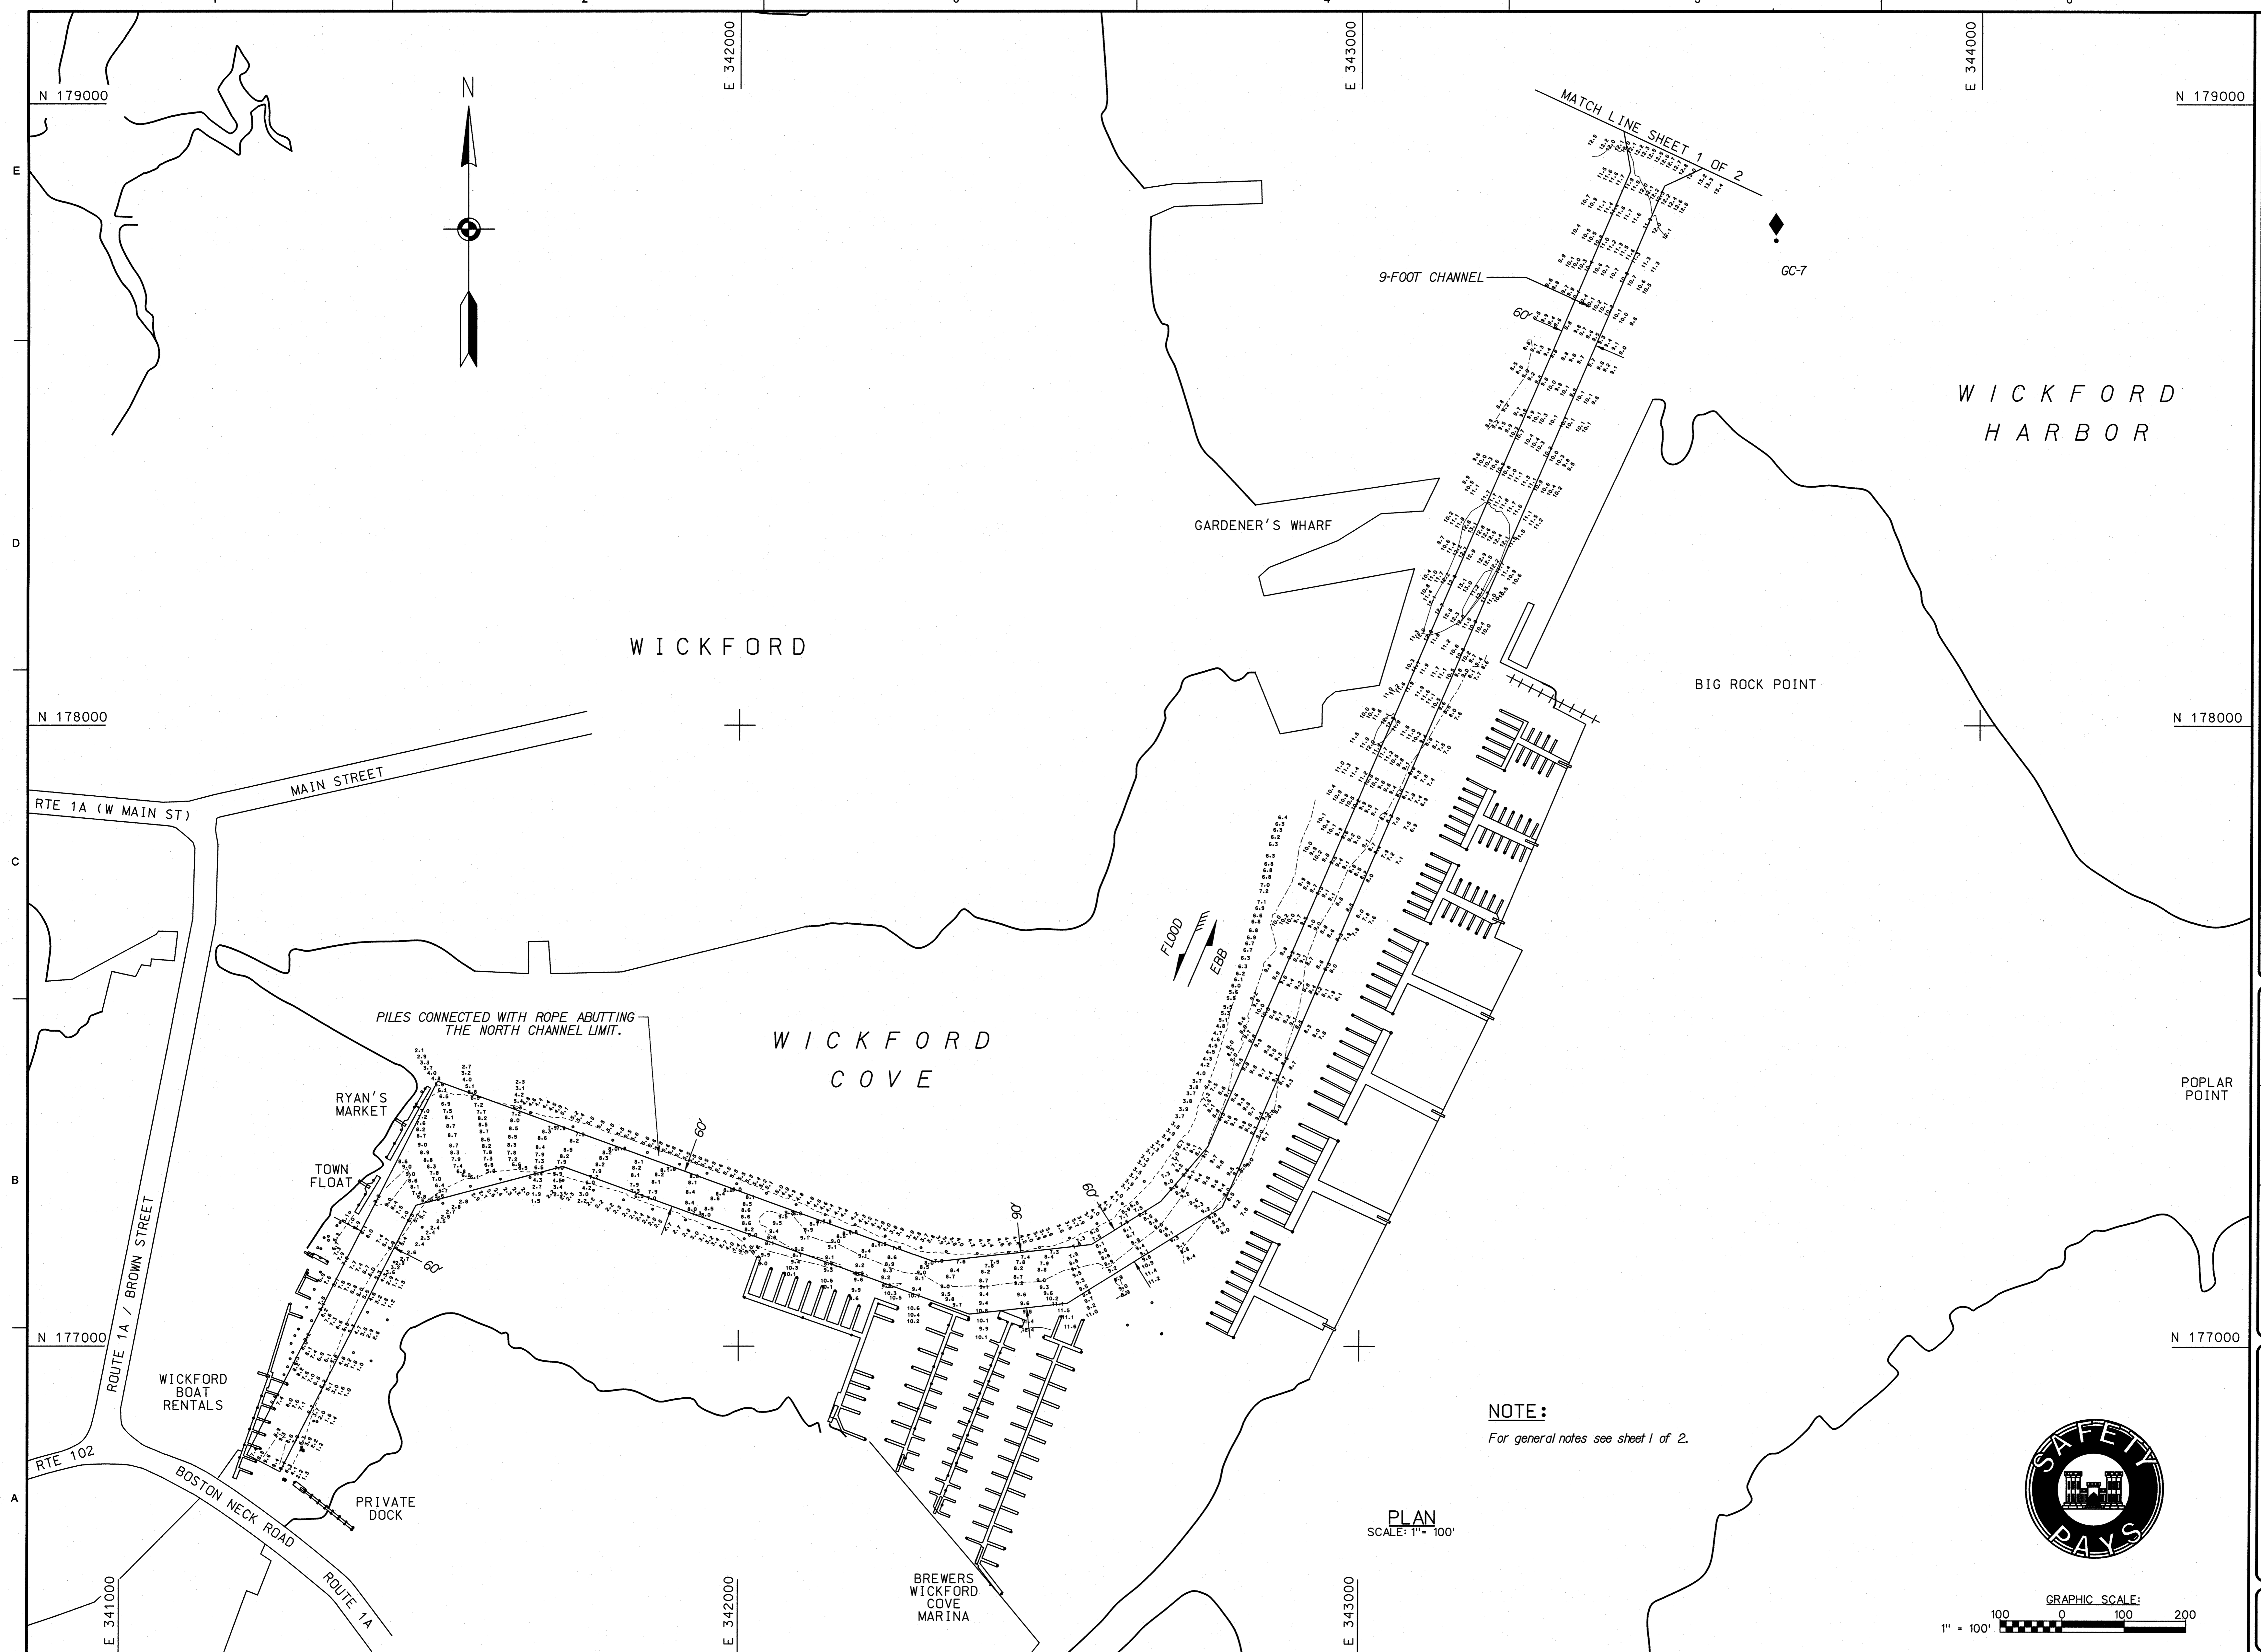

1. Soundings are in feet and tenths and refer to the plane of Mean Lower Low Water (MLLW) 1983-2001 Tidal Epoch.
2. Topography shown is from previous surveys and/or NOAA Chart No. 13223. All topography, including shoreline, bridges, piers, etc., is located approximate unless otherwise noted and should be used as a general reference only.
3. Bench Mark Data: BM 4538A (1994) is a standard NOS disk stamped "No. 4538A 1994", set in the northeast corner of the town dock concrete seawall, 15.4 feet (4.69m) east-southeast of ramp leading to the floating dock, 9.2 feet (2.8m) west of the east face of the seawall and 2 feet (0.61m) south of the north face of seawall. Elevation is 6.04 feet above MLLW.
4. Coordinates shown are based on the Transverse Mercator Grid System for the State of Rhode Island & (Zone 3800) NAD 1983.
5. Survey was performed using an Odom Mk3 Echotrac echosounder. Horizontal and vertical depths obtained by utilizing a Loba 1200 system. An RTK base station set up on BM 4538A (1994).
6. The sounding information shown on these maps represents the SHALLEST soundings of those obtained from hydrographic surveys conducted during December 2010.
7. The sounding information depicted on these maps should NOT be used to determine volumes. Volumes are determined from more sounding information than shown. Additional sounding information is available upon request.
8. The information depicted on these maps represents the results of surveys made on the dates indicated, and can only be considered as indicating the general conditions existing at that time.
9. Field Book: R&H 5082
