CAPE COD CANAL VISITOR CENTER

US Army Corps
of Engineers®

Discover the rich history, fascinating features and vigilant operation of the Cape Cod Canal and the US Army Corps of Engineers through various displays, exhibits and public programs.

Park Rangers and volunteers staff the Visitor Center, providing information and answering questions about the Cape Cod Canal. A small bookstore, plus free tide tables, Canal guides and brochures are available

The Center offers multiple interactive exhibits on various aspects of the Cape Cod Canal. There is something fun for all ages.

View films in our theater. Programs on Canal History, Canal Critters and Canal Wildflowers play continuously throughout the day.

Come on aboard a 40-foot patrol boat! The patrol boat RENIER watched over the Canal's waters for 25 years, enforcing regulations and rendering assistance to vessels in distress. Today, as the central figure inside the Visitor Center, the RENIER continues to encourage safety on the water.

Explore the Marine Traffic Control exhibit. Learn how the US Army Corps of Engineers manages vessel traffic through the Canal. Operate radar and camera monitors to view live ship traffic. Discover what types of vessels, both common and unique, use the Canal.

Learn the Corp's role in transforming a 300-year-old dream into a safe navigable waterway. Each summer, Park Rangers lead regularly scheduled tours through the Center.

School groups, community groups and tour buses may schedule a free group tour or program by calling the Visitor Center.

The Cape Cod Canal

Since 1928, the US Army Corps of Engineers has been responsible for the operation and maintenance of the Cape Cod Canal.

The primary purpose of the Cape Cod Canal is to serve as a safe navigable waterway, saving up to 166 miles of coastal travel around the tip of Cape Cod.

The Canal is also operated as a safe and enjoyable Federal recreation area. The Cape Cod Canal welcomes the company of more than 3 million visitors each year.
