**Haul Road:** Drive throughs along the haul road and stockpile area shows that they appear to be in good shape (no large piles of gravel along route). Catch basin at corner of driveway at the material staging area has been fitted with a silt prevention bag.

**Truck Hauling Note:** One of the drivers was pulled over at Route 147 Middlefield Rd./Durham Rd/ Main St. and Route 157 Reeds Gap Rd. by DOT for weight limitation violation. The DOT weighed the vehicle and fined the driver for being overweight.

#### **Daily Report**

| Project:           | Durham Meadows Pipeline Installation | Date:        | October 29, 2019      |
|--------------------|--------------------------------------|--------------|-----------------------|
| Location:          | Talcott Ridge Drive, Middletown CT   | Day of Week: | Tuesday               |
| Project #:         | AECOM: 60445033                      | Report No:   | 23                    |
| <b>Contractor:</b> | Ludlow Construction                  | Page:        | <b>2</b> of <b>18</b> |

0830 – On site: Due to delay in pipe shipments, Ludlow is installing fire hydrants today. First location is 40+44.38 (Adjusted number 40+49.21). Hole for hydrant already dug and being prepped for installation.

0900 – Installing 6" hydrant pipe to Tee. Restrained connections.

0910 – Installing hydrant assembly. Note that the assembly came with a non-restrained gland. Ludlow swapped out the manufacturer gland for a Mega-Lug fitting with the check lugs.

1030 – Finished backfilling and compacting first hydrant location. Moved to second location and took break early.

1230 – Installing second fire hydrant at 41+42.34 (Adjusted location 41+47.17). Again, replaced manufacturer gland with Mega-Lug restrained gland.

1300 – Beginning lifts of processed fill on hydrant number 2. Also marking out the hydrant spur line up Watch Hill Drive from the first intersection with Watch Hill. The mark out is for saw cutting tomorrow in preparation to install 8" line up to the hydrant-Tee for the new hydrant on Watch Hill.

1330 - Discussion with Billy (Ludlow) - the initial starting point at the intersection of South Main St. (Rte. 17) and Talcott Ridge Drive was off by 4.83 feet. Instead of starting at 51+72 the actual start was 51+76.83; which will carry all the way to the top. See notes at top of page for Daily Daytime Report dates affected.

1400 – Departed MMC trailers for one more haul road drive-by. Off site.

**Payment Items:**
