SAMPLE DELIVERY GROUP CASE NARRATIVE

Client:	H&S Environmental	**Job No**	MC41432
Site:	Fort Devens, AOC50, Devens, MA	**Report Date**	10/1/2015 10:22:22 AM

5 Sample(s), 1 Trip Blank(s) and 0 Field Blank(s) were collected on 09/14/2015 and were received at Accutest on 09/14/2015 properly preserved, at 4.1 Deg. C and intact. These Samples received an Accutest job number of MC41432. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260C

Matrix: AQ **Batch ID:** MSU1329

- All samples were analyzed within the recommended method holding time.
- Sample(s) MC41493-27MS, MC41493-27MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- MC41493-27MS/MSD for Trichloroethene, cis-1,2-Dichloroethene are outside control limits due to high level in sample relative to spike amount.
- MC41432-1: Elevated RL due to dilution required for matrix interference.
- MC41432-1, -2, -3, -4, -5, -6 for Chloromethane: Continuing Calibration outside of DOD acceptance criteria. Reporting Limit response verified by low-level standard.
- MC41493-27MS/MSD for Styrene are outside DOD criteria, but within in-house criteria.

Volatiles by GC By Method VRSK 175

Matrix: AQ **Batch ID:** GBA1528

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-6DUP were used as the QC samples indicated.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25142

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-2FMS, MC41432-2FMSD, MC41432-2FSDL were used as the QC samples for metals.
- MP25142-S1, MP25142-S2 for Manganese are outside control limits. Spike amount low relative to the sample amount. Refer to lab control or spike blank for recovery information.
- RPD(s) for Serial Dilution for Copper, Nickel, Silver, Vanadium, Zinc are outside control limits for sample MP25142-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).
- MC41432-2F for Iron, Sodium, Manganese: Matrix spike and matrix spike duplicate recoveries outside of the control limits. J-flag applied.
- MP25142-S1 for Iron, Sodium: Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- MP25142-S2 for Sodium, Iron are outside control limits. Spike duplicate recovery indicates possible matrix interference and/or sample nonhomogeneity.

Metals By Method SW846 6020A

Matrix: AQ	Batch ID: MP25142A

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-2FMS, MC41432-2FMSD, MC41432-2FSDL were used as the QC samples for metals.

Metals By Method SW846 7470A

Matrix: AQ	Batch ID: MP25144

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41374-1FMS, MC41374-1FMSD were used as the QC samples for metals.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ	Batch ID: N:GP92319

- Analysis performed at Accutest Laboratories, Dayton, NJ.

Wet Chemistry By Method EPA 353.2

Matrix: AQ	Batch ID: GP19566

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41414-26DUP, MC41414-26MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.

Matrix: AQ	Batch ID: GP19609

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-6MS, MC41432-6DUP were used as the QC samples for Nitrogen, Nitrate + Nitrite.
- RPD(s) for Duplicate for Nitrogen, Nitrate + Nitrite are outside control limits for sample GP19609-D1. RPD acceptable due to low duplicate and sample concentrations.

Matrix: AQ	Batch ID: R37251

- MC41432-2 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	Batch ID: R37252

- MC41432-3 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	Batch ID: R37253

- MC41432-5 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	Batch ID: R37254

- MC41432-1 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	Batch ID: R37333

- MC41432-6 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Wet Chemistry By Method SM 21 4500 NO2 B

Matrix: AQ	**Batch ID:** GP19567

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-1DUP, MC41432-1MS were used as the QC samples for Nitrogen, Nitrite.

Wet Chemistry By Method SM21 4500 S F

Matrix: AQ	**Batch ID:** GN51768

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-6DUP, MC41432-6MS were used as the QC samples for Sulfide.

Wet Chemistry By Method SW846 9060

Matrix: AQ	**Batch ID:** GP19578

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41374-4MS, MC41374-4MSD were used as the QC samples for Total Organic Carbon.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC41432).

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Accutest Labs of New England, Inc. **Job No** MC41432

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 9/28/2015 11:21:58 A

On 09/16/2015, 5 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a maximum corrected temperature of 3.3 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of MC41432 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** GP92319

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC41432-3DUP, MC41432-3MS were used as the QC samples for Sulfate.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: MC41432 **Client:** H&S **Project:**

Date / Time Received: 9/14/2015 2:00:00 PM **Delivery Method:** **Airbill #'s:**

Cooler Temps (Initial/Adjusted): #1: (4.1/4.1);

Cooler Security

	Y	N		Y	N
1. Custody Seals Present:	☑	☐	3. COC Present:	☑	☐
2. Custody Seals Intact:	☑	☐	4. Smpl Dates/Time OK	☑	☐

Cooler Temperature

	Y	N
1. Temp criteria achieved:	☑	☐
2. Thermometer ID:	G1;	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	1	

Quality Control_Preservation

	Y	N	N/A
1. Trip Blank present / cooler:	☑	☐	☐
2. Trip Blank listed on COC:	☑	☐	☐
3. Samples preserved properly:	☑	☐	
4. VOCs headspace free:	☑	☐	☐

Sample Integrity - Documentation

	Y	N
1. Sample labels present on bottles:	☑	☐
2. Container labeling complete:	☑	☐
3. Sample container label / COC agree:	☑	☐

Sample Integrity - Condition

	Y	N
1. Sample recvd within HT:	☑	☐
2. All containers accounted for:	☑	☐
3. Condition of sample:	Intact	

Sample Integrity - Instructions

	Y	N	N/A
1. Analysis requested is clear:	☑	☐	
2. Bottles received for unspecified tests	☐	☑	
3. Sufficient volume recvd for analysis:	☑	☐	
4. Compositing instructions clear:	☐	☐	☑
5. Filtering instructions clear:	☐	☐	☑

(a) Outside control limits due to high level in sample relative to spike amount.
(b) Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
(c) Spike amount low relative to the sample amount. Refer to lab control or spike blank for recovery information.
(d) Spike duplicate recovery indicates possible matrix interference and/or sample nonhomogeneity.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: H&S Environmental **Job No** MC42160

Site: Fort Devens, AOC50, Devens, MA **Report Date** 11/6/2015 4:41:19 PM

14 Sample(s) and 1 Trip Blank were collected on 10/13/2015 and were received at Accutest on 10/13/2015 properly preserved, at 0.9 Deg. C and intact. These Samples received an Accutest job number of MC42160. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report. Trip Blank was not listed in the chain and analysis was performed per request.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260C

Matrix: AQ **Batch ID:** MSG5503

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- MC42160-5: Dilution required due to matrix interference.
- MC42160-12 for Dibromofluoromethane: Outside DoD control limits, but within in-house control limits.

Matrix: AQ **Batch ID:** MSH2529

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42171-1MS, MC42171-1MSD were used as the QC samples indicated.
- MC42160-5: Dilution required due to matrix interference.
- MC42160-6: The pH of the sample aliquot for VOA analysis was >2 at time of analysis.
- MC42160-1 through MC42160-12 for Carbon disulfide: Continuing Calibration outside of DOD acceptance criteria. Reporting Limit response verified by low-level standard.
- MC42160-6,9 for Vinyl chloride: Continuing Calibration outside of DOD acceptance criteria. Result may be biased high.
- MC42171-1MS for 1,2-Dibromo-3-chloropropane, Vinyl chloride: Outside DoD control limits, but within in-house control limits.

Matrix: AQ **Batch ID:** MSU1361

- All samples were analyzed within the recommended method holding time.
- Sample(s) MC42222-1MS, MC42222-1MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- RPD(s) for MSD for Chloromethane are outside control limits for sample MC42222-1MSD. High RPD due to possible matrix interference and/or sample non-homogeneity.
- MC42160-15 for Chloromethane: Continuing Calibration outside of DOD acceptance criteria. Reporting Limit response verified by low-level standard.
- RPD of MC42222-1MSD for acetone, trans-1,3-Dichloropropene: Outside DoD control limits, but within in-house control limits.

Volatiles by GC By Method VRSK 175

Matrix: AQ	**Batch ID:** GBA1545

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11MS, MC42202-11MSD were used as the QC samples indicated.
- MC42202-11MS/MSD Recovery(s) for Methane are outside control limits. Outside control limits due to high level in sample relative to spike amount.

Metals By Method SW846 6010C

Matrix: AQ	**Batch ID:** MP25294

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42005-4FMS, MC42005-4FMSD, MC42005-4FSDL were used as the QC samples for metals.
- RPD(s) for Serial Dilution for Iron are outside control limits for sample MP25294-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ	**Batch ID:** MP25318

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42178-3FMS, MC42178-3FMSD, MC42178-3FSDL were used as the QC samples for metals.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ	**Batch ID:** N:GP93055

- Sulfate: Analysis performed at Accutest Laboratories, Dayton, NJ.

Wet Chemistry By Method EPA 353.2

Matrix: AQ	**Batch ID:** GP19723

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42193-1DUP, MC42193-1MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.

Matrix: AQ	**Batch ID:** R37514

- MC42160-3 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37515

- MC42160-4 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37516

- MC42160-6 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37517

- MC42160-7 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37518

- MC42160-9 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37523

- MC42160-5 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Wet Chemistry By Method SM 21 4500 NO2 B

Matrix: AQ **Batch ID:** GP19693

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42173-1DUP, MC42173-1MS were used as the QC samples for Nitrogen, Nitrite.

Wet Chemistry By Method SM21 2320B

Matrix: AQ **Batch ID:** GN52064

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42193-1DUP, MC42193-1MS were used as the QC samples for Alkalinity, Total as CaCO3.

Wet Chemistry By Method SM21 4500 S F

Matrix: AQ **Batch ID:** GN52066

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42263-1DUP, MC42263-1MS were used as the QC samples for Sulfide.

Wet Chemistry By Method SW846 9060

Matrix: AQ **Batch ID:** GP19721

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42426-1MS, MC42426-1MSD were used as the QC samples for Total Organic Carbon.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42160).

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Accutest Labs of New England, Inc. **Job No** MC42160

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 10/23/2015 4:17:22 P

On 10/15/2015, 7 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a maximum corrected temperature of 3.6 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of MC42160 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** GP93055

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JC6766-10DUP, MC42160-7MS were used as the QC samples for Sulfate.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

No hits reported in this sample.

(a) Analysis performed at Accutest Laboratories, Dayton, NJ.
(b) Dilution required due to matrix interference.
(c) The pH of the sample aliquot for VOA analysis was > 2 at time of analysis.
(d) The pH of the sample aliquot for VOA analysis was > 2 at time of analysis. Continuing Calibration outside of DOD acceptance criteria. Result may be biased high.
(e) Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)
(f) Continuing Calibration outside of DOD acceptance criteria. Result may be biased high.

Subject: FW: AOC 50

There's another problem with the samples on this COC. Sample G6M-02-01X (10/13 @1420) Lab Sample ID: MC42160-12/12F has the incorrect field ID. It should be G6M-03-01X and analyzed for VOCs and dissolved metals only. Please cancel the remaining analyses if they haven't started yet (If they have started go ahead and report them). It was our error! Also Please check samples -13F and -14F. I just noticed that sample -13 had an "H" added to it. Please verify that it was a preserved poly for As only ad not VOA vials.

I hope we resolved the sampling issues. Thank You

Laurie Ekes

Subject: RE: AOC 50

Sample ID, G6M-95-20X-FAL15 (MC42160-1) should be analyzed for VOC and dissolved metals (there should be 3-VOA vials and 1-HNO poly)
Sample ID, G6M-03-02X-FAL15 (MC42160-9) should be analyzed for the full suite (VOCs, dissolved metals (As, Fe, Mn), dissolved gasses, nitrate, sulfate, sulfide, alkalinity and TOC). I believe you said this one was missing the nitrate (H2SO4 preserved bottle for 365.2/? If it's missing..then we'll just go with out.
Add the trip blank to the COC for VOCs.
Samples -13 and -14 should be analyzed for dissolved arsenic NOT Manganese.

Thank you Laurie

Hi Laurie,

We have some issues on this chain.

Sample ID, G6M-95-20X-FAL15 was only received with 3 vials with HNO3 but the coc indicates a list of analysis.

Sample ID, G6M-03-02X-FAL15 indicates only 8260 on the coc but we received 11 bottles for this.

We also received a Trip Blank that is not listed on the coc. Do you need this added?

Please advise ASAP.

You do not need to run nitrate/nitrite (E352.3)for sample G6M-03-02X-FAL15 due to insufficient sample volume.

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: MC42160 **Client:** H&S **Immediate Client Services Action Required:** Yes

Date / Time Received: 10/13/2015 5:50:00 PM **Delivery Method:**

Project: DEVENS **No. Coolers:** 2 **Airbill #'s:**

Cooler Security

	Y	N
1. Custody Seals Present:	✔	☐
2. Custody Seals Intact:	✔	☐
3. COC Present:	✔	☐
4. Smpl Dates/Time OK	✔	☐

Cooler Temperature

	Y	N
1. Temp criteria achieved:	✔	☐
2. Cooler temp verification:	Infared Gun	
3. Cooler media:	Ice (Bag)	

Quality Control_Preservation

	Y	N	N/A
1. Trip Blank present / cooler:	✔	☐	
2. Trip Blank listed on COC:	☐	✔	
3. Samples preserved properly:	✔	☐	
4. VOCs headspace free:	✔	☐	☐

Sample Integrity - Documentation

	Y	N
1. Sample labels present on bottles:	✔	☐
2. Container labeling complete:	✔	☐
3. Sample container label / COC agree:	✔	☐

Sample Integrity - Condition

	Y	N
1. Sample rec'd within HT:	✔	☐
2. All containers accounted for:	☐	✔
3. Condition of sample:	Intact	

Sample Integrity - Instructions

	Y	N	N/A
1. Analysis requested is clear:	✔	☐	
2. Bottles received for unspecified tests	✔	☐	
3. Sufficient volume rec'd for analysis:	✔	☐	
4. Compositing instructions clear:	☐	☐	✔
5. Filtering instructions clear:	☐	☐	✔

Comments

-1 Only 1-250ML (HNO3) , 3-40ML HCL vials received. Full suite of analyses requested.

-9 VOCs and Dissolved Metals requested. Received full suite of bottleware (11 containers)

-15 3-40ML (HCL) TB'S Recd. Not listed

ACCUTEST LABORATORIES

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: H&S Environmental **Job No** MC42178

Site: Fort Devens, AOC50, Devens, MA **Report Date** 11/20/2015 1:27:54 PM

12 Sample(s) and 1 Trip Blank were collected on 10/14/2015 and were received at Accutest on 10/14/2015 properly preserved, at 2.9 Deg. C and intact. These Samples received an Accutest job number of MC42178. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260C

Matrix: AQ **Batch ID:** MSU1363

- All samples were analyzed within the recommended method holding time.
- Sample(s) MC42178-3MS, MC42178-3MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- RPD(s) for MSD for 2-Hexanone are outside control limits for sample MC42178-3MSD. High RPD due to possible matrix interference and/or sample non-homogeneity.
- MC42178-1 through MC42178-13: Laboratory not DOD certified for method 8260c analysis.
  Samples were analyzed at Accutest of New England in order to meet method required Holding Times.
- Continuing calibration check standard MSU1363-CC1360 for trichlorofluoromethane, vinyl acetate, trans-1,3-dichloropropene exceed 20% Difference (biased high). Associated samples are non-detect for these compounds.
- MC42178-3MS/MSD, MSU1363-ECC1360 for Tert Butyl Alcohol-D9: Outside control limits. Target analytes not associated with this internal standard.
- MC42178-11: Elevated RL due to dilution required for matrix interference (foaming).
- MC42178-3MSD for 1,1,2,2-Tetrachloroethane: Outside DoD control limits, but within in-house control limits.

Volatiles by GC By Method VRSK 175

Matrix: AQ **Batch ID:** GBA1548

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42178-7DUP were used as the QC samples indicated.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25318

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42178-3FMS, MC42178-3FMSD, MC42178-3FSDL were used as the QC samples for metals.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** N:GP93103

- Analysis performed at Accutest Laboratories, Dayton, NJ.

Wet Chemistry By Method EPA 353.2

Matrix: AQ	**Batch ID:** GP19724

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42193-3DUP, MC42193-3MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.

Matrix: AQ	**Batch ID:** R37531

- MC42178-7 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37532

- MC42178-8 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37533

- MC42178-10 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37534

- MC42178-11 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Wet Chemistry By Method SM 21 4500 NO2 B

Matrix: AQ	**Batch ID:** GP19693

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42173-1DUP, MC42173-1MS were used as the QC samples for Nitrogen, Nitrite.

Wet Chemistry By Method SM21 2320B

Matrix: AQ	**Batch ID:** GN52114

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42193-3DUP, MC42193-3MS were used as the QC samples for Alkalinity, Total as CaCO3.

Wet Chemistry By Method SM21 4500 S F

Matrix: AQ	**Batch ID:** GN52066

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42263-1DUP, MC42263-1MS were used as the QC samples for Sulfide.

Matrix: AQ	**Batch ID:** GN52067

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Sulfide.

Wet Chemistry By Method SW846 9060

Matrix: AQ	**Batch ID:** GP19721

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42426-1MS, MC42426-1MSD were used as the QC samples for Total Organic Carbon.

Matrix: AQ	**Batch ID:** GP19722

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11MS, MC42202-11MSD were used as the QC samples for Total Organic Carbon.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42178).

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Accutest Labs of New England, Inc. **Job No** MC42178

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 10/26/2015 4:10:42 P

On 10/16/2015, 4 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a maximum corrected temperature of 2.9 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of MC42178 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** GP93103

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JC6249-1DUP, JC6249-1MS were used as the QC samples for Sulfate.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

MC42178-13 **TRIP BLANK**

No hits reported in this sample.

(a) Laboratory not DOD certified for method 8260c analysis.
(b) Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)
(c) Analysis performed at Accutest Laboratories, Dayton, NJ.
(d) Laboratory not DOD certified for method 8260c analysis. Elevated RL due to dilution required for matrix interference (foaming).

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: MC42178 **Client:** HS **Project:**

Date / Time Received: 10/14/2015 4:30:00 PM **Delivery Method:** **Airbill #'s:**

Cooler Temps (Initial/Adjusted): #1: (2.9/2.9); #2: (2.9/2.9);

Cooler Security	Y	N		Y	N
1. Custody Seals Present:	☑	☐	3. COC Present:	☑	☐
2. Custody Seals Intact:	☑	☐	4. Smpl Dates/Time OK	☑	☐

Cooler Temperature	Y or N	
1. Temp criteria achieved:	☑	☐
2. Thermometer ID:	G1; G1;	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	1	

Quality Control_Preservation	Y	N	N/A
1. Trip Blank present / cooler:	☑	☐	☐
2. Trip Blank listed on COC:	☑	☐	☐
3. Samples preserved properly:	☑	☐	
4. VOCs headspace free:	☑	☐	☐

Sample Integrity - Documentation	Y	N
1. Sample labels present on bottles:	☑	☐
2. Container labeling complete:	☑	☐
3. Sample container label / COC agree:	☑	☐

Sample Integrity - Condition	Y	N
1. Sample recvd within HT:	☑	☐
2. All containers accounted for:	☑	☐
3. Condition of sample:	Intact	

Sample Integrity - Instructions	Y	N	N/A
1. Analysis requested is clear:	☑	☐	
2. Bottles received for unspecified tests	☐	☑	
3. Sufficient volume recvd for analysis:	☑	☐	
4. Compositing instructions clear:	☐	☐	☑
5. Filtering instructions clear:	☐	☐	☑

60) toluene-d8 (s)	11.994	98	833917	47.46 ppb	0.00
Spiked Amount 50.000	Range 70 - 130		Recovery =	94.92%	
82) bromofluorobenzene (s)	14.874	95	366130	46.34 ppb	0.00
Spiked Amount 50.000	Range 70 - 130		Recovery =	92.68%	

Target Compounds

Compound	R.T.	QIon	Response	Conc Units		Qvalue
2) tertiary butyl alcohol	7.582	59	358475	507.03 ppb		88
5) dichlorodifluoromethane	4.362	85	489472	50.48 ppb		100
6) chloromethane	4.736	50	266015	50.28 ppb		97
7) vinyl chloride	4.983	62	400978	56.92 ppb		100
8) bromomethane	5.591	96	219899	53.99 ppb		98
9) chloroethane	5.750	64	204043	60.15 ppb		98
10) ethyl ether	6.513	59	212115	50.26 ppb		88
11) acetonitrile	7.367	41	417857	47.20 ppb	#	13
12) trichlorofluoromethane	6.177	101	582830	55.76 ppb		96
13) freon-113	6.898	101	328972	50.63 ppb		98
15) 1,1-dichloroethene	6.912	96	255549	51.19 ppb		94
16) acetone	6.941	58	34242	52.80 ppb	#	76
17) Methyl Acetate	6.946	43	121830	56.73 ppb	#	67
18) methylene chloride	7.533	84	301263	51.06 ppb		86
19) methyl tert butyl ether	7.840	73	873751	56.28 ppb		92
20) acrylonitrile	7.804	53	129924	56.09 ppb		91
21) allyl chloride	7.368	41	425580	46.82 ppb		70
22) trans-1,2-dichloroethene	7.881	96	245570	47.04 ppb		89
23) iodomethane	7.161	142	490804	50.36 ppb		92
24) carbon disulfide	7.295	76	748021m	40.57 ppb		
25) propionitrile	8.483	54	19229	48.33 ppb		100
26) vinyl acetate	8.310	43	508910m	69.54 ppb		
27) chloroprene	8.485	53	426887	49.00 ppb		95
28) di-isopropyl ether	8.348	45	965262	54.10 ppb		93
29) methacrylonitrile	9.226	41	186308	53.25 ppb		94
30) 2-butanone	8.985	72	35686	54.79 ppb	#	1
32) Hexane	8.177	41	238282	41.26 ppb	#	73
33) 1,1-dichloroethane	8.400	63	517966	50.47 ppb		98
34) tert-butyl ethyl ether	8.766	59	930886	52.42 ppb		91
35) isobutyl alcohol	8.766	43	100395	248.75 ppb	#	71
36) 2,2-dichloropropane	9.074	77	387343	46.39 ppb		98
37) cis-1,2-dichloroethene	9.039	96	320880	55.37 ppb		95
38) bromochloromethane	9.319	128	162113	57.81 ppb	#	74
39) chloroform	9.380	83	545830	53.28 ppb		98

Quant Title  : SW-846 Method 8260
QLast Update : Tue Oct 27 08:49:26 2015
Response via : Initial Calibration

       Compound                       R.T. QIon  Response  Conc Units Dev(Min)
 ------------------------------------------------------------------------------
 Internal Standards
   1) tert butyl alcohol-d9          7.537   65    282583   500.00 ppb      0.07
   4) pentafluorobenzene             9.493  168    464768    50.00 ppb      0.00
  43) 1,4-difluorobenzene           10.387  114    686082    50.00 ppb      0.00
  66) chlorobenzene-d5              13.595   82    359964    50.00 ppb      0.00
  80) 1,4-dichlorobenzene-d4        16.173  152    537442    50.00 ppb      0.00

 System Monitoring Compounds
  40) dibromofluoromethane (s)       9.559  113    305089    53.45 ppb     0.00
   Spiked Amount     50.000   Range  70 - 130     Recovery    =  106.90%
  60) toluene-d8 (s)                11.993   98    762101    47.31 ppb     0.00
   Spiked Amount     50.000   Range  70 - 130     Recovery    =   94.62%
  82) bromofluorobenzene (s)        14.873   95    380893    46.95 ppb     0.00
   Spiked Amount     50.000   Range  70 - 130     Recovery    =   93.90%

 Target Compounds                                                    Qvalue
   2) tertiary butyl alcohol         7.620   59     27847    66.38 ppb       55
   3) Ethanol                        6.363   45     12168   266.66 ppb       88
   5) dichlorodifluoromethane        4.357   85     59665     5.60 ppb       99
   6) chloromethane                  4.726   50     41166     5.04 ppb       99
   7) vinyl chloride                 4.975   62     40699     5.44 ppb       96
   8) bromomethane                   5.582   96     26108     5.30 ppb       93
   9) chloroethane                   5.740   64     20254     5.28 ppb       88
  10) ethyl ether                    6.510   59     23479     5.62 ppb       99
  11) acetonitrile                   7.365   41     48694     5.17 ppb  #    11
  12) trichlorofluoromethane         6.162  101     62433     5.55 ppb       93
  13) freon-113                      6.889  101     35600     5.44 ppb       99
  15) 1,1-dichloroethene             6.902   96     26687     5.21 ppb       96
  16) acetone                        6.920   58      2640     3.67 ppb  #     1
  17) Methyl Acetate                 6.960   43     14388     5.54 ppb  #    64
  18) methylene chloride             7.527   84     32316     5.18 ppb       90
  19) methyl tert butyl ether        7.834   73     83118     5.27 ppb       89
  20) acrylonitrile                  7.802   53     11164     4.63 ppb       79
  21) allyl chloride                 7.367   41     50519     5.23 ppb       76
  22) trans-1,2-dichloroethene       7.877   96     29079     5.31 ppb       91
  23) iodomethane                    7.151  142     52511     5.22 ppb       88
  24) carbon disulfide               7.288   76     99084m    5.08 ppb
  25) propionitrile                  8.478   54      1997m    4.53 ppb
  26) vinyl acetate                  8.310   43     44351m    5.89 ppb
  27) chloroprene                    8.482   53     47938     5.46 ppb       98
  28) di-isopropyl ether             8.344   45     98480     5.34 ppb       91
  29) methacrylonitrile              9.228   41     16920     4.90 ppb       97
  30) 2-butanone                     8.987   72      2805     4.14 ppb  #     1
  31) Ethyl Acetate                  8.174   43     26529     5.12 ppb  #     1
  32) Hexane                         8.176   41     31592     5.00 ppb  #    72
  33) 1,1-dichloroethane             8.397   63     58074     5.52 ppb       96
  34) tert-butyl ethyl ether         8.764   59     95167     5.37 ppb       93
  35) isobutyl alcohol               8.765   43     10976    25.50 ppb  #    65
  36) 2,2-dichloropropane            9.070   77     45191     5.18 ppb       96
  37) cis-1,2-dichloroethene         9.037   96     33611     5.62 ppb       91

Definitions,

Molar Volume	The volume of 1 mole of any gas at standard temperature and pressure(STP)
Water g/Moles	1 Liter of water is equal to 55.5g-moles
Temp-kelvin	Is defined as 273 + degress C
Corrected Gas Density	Gas density corrected for temperature is equal to (molar volume) x (temp-k/273)
Headspace conc(ug/l)	Is equal to (ppmv reading) x (mw/corrected gas density)
Water Concentration(ug/l)	Is equal to headspace conc(ug/l) x headspace vol/sample vol
Saturation Concentration(ug/l)	Gas which remains at equilibrium in the sample is equal to (headspace conc-ppm) x (mw) x (55.5)/(Henry's Constant)

Henry's Constants

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: MC42178 **Client:** **Project:**

Date / Time Received: 10/16/2015 10:00:00 AM **Delivery Method:** **Airbill #'s:**

Cooler Temps (Raw Measured) °C: Cooler 1: (2.7);

Cooler Temps (Corrected) °C: Cooler 1: (2.9);

Cooler Security	Y	N		Y	N
1. Custody Seals Present:	☑	☐	3. COC Present:	☑	☐
2. Custody Seals Intact:	☑	☐	4. Smpl Dates/Time OK	☑	☐

Cooler Temperature	Y or N
1. Temp criteria achieved:	☑ Y ☐ N
2. Cooler temp verification:	IR Gun
3. Cooler media:	Ice (Bag)
4. No. Coolers:	1

Quality Control Preservation	Y	N	N/A
1. Trip Blank present / cooler:	☐	☑	☐
2. Trip Blank listed on COC:	☐	☑	☐
3. Samples preserved properly:	☑	☐	
4. VOCs headspace free:	☐	☑	☐

Sample Integrity - Documentation	Y	N
1. Sample labels present on bottles:	☑	☐
2. Container labeling complete:	☑	☐
3. Sample container label / COC agree:	☑	☐

Sample Integrity - Condition	Y	N
1. Sample recvd within HT:	☑	☐
2. All containers accounted for:	☑	☐
3. Condition of sample:	Intact	

Sample Integrity - Instructions	Y	N	N/A
1. Analysis requested is clear:	☑	☐	
2. Bottles received for unspecified tests	☐	☑	
3. Sufficient volume recvd for analysis:	☑	☐	
4. Compositing instructions clear:	☐	☐	☑
5. Filtering instructions clear:	☐	☐	☑

ACCUTEST LABORATORIES

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: H&S Environmental **Job No** MC42202

Site: Fort Devens, AOC50, Devens, MA **Report Date** 11/18/2015 10:06:57 AM

11 Samples and 1 Trip Blank(s) were collected on 10/15/2015 and were received at Accutest on 10/15/2015 properly preserved, at 1.2 Deg. C and intact. These Samples received an Accutest job number of MC42202. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260C

Matrix: AQ **Batch ID:** MSU1365

- All samples were analyzed within the recommended method holding time.
- Sample(s) MC42202-11MS, MC42202-11MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- RPD(s) for MSD for Acetone are outside control limits for sample MC42202-11MSD. High RPD due to possible matrix interference and/or sample non-homogeneity.
- RPD of MC42202-11MSD for 1,2-Dibromo-3-chloropropane, Naphthalene, 1,2,3-Trichlorobenzene: Outside DoD control limits, but within in-house control limits.
- MC42202-1,2 for Toluene-D: Outside DoD control limits, but within in-house control limits.
- MC42202-1 through MC42202-12, MC42202-11MS/MSD: Laboratory not DOD certified for method 8260c analysis. Samples were analyzed at Accutest New England in order to meet method required Holding Times.

Volatiles by GC By Method VRSK 175

Matrix: AQ **Batch ID:** GBA1545

- Sample(s) MC42202-11MS, MC42202-11MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- MC42202-11MS/MSD Recovery(s) for Methane are outside control limits. Outside control limits due to high level in sample relative to spike amount.
- All samples were analyzed within the recommended method holding time.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25342

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11FMS, MC42202-11FMSD, MC42202-11FSDL were used as the QC samples for metals.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** N:GP93105

- Sulfate: Analysis performed at Accutest Laboratories, Dayton, NJ.

Wet Chemistry By Method EPA 353.2

Matrix: AQ	**Batch ID:** GP19725

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42204-3DUP, MC42204-3MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.

Matrix: AQ	**Batch ID:** GP19726

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.

Matrix: AQ	**Batch ID:** R37508

- MC42202-11 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37529

- MC42202-1 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37530

- MC42202-3 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37535

- MC42202-4 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37536

- MC42202-5 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37537

- MC42202-6 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	**Batch ID:** R37538

- MC42202-12 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Wet Chemistry By Method SM 21 4500 NO2 B

Matrix: AQ	**Batch ID:** GP19697

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Nitrogen, Nitrite.

Wet Chemistry By Method SM21 2320B

Matrix: AQ	**Batch ID:** GN52114

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42193-3DUP, MC42193-3MS were used as the QC samples for Alkalinity, Total as CaCO3.

Matrix: AQ	**Batch ID:** GN52117

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Alkalinity, Total as CaCO3.

Wet Chemistry By Method SM21 4500 S F

Matrix: AQ	**Batch ID:** GN52067

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Sulfide.

Wet Chemistry By Method SW846 9060

Matrix: AQ	**Batch ID:** GP19722

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11MS, MC42202-11MSD were used as the QC samples for Total Organic Carbon.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42202).

CASE NARRATIVE / CONFORMANCE SUMMARY

Client:	Accutest Labs of New England, Inc.	**Job No**	MC42202
Site:	HSMAW: Fort Devens, AOC50, Devens, MA	**Report Date**	10/27/2015 2:04:31 P

On 10/17/2015, 7 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a maximum corrected temperature of 3.2 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of MC42202 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** GP93105

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Sulfate.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: MC42202 **Client:** HS **Project:**

Date / Time Received: 10/15/2015 4:55:00 PM **Delivery Method:** **Airbill #'s:**

Cooler Temps (Initial/Adjusted): #1: (1.2/1.2); #2: (0.8/0.8); #1: (1.2/1.2); #2

Cooler Security

	Y	N
1. Custody Seals Present:	☑	☐
2. Custody Seals Intact:	☑	☐
3. COC Present:	☑	☐
4. Smpl Dates/Time OK	☑	☐

Cooler Temperature

	Y	N
1. Temp criteria achieved:	☑	☐
2. Thermometer ID:	G1; G1;	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	2	

Quality Control_Preservation

	Y	N	N/A
1. Trip Blank present / cooler:	☑	☐	☐
2. Trip Blank listed on COC:	☑	☐	☐
3. Samples preserved properly:	☑	☐	
4. VOCs headspace free:	☑	☐	☐

Sample Integrity - Documentation

	Y	N
1. Sample labels present on bottles:	☑	☐
2. Container labeling complete:	☑	☐
3. Sample container label / COC agree:	☑	☐

Sample Integrity - Condition

	Y	N
1. Sample recvd within HT:	☑	☐
2. All containers accounted for:	☑	☐
3. Condition of sample:	Intact	

Sample Integrity - Instructions

	Y	N	N/A
1. Analysis requested is clear:	☑	☐	
2. Bottles received for unspecified tests	☐	☑	
3. Sufficient volume recvd for analysis:	☑	☐	
4. Compositing instructions clear:	☐	☐	☑
5. Filtering instructions clear:	☐	☐	☑

LABORATORIES

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: H&S Environmental **Job No** MC42231

Site: Fort Devens, AOC50, Devens, MA **Report Date** 11/2/2015 6:30:10 PM

12 Sample(s) and 1 Trip Blank(s) were collected on 10/16/2015 and were received at Accutest on 10/16/2015 properly preserved, at 0.2 Deg. C and intact. These Samples received an Accutest job number of MC42231. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** F:VC4453

- Analysis performed at Accutest Laboratories, Orlando FL.

Matrix: AQ **Batch ID:** F:VC4454

- Analysis performed at Accutest Laboratories, Orlando FL.

Matrix: AQ **Batch ID:** F:VC4456

- Analysis performed at Accutest Laboratories, Orlando FL.

Volatiles by GC By Method VRSK 175

Matrix: AQ **Batch ID:** GBA1548

- All samples were analyzed within the recommended method holding time.
- Sample(s) MC42178-7DUP were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25317

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42039-1FMS, MC42039-1FMSD, MC42039-1FSDL were used as the QC samples for metals.
- RPD(s) for Serial Dilution for Arsenic, Iron are outside control limits for sample MP25317-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP25356

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42342-13FMS, MC42342-13FMSD, MC42342-13FSDL were used as the QC samples for metals.
- RPD(s) for Serial Dilution for Manganese are outside control limits for sample MP25356-SD1. Serial Dilution RPD acceptable due to low duplicate and sample concentrations.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ	Batch ID: N:GP93114

- Analysis performed at Accutest Laboratories, Dayton, NJ.

Wet Chemistry By Method EPA 353.2

Matrix: AQ	Batch ID: GP19744

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42231-6DUP, MC42231-6MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.
- Matrix Spike Recovery(s) for Nitrogen, Nitrate + Nitrite are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.Refer to spike blank.

Matrix: AQ	Batch ID: R37557

- MC42231-6 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	Batch ID: R37558

- MC42231-10 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ	Batch ID: R37571

- MC42231-13 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Wet Chemistry By Method SM 21 4500 NO2 B

Matrix: AQ	Batch ID: GP19703

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42220-1DUP, MC42220-1MS were used as the QC samples for Nitrogen, Nitrite.

Wet Chemistry By Method SM21 2320B

Matrix: AQ	Batch ID: GN52117

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Alkalinity, Total as CaCO3.

Wet Chemistry By Method SM21 4500 S F

Matrix: AQ	Batch ID: GN52067

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Sulfide.

Matrix: AQ	Batch ID: GN52076

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42263-2DUP, MC42263-2MS were used as the QC samples for Sulfide.

Wet Chemistry By Method SW846 9060

Matrix: AQ	**Batch ID:** GP19722

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11MS, MC42202-11MSD were used as the QC samples for Total Organic Carbon.

Matrix: AQ	**Batch ID:** GP19742

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42426-2MS, MC42426-2MSD were used as the QC samples for Total Organic Carbon.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42231).

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Accutest Labs of New England, Inc. **Job No** MC42231

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 10/27/2015 2:02:55 P

On 10/20/2015, 3 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a maximum corrected temperature of 4.7 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of MC42231 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** GP93114

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JC6498-10DUP, JC6498-10MS were used as the QC samples for Sulfate.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client:	Accutest Labs of New England, Inc.	**Job No:**	MC42231
Site:	HSMAW: Fort Devens, AOC50, Devens, MA	**Report Date**	11/2/2015 5:47:27 PM

12 Samples and 1 Trip Blank were collected on 10/16/2015 and were received at Accutest SE on 10/29/2015 properly preserved, at 3.2 Deg. C and intact. These Samples received an Accutest job number of MC42231. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** VC4453

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA28607-20MS, FA28607-20MSD were used as the QC samples indicated.

Matrix Spike / Matrix Spike Duplicate Recovery(s) for Hexachlorobutadiene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Sample(s) MC42231-3, MC42231-4, MC42231-5, MC42231-6, MC42231-7, MC42231-8, MC42231-9, MC42231-10, MC42231-11, MC42231-12, MC42231-13 have surrogates outside control limits. Probable cause is due to matrix interference.

MC42231-3 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-4 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-5 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-6 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-7 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-8 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-9 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-11 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-12 for Toluene-D8: Outside control limits due to matrix interference.

MC42231-13 for Toluene-D8: Outside control limits due to matrix interference.

Matrix: AQ **Batch ID:** VC4454

All samples were analyzed within the recommended method holding time.

Sample(s) MC42231-10MS, MC42231-10MSD were used as the QC samples indicated.

Sample(s) MC42231-13 has compound(s) reported with a “B” qualifier, indicating analyte is found in the associated method blank.

MC42231-8: Results from different vials are not consistent.

MC42231-8 for Trichloroethylene: Results from different vials are not consistent.

MC42231-10: Confirmation run.

Matrix: AQ **Batch ID:** VC4456

All method blanks for this batch meet method specific criteria.

Sample(s) D76470-3MS, D76470-3MSD were used as the QC samples indicated.

The following samples were run outside of holding time for method SW846 8260B: MC42231-8, MC42231-9, MC42231-10, MC42231-12. Samples re-analyzed beyond hold time; reported results are considered minimum values.

Matrix Spike / Matrix Spike Duplicate Recovery(s) for Tetrachloroethylene are outside control limits. Outside control limits due to high level in sample relative to spike amount.

Sample(s) MC42231-8, MC42231-9, MC42231-10, MC42231-12 have surrogates outside control limits.

MC42231-8 for Dibromofluoromethane: Outside control limits due to matrix interference.

MC42231-9 for Dibromofluoromethane: Outside control limits due to matrix interference.

MC42231-10 for Dibromofluoromethane: Outside control limits due to matrix interference.

MC42231-12 for Dibromofluoromethane: Outside control limits due to matrix interference.

Accutest Laboratories Southeast (ALSE) certifies that this report meets the project requirements for analytical data produced for the samples as received at ALSE and as stated on the COC. ALSE certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the ALSE Quality Manual except as noted above. This report is to be used in its entirety. ALSE is not responsible for any assumptions of data quality if partial data packages are used

Subject: AOC50 VOC/Metals MC42231
Importance: High

Hi Laurie,

We received a sample labeled as, "G6M-04-04X_FAL15" collected on 10/16/15 @ 10:55. Full suite of bottles (11) was received but, not listed on COC. Can you tell me if you need this added and if so, what analysis?

Please confirm

ACCUTEST LABORATORIES

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client:	H&S Environmental	**Job No**	MC42269
Site:	Fort Devens, AOC50, Devens, MA	**Report Date**	11/5/2015 9:23:31 AM

8 Sample(s), 1 Trip Blank(s) and 0 Field Blank(s) were collected on 10/19/2015 and were received at Accutest on 10/19/2015 properly preserved, at 1.8 Deg. C and intact. These Samples received an Accutest job number of MC42269. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** F:VC4458

- Analysis performed at Accutest Laboratories, Orlando FL.

Matrix: AQ **Batch ID:** F:VC4459

- Analysis performed at Accutest Laboratories, Orlando FL.

Volatiles by GC By Method VRSK 175

Matrix: AQ **Batch ID:** GBA1548

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42178-7DUP were used as the QC samples indicated.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25342

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11FMS, MC42202-11FMSD, MC42202-11FSDL were used as the QC samples for metals.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** N:GP93136

- Sulfate: Analysis performed at Accutest Laboratories, Dayton, NJ.

Wet Chemistry By Method EPA 353.2

Matrix: AQ **Batch ID:** GP19726

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.

Matrix: AQ **Batch ID:** GP19744

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42231-6DUP, MC42231-6MS were used as the QC samples for Nitrogen, Nitrate + Nitrite.
- Matrix Spike Recovery(s) for Nitrogen, Nitrate + Nitrite are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity. Refer to spike blank.

Matrix: AQ **Batch ID:** R37510

- MC42269-7 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Matrix: AQ **Batch ID:** R37559

- MC42269-8 for Nitrogen, Nitrate: Calculated as: (Nitrogen, Nitrate + Nitrite) - (Nitrogen, Nitrite)

Wet Chemistry By Method SM 21 4500 NO2 B

Matrix: AQ **Batch ID:** GP19712

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42271-1DUP, MC42271-1MS were used as the QC samples for Nitrogen, Nitrite.

Wet Chemistry By Method SM21 2320B

Matrix: AQ **Batch ID:** GN52117

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42202-11DUP, MC42202-11MS were used as the QC samples for Alkalinity, Total as CaCO3.

Matrix: AQ **Batch ID:** GN52186

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42342-13DUP, MC42342-13MS were used as the QC samples for Alkalinity, Total as CaCO3.

Wet Chemistry By Method SM21 4500 S F

Matrix: AQ **Batch ID:** GN52112

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42263-3DUP, MC42263-3MS were used as the QC samples for Sulfide.

Wet Chemistry By Method SW846 9060

Matrix: AQ	**Batch ID:** GP19742

- All samples were distilled within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42426-2MS, MC42426-2MSD were used as the QC samples for Total Organic Carbon.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42269).

CASE NARRATIVE / CONFORMANCE SUMMARY

Client: Accutest Labs of New England, Inc. **Job No** MC42269

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 11/2/2015 11:41:11 A

On 10/21/2015, 2 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a maximum corrected temperature of 3.6 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of MC42269 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

Wet Chemistry By Method EPA 300/SW846 9056A

Matrix: AQ **Batch ID:** GP93136

- All samples were prepared within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JC6576-1DUP, JC6576-1MS were used as the QC samples for Sulfate.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: Accutest Labs of New England, Inc. **Job No:** MC42269

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 11/4/2015 4:19:54 PM

8 Samples and 1 Trip Blank were collected on 10/19/2015 and were received at Accutest SE on 10/30/2015 properly preserved, at 2.6 Deg. C and intact. These Samples received an Accutest job number of MC42269. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** VC4458

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) D76470-3MS, D76470-3MSD were used as the QC samples indicated.

Matrix: AQ **Batch ID:** VC4459

All method blanks for this batch meet method specific criteria.

Sample(s) D76470-1MS, D76470-1MSD were used as the QC samples indicated.

The following samples were run outside of holding time for method SW846 8260B: MC42269-6, MC42269-7. Samples re-analyzed beyond hold time; reported results are considered minimum values.

Sample(s) MC42269-6 has surrogates outside control limits. Probable cause is due to matrix interference.

MC42269-6 for Dibromofluoromethane: Outside control limits due to matrix interference.

Accutest Laboratories Southeast (ALSE) certifies that this report meets the project requirements for analytical data produced for the samples as received at ALSE and as stated on the COC. ALSE certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the ALSE Quality Manual except as noted above. This report is to be used in its entirety. ALSE is not responsible for any assumptions of data quality if partial data packages are used

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: MC42269 **Client:** H&S ENVIRONMENTAL **Project:** DEVENS

Date / Time Received: 10/19/2015 5:11:00 PM **Delivery Method:** **Airbill #'s:**

Cooler Temps (Initial/Adjusted): #1: (1.8/1.8);

Cooler Security	Y	N		Y	N
1. Custody Seals Present:	☑	☐	3. COC Present:	☑	☐
2. Custody Seals Intact:	☑	☐	4. Smpl Dates/Time OK	☑	☐

Cooler Temperature	Y	N
1. Temp criteria achieved:	☑	☐
2. Thermometer ID:	G1;	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	1	

Quality Control_Preservation	Y	N	N/A
1. Trip Blank present / cooler:	☑	☐	☐
2. Trip Blank listed on COC:	☑	☐	☐
3. Samples preserved properly:	☑	☐	
4. VOCs headspace free:	☑	☐	☐

Sample Integrity - Documentation	Y	N
1. Sample labels present on bottles:	☑	☐
2. Container labeling complete:	☑	☐
3. Sample container label / COC agree:	☑	☐

Sample Integrity - Condition	Y	N
1. Sample recvd within HT:	☑	☐
2. All containers accounted for:	☑	☐
3. Condition of sample:	Intact	

Sample Integrity - Instructions	Y	N	N/A
1. Analysis requested is clear:	☑	☐	
2. Bottles received for unspecified tests	☐	☑	
3. Sufficient volume recvd for analysis:	☑	☐	
4. Compositing instructions clear:	☐	☐	☑
5. Filtering instructions clear:	☐	☐	☑

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: H&S Environmental **Job No** MC42415

Site: Fort Devens, AOC50, Devens, MA **Report Date** 11/6/2015 4:51:41 PM

1 Sample(s), 1 Trip Blank(s) were collected on 10/23/2015 and were received at Accutest on 10/23/2015 properly preserved, at 4.8 Deg. C and intact. These Samples received an Accutest job number of MC42415. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** F:VB4414

- Analysis performed at Accutest Laboratories, Orlando FL.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25399

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42541-1FMS, MC42541-1FMSD, MC42541-1FSDL were used as the QC samples for metals.
- RPD(s) for Serial Dilution for Arsenic are outside control limits for sample MP25399-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42415).

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: Accutest Labs of New England, Inc. **Job No:** MC42415

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 11/6/2015 2:09:39 PM

1 Sample and 1 Trip Blank were collected on 10/23/2015 and were received at Accutest SE on 10/30/2015 properly preserved, at 3.2 Deg. C and intact. These Samples received an Accutest job number of MC42415. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** VB4414

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA28705-1MS, FA28705-1MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for Chloroethane are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for 1,1-Dichloroethane, 1,3-Dichloropropane, 4-Methyl-2-pentanone (MIBK), Chloroethane, Methyl Tert Butyl Ether, trans-1,2-Dichloroethylene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

RPD(s) for MSD for 1,1,1-Trichloroethane, 1,1,2,2-Tetrachloroethane, 1,1-Dichloroethane, 1,1-Dichloroethylene, 1,2-Dichloroethane, 1,2-Dichloropropane, 1,3-Dichlorobenzene, Benzene, Bromobenzene, Bromochloromethane, Isopropylbenzene, Methyl Iodide, Methyl Tert Butyl Ether, Methylene Bromide, Methylene Chloride, n-Propylbenzene, trans-1,2-Dichloroethylene, Vinyl Acetate are outside control limits for sample FA28705-1MSD. Probable cause is due to sample non-homogeneity.

MC42415-1 for Chloroethane: Associated CCV outside control limits.

MC42415-2 for Chloroethane: Associated CCV outside control limits.

Accutest Laboratories Southeast (ALSE) certifies that this report meets the project requirements for analytical data produced for the samples as received at ALSE and as stated on the COC. ALSE certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the ALSE Quality Manual except as noted above. This report is to be used in its entirety. ALSE is not responsible for any assumptions of data quality if partial data packages are used

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: H&S Environmental **Job No** MC42449

Site: Fort Devens, AOC50, Devens, MA **Report Date** 11/10/2015 9:04:17 AM

1 Sample(s) and 1 Trip Blank(s) were collected on 10/26/2015 and were received at Accutest on 10/26/2015 properly preserved, at 1.2 Deg. C and intact. These Samples received an Accutest job number of MC42449. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** F:VB4415

- Analysis performed at Accutest Laboratories, Orlando FL.

Metals By Method SW846 6010C

Matrix: AQ **Batch ID:** MP25386

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) MC42505-1FMS, MC42505-1FMSD, MC42505-1FSDL were used as the QC samples for metals.
- MP25386-S1 for Manganese: Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.

The Accutest Laboratories of New England certifies that all analysis were performed within method specification. It is further recommended that this report to be used in its entirety.The Accutest Laboratories of NE, Laboratory Director or assignee as verified by the signature on the cover page has authorized the release of this report(MC42449).

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: Accutest Labs of New England, Inc. **Job No:** MC42449

Site: HSMAW: Fort Devens, AOC50, Devens, MA **Report Date** 11/9/2015 6:47:48 PM

1 Sample and 1 Trip Blank were collected on 10/26/2015 and were received at Accutest SE on 11/05/2015 properly preserved, at 3.4 Deg. C and intact. These Samples received an Accutest job number of MC42449. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

Volatiles by GCMS By Method SW846 8260B

Matrix: AQ **Batch ID:** VB4415

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) MC42617-1MS, MC42617-1MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for 2-Hexanone, 4-Methyl-2-pentanone (MIBK), Naphthalene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for 1,2-Dibromo-3-chloropropane, 4-Methyl-2-pentanone (MIBK), Methyl Tert Butyl Ether, Naphthalene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

MC42449-1 for Carbon Disulfide: Associated ICV outside control limits.

MC42449-1 for Chloroethane: Associated CCV outside control limits.

MC42449-1 for Methyl Bromide: Associated CCV outside control limits.

MC42449-1 for Methyl Iodide: Associated ICV outside control limits.

MC42449-1 for Trichlorofluoromethane: Associated CCV outside control limits.

MC42449-2 for Carbon Disulfide: Associated ICV outside control limits.

MC42449-2 for Chloroethane: Associated CCV outside control limits.

MC42449-2 for Methyl Bromide: Associated CCV outside control limits.

MC42449-2 for Methyl Iodide: Associated ICV outside control limits.

MC42449-2 for Trichlorofluoromethane: Associated CCV outside control limits.

Accutest Laboratories Southeast (ALSE) certifies that this report meets the project requirements for analytical data produced for the samples as received at ALSE and as stated on the COC. ALSE certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the ALSE Quality Manual except as noted above. This report is to be used in its entirety. ALSE is not responsible for any assumptions of data quality if partial data packages are used

Data Quality Evaluation Report

Spring 2015 Long-Term Monitoring Event

Data Quality Evaluation
for
Former Fort Devens Area of Contamination 50
Long Term Monitoring Groundwater Samples
Collected June 2015

Introduction

The H&S Environmental team collected a total of 20 aqueous field samples from Area of Contamination (AOC)50, Devens, Massachusetts, from June 16 through 26, 2015. The samples were analyzed at Accutest – New England in Marlborough, Massachusetts for the following site-specific parameter lists:

AOC 50:

- VOCs by SW-846 Method 8260C;
- Dissolved gases (methane, ethane and ethene) by Method RSK-175;
- Dissolved metals (arsenic, iron and manganese) by SW-846 Method 6010C;
- Total alkalinity by SM 2320B;
- Sulfate by EPA Method 300.0;
- Nitrogen, Nitrite/Nitrate by EPA Method 353.2;
- Sulfide by SM4500S F; and
- Total organic carbon (TOC) by SM5310B.

A complete set of analytical results for each AOC, including final data qualifiers, are included as separate tables within this Appendix. Summary tables presenting AOC specific contaminants of concern are included and referenced within each AOC discussion section.

The results were evaluated for acceptability in accordance with the laboratory's defined acceptance limits and the criteria presented in the *Generic Quality Assurance Project Plan (QAPP), Annual Long- Term Monitoring and Maintenance Program, Former Fort Devens Army Installation, Devens, Massachusetts* (H&S, 2015) . The data qualification was performed in accordance with the QAPP requirements and the applicable protocols presented in the *Region 1, EPA-New England Data Validation Functional Guidelines for Evaluating Environmental Analyses* (EPA Region 1, 1996) and *EPA-New England Environmental Data Review Program Guidance* (EPA Region 1, 2013)

Sample Shipment and Receipt

All samples were delivered directly to the laboratory each day during sampling events. All samples arrived at the laboratory with temperatures at or below 6 °C, and the laboratory noted that all sample coolers were packed with sufficient quantities of ice in the field. All samples were appropriately preserved in accordance with the requirements presented in Table 1.

Holding Times

All samples were extracted and analyzed in accordance with the methods and holding time requirements presented in Table 1.

Trip Blanks

Trip blanks are provided by the laboratory to evaluate potential cross contamination during sample storage and shipment. Trip blanks were not submitted for analysis with any of these samples since samples were delivered directly to the laboratory from the field.

Equipment Blanks

Equipment blanks, also known as rinsate blanks, are samples of analyte-free water that are pumped through reusable sampling equipment to confirm decontamination efficacy. Equipment blanks were not collected during the spring sampling round.

Volatile Organic Compound Analysis

Twenty (20) groundwater samples were collected and submitted for VOC analysis by EPA SW-846 Method 8260C from AOC50. Two (2) field duplicate samples were also collected; DUP-1-061915, a duplicate of sample G6M-04-10A; and DUP-2-062115, a duplicate of sample G6M-13-04X.

Laboratory Method Blank Results: All method blanks analyzed with these samples were free of contamination.

Field Duplicate Sample Results: The FD results for FD sample pairs DUP-1-061915/G6M-04-10A and DUP-2-062115/G6M-13-04X showed acceptable precision for all calculated relative percent difference (RPD) or acceptable absolute differences for all low-level results.

Surrogate Results: All surrogate recoveries were within the project acceptance limits from all samples for target VOCs.

Matrix Spike (MS)/MS Duplicate (MSD) Results: Two sets of MS/MSD samples were analyzed for VOCs with these samples. The recovery and precision criteria were met for all MS/MSD analyses

LCS/LCSD Results: LCS/LCSD pairs analyzed with these samples met the project recovery and RPD control limits.

Summary: All VOC results reported for the AOC50 Spring 2015 sampling event were acceptable as reported and may be used for their intended purpose.

Dissolved Gases Analysis

Thirteen (13) groundwater samples were analyzed for dissolved gases (methane, ethane, and ethene) using Method RSK-175 from AOC50. Two (2) field duplicate samples were also collected; DUP-1-061915, a duplicate of sample G6M-04-10A; and DUP-2-062115, a duplicate of sample G6M-13-04X.

Laboratory Method Blank Results: The method blanks analyzed with these samples and reported for methane, ethane and ethane were free of contamination.

Field Duplicate Sample Results: The methane, ethane, and ethene results for field duplicate sample pairs DUP-1-061915/G6M-04-10A and DUP-2-062115/G6M-13-04X presented acceptable precision for all detected compounds.

Matrix Spike/Matrix Spike Duplicate (MS/MSD) Results: One set of MS/MSD samples was analyzed for methane, ethane, and ethene. Since the methane concentration in sample G6M-13-04X was greater than four times that of the spike, the resulting recoveries were not applicable, and no qualification was required. The %Rs and calculated RPDs for ethane and ethane were acceptable.

Laboratory Control Sample (LCS) Results: LCSs analyzed for methane, ethane, and ethane with these samples met project recovery acceptance criteria.

Dilutions: The methane concentrations for all samples were outside the laboratory calibration range and required dilutions. The laboratory reported the diluted results for methane and the undiluted results for ethane and ethene.

Summary: The dissolved gases results reported for the AOC50 Spring 2015 sampling event were acceptable as reported and may be used for their intended purpose.

Total and Dissolved Metals Analysis

Nineteen (19) groundwater samples from AOC50 were analyzed for dissolved metals (arsenic, iron and Manganese) using EPA SW-846 Methods 6010C. Two (4) sets of field duplicate samples were also collected: DUP-1-061915, a duplicate of sample G6M-04-10A; and DUP-2-062115, a duplicate of sample G6M-13-04X.

Laboratory Method Blank Results: The method blanks analyzed with these samples for total and dissolved metals were free from contamination.

Field Duplicate Sample Results: The target metals results for FD sample pairs from AOC50, G6M-04-10A/DUP-1-061915, showed acceptable precision for all calculated RPDs or acceptable absolute differences for all low-level results.

The target metals results for FD sample pairs from AOC50, G6M-13-04X/DUP-2-062115, showed acceptable precision for all calculated RPDs or acceptable absolute differences for all low-level results with the exception of manganese. Manganese results in the parent and FD sample were qualified as estimated detections (J).

MS/MSD Results: The %Rs and RPD results for the MS/MSD samples analyzed for dissolved metals with these samples were within the project acceptance limits for target analytes that were less than four times the spike levels. The %R result for manganese from the spiked sample G6M-13-04X were above control limits; the sample result for manganese was greater than four times the spike level and could not be calculated.

Laboratory Control Sample (LCS) Results: The LCSs analyzed for target metals analytes with these samples met project recovery acceptance criteria.

Dilutions: Due to elevated concentrations of a few analytes, several samples required dilutions to accurately report metals concentrations. Only the diluted results for these analytes were reported by the laboratory.

Summary: The dissolved metals results reported for the AOC50 Spring 2015 sampling events were acceptable with the qualification for manganese in the FD samples, G6M-13-04X/DUP-2-062115. The results may be used for their intended purpose.

Wet Chemistry Analysis

Fourteen (14) groundwater samples were collected from AOC50 and submitted for total alkalinity, sulfate, nitrogen/nitrate, sulfide and TOC analyses. Two field duplicate sample pairs were also collected: DUP-1-061915, a duplicate of sample G6M-04-10A; and DUP-2-062115, a duplicate of sample G6M-13-04X.

Laboratory Method Blank Results: The method blanks analyzed for all designated wet chemistry parameters were free of contamination with the exception of nitrogen-nitrate/nitrite. Low levels of nitrate/nitrite were reported in all method blanks analyzed by method E352.2. Associated sample results less than five times respective blank levels were qualified as non-detect (ND).

Field Duplicate Sample Results: The wet chemistry parameter results for FD sample pair from AOC50, G6M-04-10A/DUP-1-061915, showed acceptable precision for all calculated RPDs or acceptable absolute differences for all low-level results.

The wet chemistry parameter results for FD sample pair from AOC50, G6M-13-04X/DUP-2-062115, showed acceptable precision for all calculated RPDs with the exception of sulfate. The calculated RPD between the FD results for sulfate was above control limits. Sulfate results in the parent and FD sample were qualified as estimated detections (J).

Laboratory Control Sample (LCS) Results: The LCSs analyzed for the wet chemistry parameters with these samples met project recovery acceptance criteria.

MS/MSD Results: The %Rs and/or RPDs for the MS/MSD samples analyzed for these wet chemistry parameters met the project acceptance criteria for all parameters.

Dilutions: Due to elevated concentrations of a few parameters, several samples required dilutions. Only the diluted results for these analytes were reported by the laboratory.

Summary: The wet chemistry parameter results reported for the AOC 50 Spring 2015 sampling events were acceptable after qualification for nitrogen/nitrate method blank contamination. Qualifications were also required for sulfate in the FD sample pair from AOC50, G6M-13-04X/DUP-2-062115. Sulfate results from these samples were qualified as estimated detections (J). The wet chemistry parameter results with the noted qualifications may be used for their intended purpose.

Conclusion

Data packages were reviewed for adherence to acceptable laboratory practices. Based on the elements evaluated (including holding times, blank sample results, surrogate recoveries, duplicate samples, MS/MSD recoveries and precision, and LCS/LCSD recoveries and precision), all data may be reported and used without qualification, except as summarized below.

VOCs Analysis

- All VOC results reported for the AOC50 Spring 2015 sampling event were acceptable as reported and may be used for their intended purpose.

Dissolved Gases Analysis

- The dissolved gases results reported for the AOC50 Spring 2015 sampling event were acceptable as reported and may be used for their intended purpose.

Dissolved Metals Analysis

- Due to unacceptable precision in FD sample pairs, the manganese results in AOC50 samples G6M-13-04X and DUP-2-062115 were qualified as estimated (J).

Wet Chemistry Analysis

- Due to unacceptable precision in FD sample pairs, the sulfate results in AOC50 samples G6M-13-04X and DUP-2-062115 were qualified as estimated (J).

TABLE 1
Sample Preparation and Analysis Methods, Containers, Holding Times, and Preservatives

Parameter	Analytical Method	Sample Container	Preservation	Holding Time
Aqueous Samples				
VOCs	SW8260C	3 x 40-mL VOA vials	4 °C, HCl to pH <2	Preserved: 14 Days
Dissolved Gases (methane, ethane , ethene)	RSK175	2 x 40-mL VOA vials	4 °C, HCl to pH <2	Preserved: 14 Days
Anions (sulfate)	E300.0/SW9056	1 x 250-mL HDPE	4°C ± 2°C	28 days for Sulfate and Chloride
Nitrate/nitrite	EPA353.2	1 x 500-mL HDPE	4°C, H_2SO_4 to pH <2	28 days
Total Alkalinity	SW2320B	1 x 250-mL HDPE	4°C ± 2°C	14 Days
Sulfide	SM4500D S	1 x 250-mL HDPE	4°C, Zinc acetate + NaOH to pH>9	7 days
TOC	SM5310B	1 x 250-mL HDPE	4°C, H_3PO_4 to pH <2	28 days

H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1054-003

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-13-06X-61615	MC39371-3	6/16/2015	RSK 175	Ground Water
G6M-02-08X-61615	MC39371-5	6/16/2015	RSK 175	Ground Water

Summary - Data validation was performed on the data for two (2) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/16/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – One LCS/LCSD pair was associated with all samples in this SDG. The LCS/LCSD for met all %R and RPD control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

G6M-02-08X-61615	MC39371-5	6/16/2015	Miscellaneous Parameters	Ground Water

<u>Summary</u> - Data validation was performed on the data for two (2) groundwater samples submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method E300. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples have been reported in this SDG but are not included in this data review report.

<u>Narrative and Completeness Review</u> – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

<u>Sample Delivery and Condition</u> – All samples arrived intact at the laboratory on 6/16/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

<u>Holding Times</u> – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

<u>Method Blank</u> –The method blanks for the following alkalinity, nitrogen/nitrite, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrate/nitrite by method E352.2 at 0.029 mg/L. Sample results were greater than five time this level; no qualifications are required.

Qualification: None required.

<u>Laboratory Control Sample</u> – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this samples set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table:

Methane, Ethane, Ethene
RSK 175
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39401
Laboratory: Accutest New England	Date: 08/31/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-02-01X-61715	MC39401-4	6/17/2015	RSK175	Ground Water
G6M-04-05X-61715	MC39401-6	6/17/2015	RSK175	Ground Water

Summary - Data validation was performed on the data for two (2) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/17/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – The LCS samples reported in this SDG were within the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Laboratory Duplicate – Sample G6M-04-05X-61715 (Lab Sample ID: MC39401-6) was analyzed as a laboratory duplicate sample. The RPD for methane was 40%. This high RPD is likely due to sample matrix effects or non-homogeneity.

Qualification: The result for methane in sample G6M-04-05X-61715 has been qualified as estimated (J).

Compound Quantitation – The results for methane in sample G6M-02-01X-61715 (Lab Sample ID: MC39401-4) were reported from a re-analysis at a 20X dilution. The ethane and ethane results were reported from the undiluted analysis. Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table

Client Sample ID:	Lab Sample ID:	Analysis	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-02-01X-61715	MC39401-4	RSK175	No qualifications needed.			
G6M-04-05X-61715	MC39401-6	Methane	22.4		22.4	J
G6M-04-05X-61715	MC39401-6	Ethane/ethene	No qualifications needed.			

Volatile Organic Compounds
SW-846 Method 8260C
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39401
Laboratory: Accutest New England	Date: 08/31/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-04-09X-61715	MC39401-2	6/17/2015	VOCs	Ground Water
G6M-02-01X-61715	MC39401-4	6/17/2015	VOCs	Ground Water
G6M-04-05X-61715	MC39401-6	6/17/2015	VOCs	Ground Water

Summary - Data validation was performed on the data for three (3) groundwater samples submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/17/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – The %R for acetone in an LCS (MSV1461-BS) analyzed 6/29/15 with analytical batch MSV1461 was above control limits at 173%. The %Rs for acetone in LCS/LCSDs analyzed with analytical batch MSV1463 were acceptable. The results for acetone in all samples were non-detect; qualification was not necessary.

Qualification: None required.

MS/MSD – Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Blanks – A trip blank was not submitted with these samples.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-04-09X-61715	MC39401-2	6/17/2015	TOC only	Ground Water
G6M-02-01X-61715	MC39401-4	6/17/2015	Miscellaneous Parameters	Ground Water
G6M-04-05X-61715	MC39401-6	6/17/2015	Miscellaneous Parameters	Ground Water

Summary - Data validation was performed on the data for three (3) groundwater samples submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method E300. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples have been reported in this SDG but are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 6/17/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for the following alkalinity, nitrogen/nitrite, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrogen-nitrate/nitrite by method E352.2 at 0.029 mg/L. The result for nitrogen-nitrate/nitrite in sample G6M-02-01X-61715 (Lab Sample ID: MC39401-4) was below the 5 times action level and has been qualified as non-detect (0.10 U).

Qualification: The result for nitrogen-nitrate/nitrite in sample G6M-02-01X-61715 (Lab Sample ID: MC39401-4) was below the 5 times action level and has been qualified as non-detect (0.10 U)..

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this samples set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

G6M-97-05B-61915	MC39479-4	6/19/2015	RSK175	Ground Water
DUP-1-061915	MC39479-6	6/19/2015	RSK175	Ground Water

Summary - Data validation was performed on the data for three (3) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/19/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – One LCS/LCSD pair was associated with all samples in this SDG. The LCS/LCSD for met all %R and RPD control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Samples G6M-04-10A-61915 (Lab Sample ID: MC39479-2) and DUP-1-061915 (Lab Sample ID: MC39479-6) were field duplicate samples submitted with this sample set. The calculated RPD for methane was 7.2%.

Qualification: None required.

Compound Quantitation – The results for methane in the FD samples G6M-04-10A-61915 (Lab Sample ID: MC39479-2) and DUP-1-061915 (Lab Sample ID: MC39435-5) were reported from a re-analysis at a 10X dilution. The ethane and ethane results were non-detect in both samples reported from the undiluted analysis.

Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table

Client Sample ID:	Lab Sample ID:	Analysis	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-04-10A-61915	MC39479-2	RSK175	No qualification needed.			
G6M-97-05B-61915	MC39479-4	RSK175	No qualification needed.			
DUP-1-061915	MC39479-6	RSK175	No qualification needed.			

Volatile Organic Compounds
SW-846 Method 8260C
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39479

DUP-1-061915	MC39479-6	6/19/2015	VOCs	Ground Water

Summary - Data validation was performed on the data for two (2) groundwater samples and one field duplicate sample submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an “H” suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/19/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – Two LCS/LCSD pairs were associated with the samples in this SDG. The RPD for dichlorodiflurormethane in analytical batch MSV1465 was above control limits at 44%; the %Rs were within control limits. The results for dichlorodiflurormethane were non-detect in associated samples. The LCS/LCSD with analytical batch MSV1463 met all %R and RPD control limits established in the QAPP.

Qualification: None required.

MS/MSD – Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Samples G6M-04-10A-61915 (Lab Sample ID: MC39479-2) and DUP-1-061915 (Lab Sample ID: MC39479-6) were field duplicate samples submitted with this sample set. The calculated RPDs between detected analytes were less than 20%.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table

Dissolved Metals
SW 846/6010C/6020A/7470A
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39479
Laboratory: Accutest New England	Date: 09/01/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-04-10A-61915	MC39479-2F	6/19/2015	Dissolved Metals	Groundwater Filtered
G6M-97-05B-61915	MC39479-4F	6/19/2015	Dissolved Metals	Groundwater Filtered
DUP-1-061915	MC39479-6F	6/19/2015	Dissolved Metals	Groundwater Filtered

Summary - Data validation was performed on the data for three (3) groundwater samples collected and submitted for dissolved metals analyses by Methods SW846/6010C for target analyte metals, 6020A for arsenic only and 7470A for mercury. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples were reported in this SDG but are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/19/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – MS/MSD samples were not submitted with this sample set. The %Rs and RPD for batch MS/MSD samples reported with thie SDG were acceptable.

Qualification: None required.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Samples G6M-04-10A-61915 (Lab Sample ID: MC39479-2) and DUP-1-061915 (Lab Sample ID: MC39479-6) were field duplicate samples submitted with this sample set. The calculated RPDs between detected analytes were less than 10%, with the exception of cadmium. The RPD between the low level detections of cadmium was 41%. These results are estimated results; no qualifications are needed. .

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table

DUP-1-061915	MC39479-6	6/19/2015	Miscellaneous Parameters	Ground Water

Summary - Data validation was performed on the data for three (3) groundwater samples submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method E300. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples have been reported in this SDG but are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 6/19/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for the following alkalinity, nitrogen/nitrite, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrogen-nitrate/nitrite by method E352.2 at 0.037 mg/L..

Qualification: The results for nitrogen-nitrate/nitrite in samples G6M-04-10A-61915 and DUP-1-061915 (Lab Sample IDs: MC39479-2 and 6) were below the 5 times action level and have been qualified as non-detect at the reported value.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Samples G6M-04-10A-61915 (Lab Sample ID: MC39479-2) and DUP-1-061915 (Lab Sample ID: MC39479-6) were field duplicate samples submitted with this sample set. The calculated RPDs between detected analytes were less than 15%.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table:

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-13-04X-62215	MC39533-3	6/22/2015	RSK175	Ground Water
DUP-2-062215	MC39533-4	6/22/2015	RSK175	Ground Water

Summary - Data validation was performed on the data for one (1) groundwater sample and one field duplicate sample submitted for Methane, Ethane, Ethene analyses by Method RSK 175. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/22/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – The LCS analyzed with this SDG met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-13-04X-62215 (Lab sample ID: MC39533-3) was spiked and analyzed as Matrix Spike (MS) and Matrix Spike Duplicate (MSD) samples. The percent recovery (%R) for methane was below control limits (48%) from the MSD sample. The %R from the MS sample was acceptable. The sample result for methane in this sample was greater than four times the MS spike level. Qualifications are not needed.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Samples G6M-13-04X-62215 (Lab Sample ID: MC39533-3) and DUP-2-062215 (Lab Sample ID: MC39533-4) were field duplicate samples submitted with this sample set. The calculated RPD for methane was 22%.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Wet Chemistry

Alkalinity (SM2320B), Nitrate/Nitrite (E353.2), Nitrogen/Nitrite (SM4500 NO2), Sulfate (E300.0), Sulfide (SM4500 S F) and Total Organic Carbon (TOC) (SW9060)

USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39533
Laboratory: Accutest New England	Date: 09/02/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-13-04X-62215	MC39533-3	6/22/2015	Miscellaneous Parameters	Ground Water
DUP-2-062215	MC39533-4	6/22/2015	Miscellaneous Parameters	Ground Water

<u>Summary</u> - Data validation was performed on the data for one (1) groundwater sample and one field duplicate sample submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method E300. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples have been reported in this SDG but are not included in this data review report.

<u>Narrative and Completeness Review</u> – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

<u>Sample Delivery and Condition</u> – All samples arrived intact at the laboratory on 6/22/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

<u>Holding Times</u> – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

<u>Method Blank</u> –The method blanks for the following alkalinity, nitrogen/nitrite, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrogen-nitrate/nitrite by method E352.2 at 0.026 mg/L..

Qualification: The estimated results for nitrogen-nitrate/nitrite in samples G6M-13-04X-62215 and DUP-2-062215 (Lab Sample IDs: MC39533-3 and 4) were below the 5 times action level and have been qualified as non-detect at the reporting limit.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Samples G6M-13-04X-62215 (Lab Sample ID: MC39533-3) and DUP-2-062215 (Lab Sample ID: MC39533-4) were field duplicate samples submitted with this sample set. The calculated RPDs for alkalinity and TOC were less than 15%. The calculated RPD for sulfate was 114%. This variation is likely due to sample non-homogeneity.

Qualification: The results for sulfate in both samples have been qualified as estimated (J).

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table:

Methane, Ethane, Ethene
RSK 175
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39548
Laboratory: Accutest New England	Date: 09/02/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-02-13X-62315	MC39548-2	6/23/2015	RSK175	Ground Water
MW-3-062315	MC39548-4	6/23/2015	RSK175	Ground Water

Summary - Data validation was performed on the data for two (2) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. These samples are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/23/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – The LCS analyzed with this SDG met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix Spike (MS) and Matrix Spike Duplicate (MSD) samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Compound Quantitation – The results for methane in both samples were reported from re-analyses at a 10X dilution. The ethane and ethane results were reported from the undiluted analyses. Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table

Client Sample ID:	Lab Sample ID:	Analysis	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-02-13X-62315	MC39548-2	RSK175	No qualification needed.

MW-3-062315	MC39548-4F	6/23/2015	Dissolved Metals	Groundwater Filtered

Summary - Data validation was performed on the data for two (2) groundwater samples collected and submitted for dissolved metals analyses by Methods SW846/6010C for target analyte metals, 6020A for arsenic only and 7470A for mercury. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples were reported in this SDG but are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 06/23/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix Spike (MS) and Matrix Spike Duplicate (MSD) samples were not submitted with this sample set.

Qualification: None required. Laboratory qualifiers have been removed.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table

Client Sample ID:	Lab Sample ID:	Analysis	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-02-13X-62315	MC39548-2F	Dissolved Metals	No qualification needed.

Wet Chemistry

Alkalinity (SM2320B), Nitrate/Nitrite (E353.2), Nitrogen/Nitrite (SM4500 NO2), Sulfate (E300.0), Sulfide (SM4500 S F) and Total Organic Carbon (TOC) (SW9060)

USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC39548
Laboratory: Accutest New England	Date: 09/02/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID:	Lab Sample ID:	Date Sampled:	Analysis	Matrix:
G6M-02-13X-62315	MC39548-2	6/23/2015	Miscellaneous Parameters	Ground Water
MW-3-062315	MC39548-4	6/23/2015	Miscellaneous Parameters	Ground Water

Summary - Data validation was performed on the data for two (2) groundwater samples submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method E300. Groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID. The "H" samples have been reported in this SDG but are not included in this data review report.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 6/23/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for the following alkalinity, nitrogen/nitrite, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrogen-nitrate/nitrite by method E352.2 at 0.026 mg/L..

Qualification: The estimated results for nitrogen-nitrate/nitrite in samples G6M-04-13X-62315 and MW-3-062315 (Lab Sample IDs: MC39548-2 and 4) were below the 5 times action level and have been qualified as non-detect at the reporting limit.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: The results for sulfate in both samples have been qualified as estimated (J).

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Data Quality Evaluation Report
Fall 2015 Long-Term Monitoring Event

Data Quality Evaluation for
Former Fort Devens Area of Contamination 50
Long Term Monitoring Groundwater Samples
Collected Fall 2015

Introduction

The H&S Environmental team collected a total of 47 aqueous field samples from Area of Contamination (AOC)50, Devens, Massachusetts, from October 13 through 26, 2015. The samples were analyzed at Accutest – New England in Marlborough, Massachusetts for the following site-specific parameter lists:

AOC 50:

- VOCs by SW-846 Method 8260C;
- Dissolved gases (methane, ethane and ethene) by Method RSK-175;
- Dissolved metals (arsenic, iron and manganese) by SW-846 Method 6010C;
- Total alkalinity by SM 2320B;
- Sulfate by EPA Method 300.0;
- Nitrate/Nitrite by EPA Method 353.2;
- Sulfide by SM4500S F; and
- Total organic carbon (TOC) by SM5310B.

A complete set of analytical results for each AOC, including final data qualifiers, are included as separate tables within this Appendix. Summary tables presenting AOC specific contaminants of concern are included and referenced within each AOC discussion section.

The results were evaluated for acceptability in accordance with the laboratory's defined acceptance limits and the criteria presented in the *Generic Quality Assurance Project Plan (QAPP), Annual Long- Term Monitoring and Maintenance Program, Former Fort Devens Army Installation, Devens, Massachusetts* (H&S, 2015) . The data qualification was performed in accordance with the QAPP requirements and the applicable protocols presented in the *Region 1*, *EPA-New England Data Validation Functional Guidelines for Evaluating Environmental Analyses* (EPA Region 1, 1996) and *EPA-New England Environmental Data Review Program Guidance* (EPA Region 1, 2013)

Sample Shipment and Receipt

All samples were delivered directly to the laboratory each day during sampling events. All samples arrived at the laboratory with temperatures at or below 6 °C, and the laboratory noted that all sample coolers were packed with sufficient quantities of ice in the field. All samples were appropriately preserved in accordance with the requirements presented in Table 1.

Holding Times

All samples were extracted and analyzed in accordance with the methods and holding time requirements presented in Table 1.

Trip Blanks

Trip blanks were provided by the laboratory and were included in sample shipments to the laboratory. Trip blanks are associated with all samples shipped in the same cooler, and the results are only applicable to the VOC analyses. The effects of trip blank contamination are presented in the method-specific discussions below.

Equipment Blanks

Equipment blanks, also known as rinsate blanks, are samples of analyte-free water that are pumped through reusable sampling equipment to confirm decontamination efficacy. Equipment blanks are associated with all samples collected at a site using the same type of reusable equipment employed to collect the samples. Two equipment blanks were submitted for VOC analysis with groundwater samples collected from DCL. The effects of equipment blank contamination are presented in the method-specific discussions below.

Volatile Organic Compound Analysis

Forty-four (44) groundwater samples were collected and submitted for VOC analysis by EPA SW-846 Method 8260C from AOC 50. Four (4) field duplicate samples were also collected; G6M-DUP1, a duplicate of sample G6M-04-03X; G6M-DUP2, a duplicate of sample G6M-07-02X; G6M-DUP3, a duplicate of sample G6M-13-01X, and G6M-DUP-4, a duplicate of sample G6M-97-05B. Seven (7) trip blank samples and two (2) rinsate blank samples were also submitted.

<u>Laboratory Method Blank Results</u>: All method blanks analyzed with these samples were free of contamination.

<u>Trip Blank and Equipment Blank Results</u>: Trichloroethylene (TCE) was reported in the TRIP BLANK analyzed with samples in SDG MC42160. The low level result for TCE in sample G6M-95-02X_FAL15 was qualified as non-detect (ND/U). Chloromethane was reported in the TRIP BLANK analyzed with samples in SDG MC42202; chloromethane was not detected in any associated samples. All other trip blank samples were free of contamination.

The rinsate blanks (G6M-RB1 and G6M-RB2) analyzed with these samples were free of contamination.

<u>Field Duplicate Sample Results:</u> The VOC results for FD samples 32M-DUP-062815/32M-01-17XBR were all non-detect. The FD results for FD sample pairs DUP-1-061915/G6M-04-10A and DUP-2-062115/G6M-13-04X showed acceptable precision for all calculated relative percent difference (RPD) or acceptable absolute differences for all low-level results.

<u>Surrogate Results</u>: All surrogate recoveries were within the project acceptance limits from all samples for target VOCs.

<u>Matrix Spike (MS)/MS Duplicate (MSD) Results</u>: Two sets of MS/MSD samples were analyzed for VOCs with these samples. The recovery and precision criteria were met for all MS/MSD analyses

<u>LCS/LCSD Results</u>: LCS/LCSD pairs analyzed with these samples met the project recovery and RPD control limits.

<u>Summary:</u> All VOC results reported for the AOC32 and AOC50 Fall 2015 sampling events were acceptable as reported and may be used for their intended purpose.

Dissolved Gases Analysis

Twenty (20) groundwater samples were analyzed for dissolved gases (methane, ethane, and ethene) by Method RSK-175 from AOC50. Two (2) field duplicate samples were also collected; G6M-DUP1, a duplicate of sample G6M-04-03X; and DUP-2, a duplicate of sample G6M-07-02X.

Laboratory Method Blank Results: The method blanks analyzed with these samples and reported for methane, ethane and ethane were free of contamination.

Field Duplicate Sample Results: The result comparison for methane from the field duplicate sample pair G6M-DUP2/G6M-07-02X had a calculated RPD of 90%. This large variability is likely due to sample matrix. The results for methane in these samples were qualified as estimated (J). The methane results from the FD sample pair DUP-2-062115/G6M-13-04X presented acceptable precision. Ethane and ethane were non-detect in all samples.

Matrix Spike/Matrix Spike Duplicate (MS/MSD) Results: One set of MS/MSD samples was analyzed for methane, ethane, and ethene. Since the methane concentration in sample G6M-03-09X was greater than four times that of the spike, the resulting recoveries were not applicable, and no qualification was required. The %Rs and calculated RPDs for ethane and ethane were acceptable.

Laboratory Control Sample (LCS) Results: LCSs analyzed for methane, ethane, and ethane with these samples met project recovery acceptance criteria.

Dilutions: The methane concentrations for all samples were outside the laboratory calibration range and required dilutions. The laboratory reported the diluted results for methane and the undiluted results for ethane and ethene.

Summary: The dissolved gases results reported for the AOC50 Fall 2015 sampling event were acceptable with the noted qualifications and may be used for their intended purpose.

Dissolved Metals Analysis

A total of forty-six (46) groundwater samples and four (4) field duplicate samples were collected from AOC50 and submitted for dissolved arsenic, iron and manganese analyses using EPA SW-846 Methods 6010C.

Laboratory Method Blank Results: The method blanks analyzed with these samples for total and dissolved metals were free from contamination.

Field Duplicate Sample Results: A total of four (4) field duplicate samples were collected for dissolved metals analyses during the AOC50 fall 2015 sampling events.

Four field duplicate samples were collected from AOC50; G6M-07-02X/G6M-DUP2, G6M-04-03X/DUP1_FAL15, G6M-97-05B/DUP4-FA115 and G6M-13-01X/G6M-DUP3. The dissolved arsenic, iron and /or manganese results for three of the four FD sample pairs; G6M-07-02X/G6M-DUP2, G6M-04-03X/DUP1_FAL15 and G6M-13-01X/G6M-DUP3; showed acceptable precision for detected analytes with calculated RPDs less than 12%.

The dissolved iron and manganese results for the FD sample pair, G6M-97-05B/DUP4-FA115, showed variability between reported results. Dissolved iron was 61.5 µg/L in the native sample but was non-detect in the FD sample. Dissolved manganese was 19.5 µg/L in the native sample and 8.0 µg/L in the FD sample. The calculated RPD for manganese was 83%; the results for dissolved manganese in the native and FD samples were qualified as estimated detections (J).

<u>MS/MSD Results</u>: A total of two (2) samples were spiked and analyzed as MS/MSD samples for select metals. The %Rs and RPD results for all MS/MSD samples analyzed with these samples were within the project acceptance limits for target analytes.

<u>Laboratory Control Sample (LCS) Results</u>: The LCSs analyzed for target metals analytes with these samples met project recovery acceptance criteria.

<u>Dilutions:</u> Due to elevated concentrations of a few analytes, several samples required dilutions to accurately report metals concentrations. Only the diluted results for these analytes were reported by the laboratory.

<u>Summary:</u> The dissolved metals results reported for the AOC50 Fall 2015 sampling event were acceptable with the qualification for manganese in the FD samples, G6M-97-05B/DUP-4_FA115. The results may be used for their intended purpose.

Wet Chemistry Analysis

A total of twenty (20) groundwater samples and two (2) field duplicate samples were collected from AOC50 and submitted for total alkalinity, sulfate, nitrogen/nitrate, sulfide and TOC analyses.

<u>Laboratory Method Blank Results</u>: Some of the method blanks analyzed for wet chemistry parameters had low levels detections of nitrate/nitrite, sulfate and/or TOC. Low levels of nitrate/nitrite were reported in some of the method blanks analyzed by method E352.2. Sulfate was present in the method blank reported by method SW9056 in one sample delivery group. Associated sample results for nitrate/nitrite and/or sulfate that were less than five times respective blank levels were qualified as non-detect (ND/U).

A low level of TOC was reported in one method blank; however, associated samples results were all greater than five times the MB level and no qualifications were needed.

<u>Field Duplicate Sample Results</u>: Two field duplicate sample pairs were collected from AOC50: G6M-DUP1, a duplicate of sample G6M-07-02X; and G6M-DUP2_FA115, a duplicate of sample G6M-04-03X.

The wet chemistry parameter results for the FD sample pair from AOC50, G6M-07-02X/G6M-DUP-1, showed acceptable precision for all calculated RPDs with the exception of sulfate. The calculated RPD between sulfate results (10.2 mg/L and 5.7 mg/L) was 56.6%. The result for sulfate in these samples was qualified as estimated (J).

The wet chemistry parameter results for the FD sample pair from AOC50, G6M-04-0-3X/G6M-DUP1_FAL15, showed acceptable precision for all calculated RPDs with the exception of nitrate and sulfate. The calculated RPDs between the FD results for nitrate (0.063 mg/L and 0.13 mg/L) and sulfate (52.5 mg/L and 7 mg/L) were 69% and 153%, respectively. The results for nitrate and sulfate in these samples were qualified as estimated (J).

<u>Laboratory Control Sample (LCS) Results</u>: The LCSs analyzed for the wet chemistry parameters with these samples met project recovery (%R) acceptance criteria.

<u>MS/MSD Results</u>: The %Rs and/or RPDs for the MS/MSD samples analyzed for these wet chemistry

parameters met the project acceptance criteria for all parameters.

Dilutions: Due to elevated concentrations of a few parameters, several samples required dilutions. Only the diluted results for these analytes were reported by the laboratory.

Summary: The wet chemistry parameter results reported for the AOC 50 Fall 2015 sampling event were acceptable after qualification for nitrogen/nitrate and/or sulfate method blank contamination. Qualifications were also required the three (3) FD sample pairs discussed above. The wet chemistry parameter results with the noted qualifications may be used for their intended purpose.

Conclusion

Data packages were reviewed for adherence to acceptable laboratory practices. Based on the elements evaluated (including holding times, method and trip blank sample results, surrogate recoveries, duplicate samples, MS/MSD recoveries and precision, and LCS/LCSD recoveries and precision), all data may be reported and used without qualification, except as summarized below.

VOCs Analysis

- All VOC results reported for the AOC50 Fall 2015 sampling event were acceptable as reported and may be used for their intended purpose.

Dissolved Gases Analysis

- As a result of field duplicate variability, the results for methane in the field duplicate sample pair from AOC50, G6M-DUP2/G6M-07-02X, were qualified as estimated (J).

Dissolved Metals Analysis

- Due to unacceptable precision in FD sample pairs, the manganese results in the AOC50 FD sample pair, G6M-97-05B/DUP4-FA115, were qualified as estimated (J).

Wet Chemistry Analysis

- As a result of method blank contamination, the results for nitrate/nitrite and/or sulfate in the AOC50 groundwater samples were qualified as non-detect (U).

- As a result of field duplicate variability, the sulfate results in the AOC50 FD sample pair, G6M-07-02X/G6M-DUP-1, were qualified as estimated. (J).

- As a result of field duplicate variability, the nitrate and sulfate results in the AOC50 FD sample pair, G6M-04-0-3X/G6M-DUP1_FAL15, were qualified as estimated. (J).

TABLE 1
Sample Preparation and Analysis Methods, Containers, Holding Times, and Preservatives

Parameter	Analytical Method	Sample Container	Preservation	Holding Time
Aqueous Samples				
VOCs	SW8260C	3 x 40-mL VOA vials	4 °C, HCl to pH <2	Preserved: 14 Days
Dissolved Gases (methane, ethane, ethene)	RSK175	2 x 40-mL VOA vials	4 °C, HCl to pH <2	Preserved: 14 Days
Dissolved Metals	SW6010C; SW7470A	1 x 250-mL HDPE	4°C, HNO_3 to pH <2	6 Months (28 days for mercury)
Anions (sulfate)	E300.0/SW9056	1 x 250-mL HDPE	4°C ± 2°C	28 days for Sulfate and Chloride
Nitrate/nitrite	EPA353.2	1 x 500-mL HDPE	4°C, H_2SO_4 to pH <2	28 days
Total Alkalinity	SW2320B	1 x 250-mL HDPE	4°C ± 2°C	14 Days
Sulfide	SM4500D S	1 x 250-mL HDPE	4°C, Zinc acetate + NaOH to pH>9	7 days
TOC	SM5310B	1 x 250-mL HDPE	4°C, H_3PO_4 to pH <2	28 days

Methane, Ethane, Ethene

USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC42160
Laboratory: Accutest New England	Date: 11/09/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1054-003

Client Sample ID	Lab Sample ID	Date Sampled:	Analysis	Matrix
G6M-07-02X_FAL15	MC42160-3	10/13/2015	RSK175	Groundwater
G6M-DUP2	MC42160-4	10/13/2015	RSK176	Groundwater
G6M-02-08X_FAL15	MC42160-5	10/13/2015	RSK177	Groundwater
G6M-04-10A_FAL15	MC42160-6	10/13/2015	RSK178	Groundwater
G6M-04-10X_FAL15	MC42160-7	10/13/2015	RSK179	Groundwater
G6M-03-02X_FAL15	MC42160-9	10/13/2015	RSK180	Groundwater

Summary - Data validation was performed on the data for five (5) groundwater samples and one (1) field duplicate sample submitted for Methane, Ethane, Ethene analyses by Method RSK 175.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/13/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Laboratory Control Sample – The Laboratory Control Sample reported in analytical batch GBA1545 with these samples met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Samples G6M-07-02X and G6M-DUP2 (Lab Sample IDs: MC42160-3 and -4) were field duplicate samples submitted with this sample set. The results for the detected compounds are summarized in the table below:

		G6M-07-02X_FAL15	G6M-DUP2	
		MC42160-3	MC42160-4	RPD
Methane	ug/l	**3200**	**8520**	90.8

Qualification: The results for methane in both samples have been qualified as estimated (J). The large discrepancy is liked due to sample matrix.

Compound Quantitation – Samples MC42160-3, 04, -5, -6 and -9 were reanalyzed at dilutions due to high levels of methane. The results for ethane and ethane in all samples were non-detect. Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The RSK175 results reported in this SDG are acceptable as qualified below. The data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Compound/Analysis	Lab Value (ug/L)	Lab Qualifier	Validated Value (ug/L)	Validation Qualifier
G6M-07-02X_FAL15	MC42160-3	Methane	3200		3200	J

TRIP BLANK	MC42160-15	10/13/2015	VOCs	Trip Blank

Summary - Data validation was performed on the data for eight (8) groundwater samples, one (1) field duplicate samples and one (1) trip blank sample submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Select groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/13/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – One LCS/LCSD pair was analyzed with these samples in analytical batch MSH2529. The LCS/LCSD met the %R and RPD control limits established in the QAPP.

Qualification: None required.

MS/MSD – Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Blanks – Sample MC42160-15 was the trip blank (TB) sample. Trichloroethylene (TCE) was reported in the TB at 0.29 µg/L. The result of 0.70 µg/L for TCE in sample G6M-95-02X_FAL15 (Lab Sample ID: MC42160-1) was below the five times action level.

Qualification: The result for TCE in sample MC42160-1 has been qualified as ND at the reporting limit.

Field Duplicate – Samples G6M-07-02X_FAL15 and G6M-DUP2 (Lab Sample IDs: MC42160-3 and -4) were field duplicate samples submitted with this sample set. The results for the detected compounds are summarized in the table below:

Field Sample ID		G6M-07-02X_FAL15	G6M-DUP2	
Lab Sample ID		MC42160-3	MC42160-4	RPD
cis-1,2-Dichloroethene	ug/l	**3.1**	**2.2**	34.0
Tetrachloroethene	ug/l	**482**	**444**	8.2
Trichloroethene	ug/l	**13.0**	**10.8**	18.5

Qualification: The results for cis-1,2-dichloroethene in both samples have been qualified as estimated (J).

Compound Quantitation – Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The VOC results reported in this SDG are acceptable with the qualifications indicated below. The data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Compound/Analysis	Lab Value (ug/L)	Lab Qualifier	Validated Value (ug/L)	Validation Qualifier
G6M-95-20X_FAL15	MC42160-1	trichloroethylene	0.70	J	1.0	U
G6M-13-05X_FAL15	MC42160-2	VOCs	No qualification needed.			
G6M-07-02X_FAL15	MC42160-3	cis-1,2-dichloroethene	3.1		3.1	J
G6M-DUP2	MC42160-4	cis-1,2-dichloroethene	2.2		2.2	J
G6M-02-08X_FAL15	MC42160-5	VOCs	No qualification needed.			
G6M-04-10A_FAL15	MC42160-6	VOCs	No qualification needed.

G6M-04-31X3_FAL15	MC42160-14F	10/13/2015	Dissolved As	Groundwater

Summary - Data validation was performed on the data for nine (9) groundwater samples and one (1) field duplicate sample collected and submitted for dissolved metals analyses (arsenic, iron and manganese) by Method SW846/6010C. Samples were analyzed for select analytes as listed above.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/13/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – MS/MSD samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Samples G6M-07-02X_FAL15 and G6M-DUP2 (Lab Sample IDs: MC42160-3F and -4F) were field duplicate samples submitted with this sample set. The results for the detected analytes are summarized in the table below:

Client Sample ID		G6M-07-02X_FAL15	G6M-DUP2	
Lab Sample ID:		MC42160-3F	MC42160-4F	RPD
Iron	ug/l	303	294	3
Manganese	ug/l	32.8	32.3	1.5

Qualification: None required.

Compound Quantitation – Dilutions were required for a few analytes; both sets of results were reported. Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The dissolved metals results reported in this SDG are acceptable as reported. No qualifications were required and the data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Analytes	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-95-20X_FAL15	MC42160-1F	Dissolved As, Fe, Mn	No qualification needed.

G6M-03-02X_FAL15	MC42160-9	10/13/2015	Miscellaneous Parameters	Groundwater

Summary - Data validation was performed on the data for five (5) groundwater samples and one (1) field duplicate sample submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method SW9056.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 10/13/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for alkalinity, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrate/nitrite by method E352.2 at 0.69 mg/L. Sample results were greater than five time this level; no qualifications are required.

Qualification: None required.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Samples G6M-07-02X_FAL15 and G6M-DUP2 (Lab Sample IDs: MC42160-3 and -4) were field duplicate samples submitted with this sample set. The results for the detected compounds are summarized in the table below:

Client Sample ID:		G6M-07-02X_FAL15	G6M-DUP2		
Lab Sample ID:		MC42160-3	MC42160-4		RPD
Alkalinity, Total as CaCO3	mg/l	10.3	11.3		9.3
Sulfate	mg/l	10.2	5.7	J	56.6

Qualification: The results for sulfate in both the native and FD sample have been qualified as estimated (J).

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The miscellaneous parameter results reported in this SDG are acceptable with the indicated qualifications. The data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Analysis	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier

Methane, Ethane, Ethene
RSK 175
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC42178
Laboratory: Accutest New England	Date: 12/07/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1054-003

Client Sample ID	Lab Sample ID	Date Sampled	Analysis	Matrix
G6M-04-03X_FAL15	MC42178-7	10/14/2015	RSK-175	Groundwater
G6M-03-07X_FAL15	MC42178-8	10/14/2015	RSK-176	Groundwater
G6M-DUP1_FAL15	MC42178-10	10/14/2015	RSK-177	Groundwater
G6M-13-06X_FAL15	MC42178-11	10/14/2015	RSK-178	Groundwater

Summary - Data validation was performed on the data for three (3) groundwater samples and one (1) field duplicate samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/14/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Laboratory Control Sample – The Laboratory Control Sample reported in analytical batch GBA1548 on 10/21/15 with these samples met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Matrix spike samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Samples G6M-04-03X_FAL15 (lab sample ID: MC42178-7) and G6M-DUP1_FAL15 (Lab Sample ID: MC42178-10) were field duplicate samples. Methane was detected in both samples at 10,200 µg/L and 8,190 µg/L. The calculated RPD between results was 21.8%.

Qualification: None required.

Compound Quantitation – Samples MC42202-7, -8, -10 and -11 were reanalyzed at dilutions due to high levels of methane. Both diluted and undiluted results were reported. Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The RSK175 results reported in this SDG are acceptable as reported. The data may be used for its intended purpose.

TRIP BLANK	MC42178-13	10/14/2015	VOCs	Groundwater

Summary - Data validation was performed on the data for eleven (11) groundwater samples, one (1) field duplicate sample and one (1) trip blank sample submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Accutest-New England is not DOD certified for VOCs. Corrective actions are in place; samples in this SDG were analyzed at Accutest-New England in order to meet holding times.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/14/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

GC/MS Tuning - All of the BFB tunes in the initial and continuing calibrations met the percent relative abundance criteria.

Qualification: None required.

Initial Calibration - Initial calibration curve analyzed on 10/27/2015 (MSU1360-ICC1360) exhibited acceptable %RSDS (≤30%) for and average RRF (>0.050) values for all target compounds.

Qualification: None required.

Initial Calibration Verification (ICV): - Initial calibration verification analyzed on 10/27/2015 (MSU1360-ICV1360) exhibited acceptable %Ds (≤25.0%).

Qualification: None required.

Continuing Calibration Verification (CCV): - The CCV analyzed on 10/28/2015 (MSU1360-CC1360) exhibited %Ds greater than 20.0% for vinyl acetate (30.4%) and trans-1,3-dichloropropene (26.7%). The %Ds for all other target compounds were less than 20% with acceptable RRF values. .

Qualification: The non-detect results for vinyl acetate and trans-1,3-dichloropropene were qualified as estimated (UJ) in all samples.

Surrogates – Surrogate recoveries were within the control limits for all samples.

Qualification: None required.

Internal Standard (IS) Area Performance: - All samples exhibited acceptable area count for all three internal standards.

Qualification: None required.

Laboratory Control Sample – Percent recoveries for the LCS (MSU1363-BS) analyzed on 10/28/2015 with these samples were within %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-95-19X_FAL15 (Lab Sample ID: MC42178-3) was spiked and analyzed as matrix spike/matrix spike duplicate samples. The calculated RPD for 2-hexanone was above control limits; 2-hexanone was non-detect in all associated samples. The %Rs and calculated RPDs were within control limits for all other target VOCs.

Qualification: None required.

Method Blank – The method blank (MSU1363-MB) analyzed on 10/28/2015 with these samples was free of contamination.

Qualification: None required.

Field Blanks – Sample TRIP BLANK (Lab Sample ID: MC42178-13) was the trip blank submitted with these samples. Target VOCs were all non-detect.

Qualification: None required.

Field Duplicate – Samples G6M-04-03X_FAL15 (Lab Sample ID; MC42178-7) and DUP-1_FAL15 (Lab Sample ID: MC42178-10) were field duplicate samples submitted with this sample set. Detected sample results were comparable with calculated RPDs less than 15%.

Client Sample ID:		G6M-DUP1_FAL15	G6M-04-03X_FAL15

G6M-04-09X_FAL15	MC42178-12F	10/14/2015	Dissolved As, Fe, Mn	Groundwater

Summary - Data validation was performed on the data for eleven (11) groundwater samples and one (1) field duplicate sample collected and submitted for dissolved metals analyses (arsenic, iron and manganese) by Method SW846/6010C.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/14/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-95-19X_FA115 (Lab Sample ID: MC42178-3) was spiked and analyzed as matrix spike/matrix spike duplicate samples. The %R and calculated RPDs for target analytes were within control limits.

Qualification: None required.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Sample G6M-04-03X_FAL15 (Lab Sample ID: MC42178-7F) and DUP1_FAL15 (Lab Sample ID: MS42178-11F) were field duplicate samples. Detected results for all analytes were comparable with RPDs less than 15%.

Client Sample ID:		**G6M-04-03X_FAL15**	**G6M-DUP1_FAL15**

Wet Chemistry
Alkalinity (SM2320B), Nitrogen/nitrate (E353.2), Sulfate (SW9056), Sulfide (SM4500 S F) and Total Organic Carbon (TOC) (SW9060)
USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC42178
Laboratory: Accutest New England	Date: 12/8/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID	Lab Sample ID	Date Sampled	Analysis	Matrix:
G6M-04-03X_FAL15	MC42178-7	10/14/2015	Miscellaneous Parameters	Groundwater
G6M-03-07X_FAL15	MC42178-8	10/14/2015	Miscellaneous Parameters	Groundwater
G6M-DUP1_FAL15	MC42178-10	10/14/2015	Miscellaneous Parameters	Groundwater
G6M-13-06X_FAL15	MC42178-11	10/14/2015	Miscellaneous Parameters	Groundwater

Summary - Data validation was performed on the data for three (3) groundwater samples and one (1) field duplicate sample submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method SW9056.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 10/14/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for alkalinity, nitrogen/nitrate, sulfide, TOC and sulfate were free from contamination.

Qualification: None required.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Samples G6M-04-03X_FAL15 and G6M-DUP1_FAL15 (Lab Sample IDs: MC42178-7 and -10) were field duplicate samples. The results for sulfide were non-detect in both samples. The results for alkalinity and TOC were comparable; however, the results for nitrogen/nitrate and sulfate were variable with RPDs greater than 50%. FD results are summarized in the table below.

		G6M-DUP1_FAL15	**G6M-04-03X_FAL15**	
		MC42178-10	**MC42178-7**	**RPD**
Nitrogen, Nitrate	mg/l	0.063	0.13	69
Alkalinity, Total as CaCO3	mg/l	277	337	19.5
Total Organic Carbon	mg/l	8.0	8.2	2.5
Sulfate	mg/l	52.5	7.0	153

Qualification: The results for nitrogen/nitrate and sulfate in the native and FD samples were qualified as estimated.

Compound Quantitation – Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The miscellaneous parameter results reported in this SDG are acceptable with the indicated qualifications. The data may be used for its intended purpose.

G6M-13-04X_FA115	MC42202-12	10/15/2015	RSK-175	Groundwater

Summary - Data validation was performed on the data for seven (7) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/15/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Laboratory Control Sample – The Laboratory Control Sample reported in analytical batch GBA1545 on 10/19/15 with these samples met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-03-09X_FA115 (Lab Sample ID: MC42202-11) was spiked and analyzed as matrix spike/matrix spike duplicate samples. The %R for methane was outside control limits; the spike value was less than four (4) times the sample result and recoveries could not be calculated.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted.

Qualification: None required.

Compound Quantitation – Samples MC42202-1, -4, -5, -6 and -12 were reanalyzed at dilutions due to high levels of methane. Both diluted and undiluted results were reported. Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The RSK175 results reported in this SDG are acceptable as reported. The data may be used for its intended purpose.

G6M-13-04X_FA115	MC42202-12	10/15/2015	VOCs	Groundwater

Summary - Data validation was performed on the data for ten (10) groundwater samples, one (1) field duplicate sample and one (1) trip blank sample submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Accutest-New England is not DOD certified for VOCs. Corrective actions are in place; samples in this SDG were analyzed at Accutest-New England in order to meet holding times.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/15/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – Surrogate recoveries were within the control limits for all samples.

Qualification: None required.

Laboratory Control Sample – Percent recoveries for the LCS analyzed in batch VB4415 with these samples were within %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-03-09X_FA115 (Lab Sample ID: MC42202-11) was spiked and analyzed as matrix spike/matrix spike duplicate samples. The calculated RPD for acetone was above control limits; acetone was not detect in any associated samples. The %Rs and calculated RPDs were within control limits for all other target VOCs.

Qualification: None required.

Method Blank – A low level of methylene chloride (0.34 µg/L) was reported in the method blank analyzed in batch MSU1365. Methylene chloride was not detected in any associated samples.

Qualification: None required.

Field Blanks – Sample TRIP BLANK (Lab Sample ID: MC42202-10) was the trip blank submitted with these samples. Chloromethane was reported in the TB at 2.5 µg/L; chloromethane was not detected in any associated samples. All other target VOCs were non-detect in the TB.

Qualification: None required.

Field Duplicate – Samples G6m-97-05B (Lab Sample ID: MC42202-7) and DUP-4_FA115 (Lab Sample ID: MC42202-9) were field duplicate samples submitted with this sample set. Detected sample results were comparable with calculated RPDs less than 15%.

Client Sample ID:		G6M-97-05B_FA115		G6M-DUP-4_FA115		
Lab Sample ID:		MC42202-7		MC42202-9		
VOCs

G6M-13-04X_FA115	MC42202-12F	10/15/2015	Dissolved As, Fe, Mn	Groundwater

Summary - Data validation was performed on the data for nine (9) groundwater samples and one (1) field duplicate sample collected and submitted for dissolved metals analyses (arsenic, iron and manganese) by Method SW846/6010C.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/15/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-03-09X_FA115 (Lab Sample ID: MC42202-11) was spiked and analyzed as matrix spike/matrix spike duplicate samples. The %R and calculated RPDs for target analytes were within control limits.

Qualification: None required.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Sample G6M-97-05B_FA115 and DUP-4_FA115 (Lab Sample IDS: MS42202-7F/-9F) were field duplicate samples. The results for the detected compounds are summarized in the table below:

Client Sample ID:		G6M-97-05B_FA115		G6M-DUP-4_FA115		
Lab Sample ID:		MC42202-7F		MC42202-9F		RPD
Arsenic	ug/l	4.0	U	4.0	U	
Iron	ug/l	61.5	J	100	U	
Manganese	ug/l	19.4		8.0	J	83.2

Qualification: The results for manganese have been qualified as estimated (J).

Compound Quantitation – Samples MC42202-1, -2, -4, -5, -6 and -12 were reanalyzed at 10X dilutions due to high levels of target analytes. Both diluted and undiluted results have been reported. Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The dissolved metals results reported in this SDG are acceptable as reported. No qualifications were required and the data may be used for its intended purpose.

G6M-13-04X_FA115	MC42202-12	10/15/2015	Miscellaneous Parameters	Groundwater

Summary - Data validation was performed on the data for seven (7) groundwater samples submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method SW9056.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 10/15/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for alkalinity, nitrogen/nitrate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for sulfate by method SW9056 at 0.58 mg/L.

Qualification: The results for sulfate in samples G6M-02-12X_FA115, MW-3_FA115 and G6M-02-11X (Lab Sample IDs: MC42202-1, -4 and 05) were less than five times the blank level and have been qualified as non-detect.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with these samples.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The miscellaneous parameter results reported in this SDG are acceptable with the indicated qualifications. The data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Date Sampled	Analysis	Matrix
G6M-02-13X	MC42231-6	10/16/2015	RSK175	Groundwater
G6M-02-01X	MC42231-10	10/16/2015	RSK175	Groundwater
G6M-04-04X_FAL15	MC42231-13	10/16/2015	RSK175	Groundwater

Summary - Data validation was performed on the data for three (3) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/16/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Laboratory Control Sample – The Laboratory Control Sample reported in analytical batch GBA1548 on 10/21/15 with these samples met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted.

Qualification: None required.

Compound Quantitation – Samples MC4231-10 and -13 were reanalyzed at 20X dilutions due to high levels of methane. Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The RSK175 results reported in this SDG are acceptable as reported. The data may be used for its intended purpose.

G6M-04-04X_FAL15	MC42231-13	10/16/2015	VOCs	Groundwater

Summary - Data validation was performed on the data for ten (10) groundwater samples, one (1) field duplicate sample, one (1) trip blank and one (1) rinsate blank submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Samples were submitted to Accutest Southeast in Orlando, FL for VOC analysis. Select groundwater samples were collected using both Region 1 low flow sampling and HydraSleeve™ technology. Samples collected using the HydraSleeve™ technology have an "H" suffix appended to the field sample ID.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/16/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Surrogates – Surrogate recoveries were within the control limits for the initial analyses of all samples. Surrogate recoveries were outside control limits for the re-analyses of several samples. Results were not qualified since the reported analytes from the re-analyses were non-detect.

Qualification: None required.

Laboratory Control Sample – Percent recoveries for all LCSs analyzed with these samples were within %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – Sample G6M-02-01X (Lab Sample ID: MC42231-10) was spiked and analyzed as MS/MSD. The %R and RPDs were within control limits.

Qualification: None required.

Method Blank – Low level target compounds were reported in the method blanks; VC4453-MB and VC4454-MB analyzed on 10/29/15 and 10/30/15 with these samples. Carbon disulfide, trans-1,2-dichoroethlyene and 1,1-dichloropropene were detected in both MBs at estimated values of 0.96 µg/L, 0.45 µg/L and 0.31 µg/L, respectively. Estimated levels of 1,3-dichlorobenzene and vinyl chloride were also detected in VC4454-MB at 0.22 µg/L and 0.26 µg/L. Carbon disulfide, trans-1,2-dichoroethlyene, 1,1-dichloropropene and 1,3-dichlorobenzene were not detected in associated samples. Detected results were reported for vinyl chloride in four samples; these results were reported from the analytical batch VC4453; vinyl chloride was non-detect in the associated method blank VC4453-MB.

Qualification: None required.

Field Blanks – Sample TRIP BLANK (Lab Sample ID: MC42231-1) was the trip blank sample and sample G6M-RB-1 (Lab Sample ID: MC42231-3) was a rinsate blank submitted with these samples. Target VOCs were non-detect in both samples.

Qualification: None required.

Field Duplicate – Samples G6M-13-01X and G6M-DUP3 (Lab Sample IDs: MC42231-4 and -2) were field duplicate samples submitted with this sample set. There was excellent correlation between results. The results for the detected compounds are summarized in the table below:

Client Sample ID:		G6M-DUP-3	G6M-13-01X	
Lab Sample ID:		MC42231-2	MC42231-4	RPD
cis-1,2-Dichloroethylene	ug/l	**2.4**	**2.6**	8.0
Tetrachloroethylene	ug/l	**25.6**	**26.3**	2.7
Trichloroethylene	ug/l	**1.1**	**1.1**	0

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as “ND”; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The VOC results reported in this SDG are acceptable as reported. The data may be used for its intended purpose.

G6M-04-02X	MC42231-9F	10/16/2015	Dissolved As, Fe, Mn	Groundwater
G6M-02-01X	MC42231-10F	10/16/2015	Dissolved As, Fe, Mn	Groundwater
G6M-13-03X	MC42231-11F	10/16/2015	Dissolved As, Fe, Mn	Groundwater
G6M-13-02X	MC42231-12F	10/16/2015	Dissolved As, Fe, Mn	Groundwater
G6M-04-04X_FAL15	MC42231-13F	10/16/2015	Dissolved As, Fe, Mn	Groundwater

Summary - Data validation was performed on the data for eight (8) groundwater samples and one (1) field duplicate sample collected and submitted for dissolved metals analyses (arsenic, iron and manganese) by Method SW846/6010C.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/16/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – MS/MSD samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Samples G6M-13-01X and G6M-DUP3 (Lab Sample IDs: MC42231-4F and -2F) were field duplicate samples submitted with this sample set. There was excellent correlation between results. The results for the detected compounds are summarized in the table below:

Client Sample ID:		G6M-DUP-3		G6M-13-01X		
Lab Sample ID:		MC42231-2F		MC42231-4F		RPD
Iron	ug/l	60.5	J	61.3	J	1.3
Manganese	ug/l	15.5		15.6		0.64

Qualification: None required.

Compound Quantitation – Dilutions were required for iron and manganese in some samples; both sets of results were reported. Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The dissolved metals results reported in this SDG are acceptable as reported. No qualifications were required and the data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Analytes	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-DUP-3	MC42231-2F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-13-01X	MC42231-4F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-02-13X	MC42231-6F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-02-04X	MC42231-7F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-04-02X	MC42231-9F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-02-01X	MC42231-10F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-13-03X	MC42231-11F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-13-02X	MC42231-12F	Dissolved As, Fe, Mn	No qualification needed.			
G6M-04-04X_FAL15	MC42231-13F	Dissolved As, Fe, Mn	No qualification needed.			

Wet Chemistry

Alkalinity (SM2320B), Nitrogen, nitrate (E353.2), Sulfate (SW9056), Sulfide (SM4500 S F) and Total Organic Carbon (TOC) (SW9060)

USEPA Level II Review

Site: Former Fort Devens, MA – AOC 50	SDG #: MC42231

H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID	Lab Sample ID	Date Sampled	Analysis	Matrix
G6M-02-13X	MC42231-6	10/16/2015	Miscellaneous Parameters	Groundwater
G6M-02-01X	MC42231-10	10/16/2015	Miscellaneous Parameters	Groundwater
G6M-04-04X_FAL15	MC42231-13	10/16/2015	Miscellaneous Parameters	Groundwater

Summary - Data validation was performed on the data for three (3) groundwater samples submitted for the miscellaneous wet chemistry analyses listed above. The samples submitted for sulfate analyses were shipped to Accutest Laboratory in Dayton, NJ for sulfate analysis by method SW9056.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived intact at the laboratory on 10/16/2015, in acceptable condition and temperature, and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the respective holding times required by the QAPP for preserved aqueous samples.

Qualification: None required.

Method Blank –The method blanks for alkalinity, sulfate, sulfide, and TOC were free from contamination. Low level contamination was detected in the method blank analyzed for nitrate/nitrite by method E352.2 at 0.069 mg/L.

Qualification: The reported results for nitrogen, nitrate in samples MC42231-10 and -13 have been qualified as non-detect at the reporting limit.

Laboratory Control Sample – The LCS %R results for all methods associated with these samples met the control limits established by the QAPP.

Qualification: None required.

MS/MSD – Batch matrix spike/duplicate samples analyzed with these samples met the control limits established by the QAPP.

Qualification: None required.

Field Blanks – Field blank samples were not submitted with this sample set.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J-qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The miscellaneous parameter results reported in this SDG are acceptable with the indicated qualifications. The data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Analysis	Lab Value (mg/L)	Lab Qualifier	Validated Value (mg/L)	Validation Qualifier
G6M-02-13X	MC42231-6	Miscellaneous Parameters	No qualification needed.

G6M-04-07X	MC42269-8	10/19/2015	RSK175	Groundwater

Summary - Data validation was performed on the data for two (2) groundwater samples submitted for Methane, Ethane, Ethene analyses by Method RSK 175.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/19/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – All samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: None required.

Laboratory Control Sample – The Laboratory Control Sample reported in analytical batch GBA1548 on 10/21/15 with these samples met the %R control limits established in the QAPP.

Qualification: None required.

MS/MSD –Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted.

Qualification: None required.

Compound Quantitation – Sample MC42269-8 was reanalyzed at a 10X dilution due to high level of methane. Analyte non-detections were reported as “ND”; these results should be considered the equivalent of “PQL U.” Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The RSK175 results reported in this SDG are acceptable as reported. The data may be used for its intended purpose.

G6M-RB-2	MC42269-9	10/19/2015	VOCs	Rinsate Blank

Summary - Data validation was performed on the data for seven (7) groundwater samples, one (1) trip blank and one (1) rinsate blank sample submitted for Volatile Organic (VOC) analyses by SW-846 Method 8260C DOD. Samples were submitted to Accutest Southeast in Orlando, FL for VOC analysis.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/19/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required.

Holding Times – Samples XSA-12-95X and G6M-04-06X (Lab Sample IDs: MC42415-6 and -7) were re-analyzed one day out of the 14-day holding time. The results for cis-1,2-dichloroethylene were reported from the re-analysis; these results should be considered estimated. All remaining samples were analyzed within the 14-day holding time required by the QAPP for preserved aqueous samples.

Qualification: The results for cis-1,2-dichloroethylene in samples MC42415-6 and -7 have been qualified as estimated.

Surrogates – All surrogate recoveries were within the control limits specified in the QAPP.

Qualification: None required.

Laboratory Control Sample – One LCS/LCSD pair was analyzed with these samples in analytical batch VC4458 on 11/2/2015. The LCS/LCSD met the %R and RPD control limits established in the QAPP.

Qualification: None required.

MS/MSD – Matrix spike/matrix spike duplicate samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated with the samples in this SDG were free of contamination.

Qualification: None required.

Field Blanks – Sample TRIP BLANK (Lab Sample ID: MC42269-1) was the trip blank sample and G6M-RB2 (Lab Sample ID: MC42269-9) was the rinsate blank sample submitted with this sample set. Target VOC were not detected in either sample.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted with this sample set.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The VOC results reported in this SDG are acceptable with the qualifications indicated below. The data may be used for its intended purpose.

Site: Former Fort Devens, MA – AOC 50	SDG #: MC42449
Laboratory: Accutest New England	Date: 11/11/2015
H&S Environmental, Inc. Reviewer: Laurie Ekes H&S Peer Reviewer:	Project: 1024

Client Sample ID	Lab Sample ID	Date Sampled	Analytes	Matrix
G6M-04-14X_FA115	MC42449-1F	10/26/2015	Dissolved As, Fe, Mn	Groundwater

Summary - Data validation was performed on the data for one (1) groundwater sample collected and submitted for dissolved metals analyses (arsenic, iron and manganese) by Method SW846/6010C.

Narrative and Completeness Review – The case narrative and data package were checked for completeness. No discrepancies were noted.

Qualification: None required.

Sample Delivery and Condition – All samples arrived at the laboratory on 10/26/2015 in acceptable condition and temperature and were properly preserved. Proper custody was documented.

Qualification: None required

Holding Times – All samples were analyzed within the 6-month holding time required by the QAPP for preserved aqueous samples.

Qualification: None required

Laboratory Control Sample – The LCS recoveries for the reported target analytes met all %R control limits established in the QAPP.

Qualification: None required.

MS/MSD – MS/MSD samples were not submitted with this sample set.

Qualification: None required.

Method Blank – The method blanks associated and analyzed with these samples were non-detect for all target analytes.

Qualification: None required.

Field Duplicate – Field duplicate samples were not submitted.

Qualification: None required.

Compound Quantitation – Analyte non-detections were reported as "ND"; these results should be considered the equivalent of "PQL U." Analyte detections below the PQL were reported as J qualified results. These J qualifiers were retained unless superseded by a more severe qualifier.

Qualification: None required.

Qualification Summary Table - The dissolved metals results reported in this SDG are acceptable as reported. No qualifications were required and the data may be used for its intended purpose.

Client Sample ID	Lab Sample ID	Analytes	Lab Value	Lab Qualifier	Validated Value	Validation Qualifier
G6M-04-14X_FA115	MC42449-1F	Dissolved As, Fe, Mn	No qualification needed.			

APPENDIX D

September 2007 Addendum
for Real Property Master Plan Long Range Component
for Devens Reserve Forces Training Area

REAL PROPERTY MASTER PLAN LONG RANGE COMPONENT FOR DEVENS RESERVE FORCES TRAINING AREA

ADDENDUM – SEPTEMBER 2007

This addendum applies to Chapter 4.C. (Land Use Policies and Constraints) and Chapter 5.E. (Environmental Concerns) of the *Real Property Master Plan*, *Long Range Component for Devens Reserves Forces Training Area*, *June 1999.* The addendum provides supplemental information on Land-Use Controls (LUCs) established under BRAC and CERCLA programs that are applicable to the following areas:

Area A (Main Cantonment)

The CERCLA remedy for the former AAFES Gas Station located on Queenstown Street is addressed in the Record of Decision (ROD) for Area of Contamination (AOC) 43G. The remedy is based on Army retention of this area and continued restricted access to groundwater; however, any proposed actions that affect this property must consider the following ROD requirements and site environmental conditions:

- Assure that the Property is not used for residential purposes and prohibit the use of groundwater beneath the site. If the Army changes the land-use within the AOC, then additional assessment and/or possible remedial action may be needed based upon the possible resultant changed risk factors.

- If the Army transfers this property by lease or deed, an Environmental Baseline Assessment (EBS) will be conducted to ensure that the remedy remains protective by incorporating all necessary environmental protection provisions within the Finding of Suitability to Transfer (FOST) and the property transfer deed.

- Any intrusive construction work must consider that residual soil and groundwater contamination has been documented for AOC 43G and that such actions should be coordinated with the DPW, the BRAC Environmental Office and the BRAC Clean-up Team (BCT).

Area C (Range & Training Area)

The CERCLA remedy for the South Post range and training areas is addressed in the ROD for the South Post Impact Area (SPIA) and AOCs 25, 26, 27 and 41. The "no action" remedy is based on Army retention of the South Post; however, any proposed actions that affect this property must consider the following ROD requirements:

- If the Army should close or transfer or change the use of this property, an Environmental Baseline Survey (EBS) will be conducted, and the "no action" decision in the ROD will be re-examined in light of the changed use and risk factors resulting from this closure/transfer.

- The Army will not develop new drinking water sources within the SPIA monitored area.

Area F (3700 Area – Barnum Road Maintenance Yards)

The CERCLA remedy for the former Cannibalization Yard and TDA Maintenance Yard is addressed in the ROD for AOCs 44 and 52, respectively. The remedy is based on Army retention of this property; however, any proposed actions that affect this property must consider the following ROD requirements:

- Assure the Property is not used for residential purposes. If the Army transfers this property by lease or deed, an EBS will be conducted to ensure that the remedy remains protective by incorporating all necessary environmental protection provisions within the FOST and the property transfer deed.

- Maintain the existing paved areas and storm water collection systems to prevent long-term worker exposure to residual oil contaminated soils 2-5 feet BGS associated with AOC 44/52 remedy.

- Assure that Soil Management Plans and Health and Safety Plans are prepared and executed prior to subsurface excavations.

- Any intrusive construction work must consider that residual soil contamination has been documented for AOC 44/52 and that such actions should be coordinated with the DPW, the BRAC Environmental Office and the BCT.

Area G (3800 Area – RTS Maintenance)

The CERCLA remedy for the former Moore Army Airfield is addressed in the ROD for AOC 50. Active remediation and monitoring of the AOC 50 chlorinated solvent plume, which is under building 3813 is ongoing. Treatment transects and associated monitoring wells are located in the RTC vehicle storage area and on the Southwest Corner of Building 3813 former hanger, along the axis of the plume through Army retained Parcel H. Any proposed actions that affect this property must consider the following ROD requirements:

- Provide continued access to treatment transects and monitoring wells and access to install additional injection or monitoring wells, if necessary.

- Coordinate construction plans with the BCT to facilitate ongoing remediation and future access to plume areas

- No groundwater extraction or injection for any purpose

- Coordinate construction plans for modifications to storm water systems with the BCT including engineered storm water management plans and hydrologic/ mounding studies. (Continue use of existing storm water system to direct storm water away from the plume)

APPENDIX E

Land-Use Control Letters and Annual Land-Use Control Plan Checklist Forms

Annual Land Use Checklist & Interview Forms

The checklist and interview form will be completed annually and submitted with the annual long-term monitoring report. The checklist will also be used to assist in compiling information for the five-year review.

I. Site Information		
Site Name:	Fort Devens AOC 50	**Name:** **Elizabeth Anderson** **Affiliation:** H&S Environmental, Inc. **Date:** 05/31/2015 **Weather:** Sun/Humid/Partly Cloudy, 78°
Location:	Ayer, MA	
Remedy Includes: Long-Term Monitoring Operation and Maintenance (SVE, ERD, IWS) Institutional Controls		
Inspectors:	Elizabeth Anderson	
Site Map Attached:	NA	

II Documentation & Records		
Item	**Check One**	**Comments**
Any related notices filed with Devens Enterprise Commission?	Yes [ ] No [X]	
Any related Department of Public Works permits found?	Yes [ ] No [X]	
Any related zoning permits or variances found?	Yes [ ] No [X]	
Any related Conservation Commission findings, proposals or notices of intent found?	Yes [ ] No [X]	

III Physical On-site Inspection		
Item	**Check One**	**Comments**
Any evidence of new construction or excavation present in the area of the remedy?	Yes [ ] No [X]	No construction activities noted. Sites are in good condition.
Is there evidence of damage to the remedy?	Yes [ ] No [X]	
Any groundwater extraction wells present?	Yes [ ] No [ ]	
Is there sufficient access to the site for monitoring?	Yes [X] No [ ]	Monitoring events are scheduled around Massachusetts State Police training.
Any signs of increased exposure potential?	Yes [ ] No [X]

APPENDIX F

Response to Comments

Responses to EPA Comments dated September 16, 2016 on the

***2015 Annual Operation & Maintenance (O&M) and Monitoring Report* for AOC 50 dated August, 2016**

GENERAL COMMENTS

1. The Conclusions and Evaluation section of the Source Area MiHPT Investigation Summary report, dated June 2015, discussed that the results were evaluated relative to the ROD-specified treatment time frame for ERD of 10 to 15 years, with the expected completion time to reach cleanup goals being 2019, since injections were initiated in 2004. Following that study, Supplemental ERD Injections, including direct push delivery of substrate within the Source Area and a change of substrate for some areas/transects, were proposed to and approved by EPA and MassDEP, with a Final Work Plan, dated August 2015, detailing the work. Before that time, and through 2014, ERD injections were conducted at least semi-annually (monthly in earlier years of the remedy). However, only one injection event was conducted during 2015 (the Supplemental ERD Injection) and appears to be recommended for 2016, as well. The appropriateness of the reduced frequency of ERD injections to effectively treat the remaining contamination to cleanup goals needs to be evaluated in the Annual Reports. In addition, the term "supplemental" is confusing, as it implies injections in addition to those "regularly" scheduled. Please address.

   RESPONSE: *The information referenced from the Source Area MiHPT Investigation Summary report is incorrect. The remedial duration estimate for AOC 50 was 27 years; therefore, the expected completion date would be 2031. As shown on the Annual Report figures the PCE plume has been reduced over time, indicating that remediation via ERD has been successful. Localized areas of residual impacts remain within portions of the site.*

   Based on the results of the MiHPT investigation, in 2015 the Army completed direct push injections in the source area at deeper depths to target impacts in this area and to evaluate the effectiveness of direct-push injections. The Army also injected longer-lasting amendments (zero valent iron and oleic acid) in the source area and other areas where injections are performed to enhance and prolong ERD. These proposed changes were discussed in the text in Section 4.1.4 and were presented at previous RAB meetings. The Army has been monitoring wells to evaluate the results of the 2015 injections and thus far these changes appear to be positive. Changes to the injection program will be documented in an updated LTMMP to be submitted to the agencies in December 2016. Future monitoring will continue and the results will be evaluated in the 2016 Annual Report to determine the overall effectiveness of direct push and the change in the amendments. The report will also include an assessment of the frequency of injection of the new amendments, and make recommendations for optimizing the injection process.

2. Depending on the area or transect, PCE contamination has either been persistent, or not clearly delineated, along the western edge of the plume. Specifically, the 2014 and 2015 data show that significant contamination either remains or is not fully characterized along the western edge of Area 1 and Transects 4 and 5. Future expansion of the monitoring and/or

injection networks will be needed along the western edges of Areas 1, 4, and 5. Also, see Specific Comment 4, regarding the western part of Area 1.

RESPONSE: *Groundwater impacts across AOC50 have decreased significantly since ERD was instituted. This is observed by reviewing figures 20 through 23 of the 2015 Annual Report. The plume is now disconnected and attenuating. The Army acknowledges that additional injections will be necessary to address residual impacts per Section 8 of the Annual Report and has already taken steps to improve the remedial operation performance by directly injecting the ERD substrate. A revised LTMMP is being submitted to address additional monitoring and direct injection of the ERD substrate to target remaining hot spots.*

3. The final version of the MiHPT report was included as Appendix A of the previous year's (2014) Annual Report. Within that MiHPT report, the overall project goals were to investigate two source areas, being the parachute shakeout tower area and the former drum storage area. To date, only the parachute shakeout tower area has been investigated using MiHPT. Please indicate when the MiHPT investigation is planned for the former drum storage area. Although the October 2015 data show a PCE concentration of 482 ug/L in G6M-07-02X, the 2014 concentrations were much higher in this well, at 14,000 ug/L and 6,200 ug/L in November and December 2014, respectively. These concentrations warrant further investigations of "hot spots" in this area.

   RESPONSE: *As part of the revised injection plan, the use of direct injection significantly reduced concentrations around the source area. Additional injections of ERD substrate via direct injection will be used to address hot spots across AOC 50. As was recommended in Section 8 of the Annual Report and contained in the LTMMP, additional injections of the ERD substrate would be used to address the hot spot locations in the source area. The Army will continue to monitor the concentrations in the drum storage area as we adjust our injection strategy, and should the concentrations in G6M-07-02X rebound again, the Army will develop an appropriate high resolution site characterization strategy for better understanding the source..*

4. The structure of the 2015 report should be improved to aid navigation and understanding for the reader. For example, the locations of direct push injections within the Source Area are very important in evaluating the effectiveness of ERD treatment, yet they are only shown on a Figure located within Appendix A. EPA suggests that these direct push locations be shown on a Figure within the body of the Annual Report. Likewise, the fifteen "Charts" that are located in an appendix to an appendix (specifically Appendix B within Appendix A), are central to the discussion in Section 2.0, but are poorly referenced and difficult for the reader to find. EPA suggests that these charts either be moved to, or repeated in, the Figures section of the Annual Report. Otherwise, clearer referencing in Section 2 and an expansion of the Table of Contents to show appendices within appendices would help. See Specific Comment 2.

   RESPONSE: *Report format has been revised for reviewing ease. Charts have been renumbered as Figures and inserted into the discussion of Section 2.*

5. The 2014 Annual Report mentioned an obstruction in G6M-03-08X in the IWS area. Has this been repaired? Also, the 2014 report mentioned a problem with the CPU for the IWS system. Has the CPU been repaired or replaced? If so, please provide a date of repair/replacement.

When the IWS system was shut-down by agreement, it was agreed to maintain its functionality in case it needs to be restarted.

RESPONSE: *A pump was stuck in well G6M-03-08X. It was successfully removed during the fall 2015 sampling event. The IWS system has remained off line. The CPU has not been replaced.*

SPECIFIC COMMENTS

1. Section 1.3, p. 1-3, 2nd paragraph – The last sentence should be clarified to the effect that heads in deeper wells are low relative to those within wells screened at a shallower depth.

   RESPONSE: *Agreed. The statement was revised to "Groundwater elevations within deeper wells at and to the north of AOC 50 typically have lower heads than wells screened at shallower depths indicating that there is a downward hydraulic gradient within this area."*

2. Section 2.1, p. 2-1, 2nd paragraph – Charts 1 through 5 are central to this discussion, and their location within the report should be referenced immediately after they are mentioned in the first paragraph. It is not readily apparent that the charts are in Appendix B, within Appendix A, as opposed to the report's Appendix B. Considering the importance of the charts, EPA recommends that they be presented as Figures. The same comment applies to the first sentences of the sub-sections for each Area (2, 3, 4, and 5).

   RESPONSE: *Agreed. Charts have been renumbered as Figures and inserted into the discussion of Section 2.*

3. Section 2.1, p. 2-1, 3rd paragraph – This paragraph discusses an increase in PCE and TCE in G6M-03-01X (Chart 4 is referenced, but it should be Chart 5) in 2015 and attributes the increase to ERD substrate injections nearby. Please include further discussion as to why the substrate injections would cause these increases observed.

   RESPONSE: *The increase in PCE, TCE and the associated daughter products may be attributable to the decrease in pH that often occurs during the ERD process. Low pH has a substantial effect on the activity of Dehalococoides (DHC). At pH below approximately 6, the activity of most strains decline rapidly, particularly the vinyl chloride reductase activity. This could explain persistence of CVOCs after the injections. Attention will be paid to pH during future injections, and if necessary, a buffer may be added along with substrate to promote better DHC activity.*

   Chart numbers have been corrected in the text.

4. Section 2.1, p. 2-1, fourth paragraph – Elevated concentrations of PCE, up to 1,700 ug/L, have been detected in samples from G6M-13-05X since June 2014. The western edge of the plume has yet to be identified in this area and an additional monitoring well is needed west of this well to delineate the plume. Further, attributing these relatively high levels of PCE and TCE within G6M-13-05X to a "delay response to historical ERD injections" is questionable. It appears that the only nearby injection was in 2014 into G6M-04-12X which was converted from a monitoring well to an injection well. It appears as though Army may have intended another injection within G6M-04-12X in 2015, based on the observation noted in Appendix A, Table 1 – ERD Injections Log, which states "well is blocked at 15.4 ft with thick orange substrate". Are the screen depths in that converted injection well and in G6M-13-05X suitable for effective treatment? Are reducing conditions present in G6M-13-05X? Further

evaluation of this “hot spot” is needed, with future treatment of this area warranted. Also note that the text in this paragraph refers to Chart 5, which should be Chart 4.

RESPONSE: *PCE concentrations monitoring well G6M-13-05X decreased somewhat in 2015 after substrate injections. This decrease may have been a result of the ERD process. Additional injections via direct push are planned in this area. Future monitoring events may incorporate G6M-96-25 B located west and side gradient of G6M-13-05X. In addition, previous profile investigations conducted in 2013 (Sovereign) indicated concentrations below the MCL (GP-13-23). Date from the MiHPT investigation west of G6M-13-05X at location MiHPT-10 showed minimal CVOC contamination at this location, in both the MIP log and the two confirmatory water samples collected at this location from 25 and 44 feet bgs (PCE concentrations of less than 0.5 and 1.6 ug/L, respectively). Further refinement of the delineation in this area is not warranted.*

Monitoring data of G6M-13-05X indicates reduced DO from after the July injection event suggesting that the substrate may be promoting a reducing environment. As indicated in Response to General Comment #3 additional injections are planned around the source area to address hot spots.

The chart reference will be revised.

5. Section 2.1, p. 2-2, Area 4 paragraph – There is a typo on the first line. The well name should be G6M-06-01X, not 10X.

   RESPONSE: *Agreed. Typo was corrected.*

6. Section 2.1, p. 2-2, Area 5 paragraph and Figure 4.4 – New injection well IW-39 was installed in 2014 to address bypass to the west of Transect 5. Results illustrated on Figure 5.1 in the 2014 report and on Figure 4.4 in the 2015 report indicate that additional injections farther to the west are also needed. See G6M-97-05B. As presently configured, Transect 5 is oblique to the plume axis. Also, for completeness, please discuss Chart 15.

   RESPONSE*: See Response to General Comment #2. Concentrations in Area 5 have significantly reduced since ERD injections began in 2004. Previous investigations and profile sampling conducted in 2013 upgradient of G6M-97-05B indicated concentrations below the MCL. Groundwater chemistry in this area is approaching a reduced environment. Additional and localized application of the ERD substrate may be conducted in areas of hot spots to enhance the reduced conditions. A discussion of Chart 15 was included in the report.*

7. Section 3.4.2, p. 3-2, last paragraph – Groundwater flow direction is to the southwest in most of the plume, but in the far southwestern portion of the plume, beyond Area 5, groundwater contours in Figures 3.1a and 3.1b show a significant area in which the groundwater flow is westerly. This likely accounts for the persistence of contamination in this area.

   RESPONSE*: Comment noted.*

8. Section 3.4.2, p. 3-3 – Groundwater gradients would be much greater, if XSA-12-98X or G6M-02-07X were considered in the calculation.

   RESPONSE: *The Army will consider revising hydraulic gradient calculations in future annual reports.*

9. Section 4.1.2, p. 4-2, 5th paragraph – In the paragraph that discusses Figure 4-3, "increased levels (of VOCs) along the westernmost edges on the perimeter of Areas 4 and 5 transects" are noted. Apparent increases shown by the western shift in contours (comparing Figure 4-2 to Figure 4-3) may largely be the result of expanded monitoring in that area and not primarily due to concentration increases or actual plume shift.

   RESPONSE: *Text was revised to indicate that the increased levels of VOCs may be the result of expanded monitoring in the area.*

10. Section 4.1.4, p. 4-3, 4th paragraph – Well G6M-97-05B is an exception to the statement that historic PCE concentrations in groundwater are reducing throughout the ERD injection areas.

    RESPONSE: *Comment noted.*

11. Section 4.1.4, p. 4-3, 5th paragraph – The discussion in this paragraph would be much easier to understand and verify if it were illustrated with a map figure.

    RESPONSE: *The Army will consider adding figures to depict chemical results for additional compounds and geochemical parameters in future annual reports.*

12. Section 4.1.4, p. 4-4, 2nd paragraph – The explanation that increases in VOC concentrations in three wells is attributable to decreases in pH should be re-evaluated using 2016 data in next year's report.

    RESPONSE: *Comment noted.*

13. Section 5.0, p. 5-1, 5th paragraph – EPA appreciates the cautious approach in evaluating the use of HydraSleeve technology. EPA awaits the evaluation of percent differences between this and conventional methods during 2016 data collection.

    RESPONSE: *Comment noted.*

14. Section 7.0, p. 7-1, 1st paragraph – The overall conclusion stated in this paragraph (regarding "all areas") is too broad and neglects portions of the source area in which contamination is increasing or cannot yet be bounded with existing information. Complete dehalogenation is not yet occurring in several portions of the source area (western edge and former drum storage area) and downgradient plume. Portions of the deep aquifer and low permeability zones have yet to experience complete dehalogenation.

    RESPONSE: *The overall conclusion that downward trends are occurring is true; however, the Army agrees that localized areas of impact will require additional remedial efforts.*

15. Section 7.0, p. 7-1, 2nd paragraph – EPA agrees that the conversion of some monitoring wells to injection wells downgradient and near the western edges of Areas 4 and 5 has helped to stimulate reductive dechlorination along the western edge of the plume. However, in some of these locations it is no longer possible to monitor progress along the western edge or to contour the edge of the plume, due to lack of data. Specifically, the well with the highest PCE concentration in 2015 is G6M-13-05X, located at the western edge of the Source Area (Area 1), and there are no monitoring results to the west of this well. Therefore, the extent of the plume in this area is unknown. Similarly, although G6M-13-02X was installed in the western portion of Area 4 (to replace G6M-06-01X which was converted to an injection well), the western edge of the plume in Area 4 is not well defined. West of Area 5, G6M-97-05B has PCE levels greater than 100 ug/L, but there are no other wells farther to the west that

would allow determination as to the western extent of the plume. This location is several hundred feet away from the nearest injection point. Please propose a plan to characterize and address these issues. Existing wells in this area should be added to the monitoring program, or new monitoring wells installed to the west within these areas.

RESPONSE: *See Response to Specific Comment #4. Additionally, the groundwater flow direction is southwest in the source area therefore G6M-96-25 B, G6M-03-05B and G6M-04-11X are sufficient monitoring locations for G6M-13-05X. Historical profile sampling conducted at GP-13-23 and MiHPT-10 indicated that the CVOC concentrations in the aquifer west of G6M-13-05X are below the MCLs and therefore no additional monitoring wells are planned immediately west of G6M-13-05X.*

H*istorical profile sampling conducted along the western edge of Area 4 and 5 indicated results below the MCL, therefore additional monitoring wells west of transect 4 and 5 are not planned at this time.*

16. Section 8.0, p. 8-1, bullet - Supplemental wording within the text is confusing, as it implies injections in addition to those regularly scheduled. Please reword.

    RESPONSE: *Comment noted. Bullet has been revised.*

17. Section 8.0, p. 8-1, 2nd bullet – Text within this section discusses that ERD injections are not recommended for Area 2 at this time. Area 2 discussions in Section 2.1 include monitoring well G6M-04-02X, which is located just upgradient, but probably not within the treatment zone, of Area 3. Since PCE has fluctuated within G6M-04-02X, with a 2015 concentration (105 ug/L) that is similar to those being proposed for additional direct push injections in Areas 4 and 5, EPA recommend that direct push injection(s) be added nearby/upgradient of G6M-04-02X to stimulate reductions in this well, while direct push equipment has been mobilized.

    RESPONSE: *The Army will continue evaluating PCE concentrations in conjunction with additional groundwater chemistry to determine if future injection events are warranted in this area.*

18. Section 8.0, p. 8-1, 3rd and 4th bullets – Please list which wells are recommended for injection in 2016.

    RESPONSE: *Potential injection wells were added to the 3rd and 4th bullets.*

19. Section 8.0, p. 8-1, last paragraph – The third sentence states that a post-injection sampling event "may occur prior to the fall 2016 LTM event". Please elaborate. Is Army planning to do this?

    RESPONSE: *An injection event is scheduled following the Fall LTM event. The paragraph has been revised.*

20. Figure 3.1a -- While contouring is always somewhat subjective, the present data set allows for refinement. First, significant segments of contours extend beyond existing data points and should be dashed where speculative. Second, a groundwater depression appears to be present in the vicinity of G6M-02-05X, MW-4, and G6M-13-04X; an enclosed 202-foot contour line with inward hachures should be drawn. If this low in the potentiometric surface is due to vertical gradients between wells screened at different depths, an explanatory note could be added. Also, the groundwater levels in XSA-12-98X and XSA-02-07X are more

than 50 feet lower than any other measured water levels. Unless these are believed to be erroneous, contouring should be extended to this area.

RESPONSE:*. Contour lines will be dashed when the lines extend beyond the known data points. Specific data points XSA-12-98X and XSA-02-07X were removed from the contours as the data points are erroneous. Water levels in these wells will be measured during the 2016 LTM events. The groundwater elevation indicated at G6M-02-05X is the elevation for G6M-13-01X. The figure has been corrected.*

21. Figure 4.1 – Several PCE concentrations have the suffix “B”, but this is not defined in the notes. Please add a definition for “B”.

    RESPONSE: *The legend was updated to indicate that “B” represents detected in lab blank.*

22. Figure 4.2 – The 5 ug/L contour line should not extend (or be dashed) through G6M-03-07X, downgradient of Area 3, as PCE was not detected in this well. See Figure 4.3, in which contouring in this area is more appropriate, for the same situation.

    RESPONSE: *The figure was revised.*

23. Figure 4.4 – In the inset, contouring extends to the west of the well with the highest concentration, G6M13-05X, even though there are no data points to the west of this well. Until data from points to the west are obtained, the 5 ug/L contour, the 100 ug/L contour, and maybe even the 1,000 ug/L contour cannot be closed off, to the west. Similarly, the highest concentration in the vicinity of Area 5 occurs in the westernmost well (G6M-97-05B) in that immediate area. Therefore, the western boundary of the plume is unknown in this vicinity, and closing the contours in this area is deceptive.

    RESPONSE: *See Response to Specific Comments #4 and #15. Historical concentrations indicate groundwater immediately west of G6M-13-05X was below the MCL. In addition, historical profile and monitoring well concentrations both upgradient and west of G6M-96-25B, as well as current downgradient concentrations (XSA-12-97X) all indicate that this area can generally be defined as the western limit of the plumeand therefore, the contour line can be closed.*

24. Figure 4.5 – This figure contains too much information, making it very difficult to understand. Specifically, there are too many wells with too many overlapping plots. This figure should be divided into a minimum of two separate figures.

    RESPONSE:*. Figure 4.5 has been revised into two separate figures as requested.*

25. Appendix A, p. 8, 2nd paragraph – Figures 5 and 6 are referenced for methane concentration maps, but Figure 5 shows PCE, not methane.

    RESPONSE: *The reference was revised to the correct figure.*

26. Appendix A, p. 8, 4th paragraph – Increased PCE in G6M-13-05X has been attributed to a delay response to ERD injections. EPA understands how a steady response could be attributed to a delay; please explain how an increase in concentration is caused by delay. Is there another explanation for the increase?

    RESPONSE: *Comment noted. The concentration at G6M-13-05X showed concentrations increasing after the abutting well (G6M-04-12X) was converted to an injection point. This may be attributable to changes in pH and available organic carbon. Since injecting at G6M-*

04-12X, concentrations at G6M-13-05X have decreased moderately. It is likely too early to make definitive conclusions about the impacts of substrate injections upgradient of G6M-13-05X. As indicated in the earlier responses, additional injections in the vicinity of G6M-13-05X are likely to occur in upcoming substrate injection events.

27. Appendix A, p. 10, last sentence – EPA agrees with the recommendation for additional injections upgradient of G6M-97-05B. When and where will a new injection well be installed, and what is the proposed screen depth? EPA looks forward to discussing and reviewing a plan for this action soon.

    RESPONSE: *The Army is reviewing the site data and will determine if direct injection or additional injection wells are the best method to address the impacts at G6M-97-05B.*

28. Appendix A, Appendix B – EPA recommends that these charts be presented as report figures instead of, or in addition to, their presentation as an appendix within an appendix. Chart 10 uses a different color scheme for TCE and methane than the other charts; consistent colors for these are recommended.

    RESPONSE: *The document will be revised to show the charts as figures within the document.*

Responses to MassDEP Comments dated September 9, 2016 on the
***2015 Annual Operation & Maintenance (O&M) and Monitoring Report* for AOC 50**
Dated August 4, 2016

1. Section 1.1: The report indicates that a single “supplemental” injection event was conducted during 2015; however, as noted here, semi-annual injections were conducted during 2008 to 2014, and semi-annual injections were expected during 2015. Consequently, the report should explain the decision to only conduct a single injection event during 2015. In particular, the report should explain why the reducing conditions needed to support contaminant degradation were expected to persist for more than 6 months.

   RESPONSE: *Please see response to EPA General Comment 1.*

2. Section 2.2: MassDEP agrees with the recommendation to extend the Area 5 treatment zone westward sufficiently to treat groundwater upgradient of wells G6M-97-05B, G6M-13-01X, and G6M-13-04X, where PCE concentrations have increased during recent sampling events.

   RESPONSE: *Comment noted.*

3. Section 8.0: MassDEP agrees with the recommendations listed here; in addition, the frequency of recommended injections should be specified and explained (refer to Comment 1).

   RESPONSE: *See response to EPA General Comment #1.*

4. Figure 2.1b: For future reference, please add the locations of the Geoprobe injection points that were used to treat Area 1 during 2015.

   RESPONSE: *A revised figure has been prepared showing the Geoprobe injection points in Area 1.*

5. Table 2.1: Daylighting in several injection wells (IW-17D, IW-7, and IW-11) suggests that these wells may not be capable of distributing substrate effectively. The report should include a recommendation to determine if reconditioning, repair, or replacement of these wells is necessary to ensure adequate performance.

   RESPONSE: *This recommendation will be taken into consideration. Section 4.1.4 includes discussion of direct injection instead of using well points.*

6. Table 2.1, First Row: Well G6M-04-12X should be restored and converted to an injection well as planned, or a replacement injection well should be installed to treat the PCE hotspot at well G6M-13-05X.

   RESPONSE: *This recommendation will be taken into consideration, however direct injection of the substrate at Area 1 will create a reducing environment that will degrade the concentrations at G6M-13-05X.*

7. Table 2.1 does not include data from injection wells G6M-07-01X (Area 2), G6M-06-01X (Area 4), G6M-02-05X (Area 5), and IW-39 (Area 5), suggesting that injections were not performed on the west ends of Area 2, Area 4 and Area 5 during 2015. The table should be revised to include the missing data, or the report should be revised to explain the reason(s) injections were not performed at these critical locations.

   RESPONSE:*. Table 2.1 was reviewed and any missing data was incorporated.*

8. Table 5.1: Based on the results presented here, the low-flow groundwater sampling protocol should not be replaced by the HydraSleeve sampling technique.

   RESPONSE: *As was noted in the report, additional Hydrasleeve samples will be collected for further evaluation.*

9. Appendix E: The Annual Land Use Checklist & Interview Form is incomplete. Rather than indicating interviews were “previously conducted”, Section IV (Interview) should document the results from the 2015 LUC interviews (including updates to the three questions listed in the lower part of the section) to support an evaluation of the performance of the land use controls. In addition to interviewing Army and MassDevelopment representatives, USFWS, Groton Ayer Realty Trust (Merrimack Warehouse Realty Company?), and any other site property owner representatives should have been interviewed.

   RESPONSE: *The LUC Checklist was updated to reflect the interviews.*

Responses to PACE Comments dated September 6, 2016 on the *2015 Annual Operation & Maintenance (O&M) and Monitoring Report* for AOC 50 dated August, 2016

AOC 50

1. Table 3 indicates that the tetrachloroethylene (PCE) concentration in well G6M-07-02X (in the Former Drum Disposal Area) rose to 14,000 parts per billion (ppb) in November 2014. Figure 5 indicates that this well is scheduled for annual sampling. Given the large increase in PCE concentration in this well, why was this well not sampled in 2015? If the well ehas been destroyed, are there plans for its replacement?

***RESPONSE:**. Location G6M-07-02X was sampled after the injection event in October 2015. The concentration decreased to 482 ug/L. Monitoring location G6M-04-13X was sampled in 2014 and was below the MCL. This monitoring point is located near G6M-07-02X. This well will continue to be sampled per the LTMMP.*

2. Section 4.1.2 references Figures 4.1 through 4.4. These figures were not found in the Figures section of the report.

***RESPONSE:**. Comment noted. The figures have been renumbered as 20 through 23.*
