S2AVE: EPA Stage 2A electronic review of data as defined in 'Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use', 13 January 2009. Data elements present in the Electronic Data Deliverable (EDD) and included in the project's electronic Quality Assurance Project Plan (eQAPP) were evaluated using automated data review software only.

### Data Qualifier Definitions

---

- J: The analyte was positively identified, but the associated numerical value is estimated and represents the approximate concentration of the analyte in the sample.
- U: The analyte was not detected above the reported sample quantitation limit.
- UJ: The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate.
- R: The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
