STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs

Nereis virens
28 day Bioaccumulation Evaluation

Statistical Analysis

Evaluation of PCB Congeners in Pre-Tissue
Reference < Pre-Tissue

STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs
QUESTION: Is Reference Tissue Significantly < Pre-Tissue?

Nereis virens
28 day Bioaccumulation Evaluation

Statistical Analysis

Evaluation of PCB Congeners in Pre-Tissue
Reference > Pre-Tissue

STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs
QUESTION: Is Reference Tissue Significantly > Pre-Tissue?

Nereis virens
28 day Bioaccumulation Evaluation

Statistical Analysis

Evaluation of PCB Congeners in Pre-Tissue
Pre-Tissue < Treatment

STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs
QUESTION: Is Pre-Test Tissue Significantly < Treatment?

STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs
QUESTION: Is Pre-Test Tissue Significantly < Treatment?

Endpoint	Method	Group 1	Code 1	Group 2	Code 2	Statistic	Critical	P Level	Alpha	Reject Null	MSD	DF	Ties	P-Type

Nereis virens
28 day Bioaccumulation Evaluation

Statistical Analysis

Evaluation of PCB Congeners in Pre-Tissue
Pre-Tissue > Treatment

STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs
QUESTION: Is Pre-Test Tissue Significantly > Treatment?

STUDY: 31250
CLIENT: AECOM
PROJECT: New Haven Harbor FNP
ASSAY: *N. virens* 28-day Bioaccumulation Evaluation
TASK: Statistical Analysis of Body Burden PCBs
QUESTION: Is Pre-Test Tissue Significantly > Treatment?

Table II-1: Completeness Checklist

Quality Assurance/Quality Control Questions	Yes/No? Comments?
1. Was the report signed by the responsible applicant approved representative?	Yes
2. Were the methods for sampling, chemical and biological testing described in the Sampling and Analysis Plan (SAP) and the Laboratory QA Plan (LQAP) followed?	Yes
3. If not, were deviations documented?	NA
4. Was the SAP approved by the New England District?	Yes
5. Did the applicant use a laboratory with a LQAP on file at the New England District?	Yes
6. Did the samples adequately represent the physical/chemical variability in the dredging area?	Yes
7. Were the correct stations sampled (include the precision of the navigation method used)?	Yes
8. Were the preservation and storage requirements in Chapter 8 of the EPA/Corps QA/QC Manual (EPA/USACE 1995) and EPA (2001d) followed?	Yes
9. Were the samples properly labeled?	Yes
10. Were all the requested data included?	Yes
11. Were the reporting limits met?	Yes, except as noted for PCBs in Section 2.4 and 3.3, and in Table 10. The complete tissue chemistry report is provided by Alpha Analytical under separate cover.
12. Were the chain-of-custody forms properly processed?	Yes
13. Were the method blanks run and were the concentration below the acceptance criteria?	NA
14. Was the MDL study performed on each matrix (with this data submission) or within the last 12 months?	NA
15. Were the SRM/CRM analyses within acceptance criteria?	NA
16. Were the matrix spike/matrix spike duplicates run at the required frequency and was the percent recovery/RPD within the acceptance criteria?	NA
17. Were the duplicate samples analyzed and were the RPDs within the required acceptance criteria?	NA
18. For each analytical fraction of organic compounds, were recoveries for the internal standard within the acceptance criteria?	NA
19. Were surrogate recoveries within the required acceptance criteria?	NA
20. Were corrective action forms provided for all non-conforming data?	NA
21. Were all the species-specific test conditions in Appendix V met?	Yes, except as noted for temperature and salinity.
22. Were the test-specific age requirements met for each test species?	Yes
23. Was the bulk physical/chemical testing performed on the sediments/composites that were biologically tested?	Yes
24. Were the mortality acceptance criteria met for the water column and sediment toxicity tests?	Yes
25. Were the test performance requirements in Table 11.3 of EPA (1994a) met?	Yes

Table II-8: Quality Control Summary for Biological Toxicity Testing only

Method Reference Numbers:

Quality Control (QC) Element	Acceptance Criteria*	Criteria Met? Yes/No	List results outside criteria (Cross-reference results table in data report)	Location of Results (Retained at Lab or in Data Package)
Test condition requirements for each species: Temperature, Salinity, pH, D.O., Ammonia (Total, Un-ionized)	Test conditions within the requirements specified for each species	No	Temperature (Sections 3.2.2, 3.3, Table 4, and Appendix A) and salinity (Sections 3.1.2, 3.2.2, 3.3, Table 4 and Appendix A) fell below the protocol ranges.	Data Package
Test species age	Age/health within guidelines for each species (Appendix V)	Yes		Data Package
Bulk physical/chemical analyses (If required by the Sampling plan)	Required? If so, performed? Yes or No	Yes		Data Package (separate cover)
Water column toxicity test: Control mortality Control abnormality	≤ 10% mean ≤ 30% mussel/oyster; < 40% clam larvae, < 30% sea urchin larvae	NA		
Sediment toxicity test: Control mortality Compliance with applicable test acceptability requirements in Table 11.3 (EPA 1994a)	≤ 10% mean (no chamber > 20%) See EPA (1994a) Section 9; Table 11.3	Yes		Data Package

* The Quality Control Acceptance Criteria are general guidelines. If alternate criteria are used, they must be documented in this table.
