Fact Sheet on Massachusetts In-Lieu Fee Program Fees (Updated January, 2016)

Background

In May, 2014 the U.S. Army Corps of Engineers (the “Corps”) approved the Department of Fish and Game (DFG) to be the sponsor of a state-wide program to provide in-lieu fee compensatory mitigation associated with Corps permits under §404 of the Clean Water Act and/or 10 of the Rivers and Harbors Act of 1899 and related federal rule at 33 C.F.R. Part 332 (the federal Mitigation Rule). At that time, the Corps and DFG signed an Instrument developed by DFG that sets forth a comprehensive description of how DFG will administer this in-lieu fee program (ILFP) in Massachusetts. DFG’s ILFP and an updated fee schedule are summarized below.

The ILFP allows Corps permittees, as compensation for their project impacts to aquatic resources of the U.S. in Massachusetts, to make a monetary payment *in-lieu of* doing the permittee-required mitigation. These in-lieu fee payments are made to the ILFP administered by DFG. As the ILFP sponsor, DFG, in turn, assumes legal responsibility for implementing the required mitigation, which it will accomplish by aggregating and expending the in-lieu funds received from Corps permittees for mitigation projects. DFG’s state-wide ILFP covers impacts to all types of aquatic resources from both small-sized projects authorized under the General Permit and larger projects that require an individual permit from the Corps.

DFG’s ILFP will implement mitigation projects that permanently protect aquatic resources and upland buffers and/or restore impacted aquatic resources within four (4) identified bio-regions covering the state (called “service areas”). See the map below. DFG will select ILFP mitigation projects through its application of detailed prioritization criteria in the ILFP Instrument, which includes consideration of a potential project’s ability to achieve multiple mitigation objectives and its support or compatibility with broader conservation or management initiatives.

Description of the Basis of DFG’s Proposed ILFP Fees

When a Corps permittee chooses to purchase credit(s) from DFG’s ILFP in lieu of being responsible for implementing the required mitigation, the Corps will specify the corresponding number of credit(s) in their permit. The fees established by DFG for its ILFP mitigation credits are based on DFG’s determination of the estimated cost of restoring a unit of aquatic resource, which is expressed in terms of a cost per square foot or cost per linear foot, depending on the resource type.

Based on its cost analysis, DFG established its fees for purchasing credit(s), or a portion thereof, from DFG’s ILFP. DFG’s ILFP fee schedule is set forth in the table below.

As authorized in the ILFP Instrument, DFG periodically reviews the fees to determine whether any adjustments are appropriate to reflect updated information relevant to the cost of types of mitigation. This Update reflects DFG determination that its specified \$/linear foot fee applies to each stream bank and bottom impacted by Corps-permitted project. For example, if the project impacts both banks and the bottom of a stream located in the Coastal Service Area, the applicable fee is \$600.00 per linear foot. The Corps, in consultation with the ILFP Interagency Review Team, approved this DFG change to its \$/linear foot fees.

In-Lieu Fee Schedule by Service Area

Service Area	\$/sq ft/per acre	\$/linear foot
Berkshire	\$13.68 / s.f. (\$596,041 per acre)	\$100.00 / l.f. for each impacted stream bank and bottom
Connecticut River	\$13.70 / s.f. (\$596,656 per acre)	\$100.00 / l.f. for each impacted stream bank and bottom
Worcester	\$13.73 / s.f. (\$598,071 per acre)	\$100.00 / l.f. for each impacted stream bank and bottom
Coastal	\$14.26 / s.f. (\$621,330 per acre)	\$200.00 / l.f. for each impacted stream bank and bottom
Statewide Average	\$13.84 / s.f. (\$603,025 per acre)	\$125.00 / l.f. for each impacted stream bank and bottom
