ØRSTED FUNDING AGREEMENT UNDER SECTION 214 OF THE WATER RESOURCES DEVELOPMENT ACT OF 2000

The District Engineer announces the preliminary intent of the U.S. Army Corps of Engineers, New England District (Corps), to enter into a Memorandum of Agreement with Ørsted to accept and expend funds from Ørsted to expedite processing of their Department of the Army (DA) permit applications, subject to certain limitations pursuant to Section 214 of the Water Resources Development Act of 2000 (as amended). This public notice solicits comments from the public on the proposed acceptance and expenditure of funds contributed by Ørsted to expedite the evaluation of Ørsted's DA permit applications.

Section 214 of the Water Resources Development Act of 2000 (Section 214), as amended and codified at 33 U.S.C. 2352, provides in part that:

“The Secretary, after public notice, may accept and expend funds contributed by a non-Federal public entity, public utility company, natural gas company, or railroad carrier to expedite the evaluation of a permit of that entity, company, or carrier related to a project or activity for a public purpose under the jurisdiction of the Department of the Army.”

Ørsted is eligible to provide funds to the Corps under Section 214 as a public utility company. The authority to accept and expend funds under Section 214 has been delegated from the Secretary of the Army to District and Division Commanders, including the Commander of the New England District, U.S. Army Corps of Engineers.

Prior to entering into a funding agreement pursuant to Section 214, the Corps must ensure that the funding agreement would not impact impartial decision making by the Corps or adversely affect the timeline for evaluation of the DA permit applications of other applicants within the District.

How the Corps Would Expend Funds:

The Corps Regulatory Program is funded as a Congressionally-appropriated line item in the annual Federal budget. Additional funds received from Ørsted would be used by the Corps to expedite the review of Ørsted's Section 404 Clean Water Act and Section 10 Rivers and Harbors Act of 1899 DA permit applications for Ørsted's projects, in accordance with the provisions of

Section 214. The Corps would establish a separate account to track the receipt and expenditure of the Ørsted funds to ensure they would be expended for the intended purpose. District employees would charge their time against the established account when processing Ørsted's priority permit applications and conducting other related activities as specified below (see "Activities for Which Funds Would be Expended").

Reason for the Funding Agreement:

Ørsted's proposed projects require permits from the Corps under Section 404 of the Clean Water Act (Section 404) and Section 10 of the Rivers and Harbors Act of 1899 (Section 10). Review of these projects and their associated Environmental Impact Statements and consultations require large amounts of Corps staff time and attention. Staff ability to review the project has been limited when balanced with regular permit review demands. Accelerated review and decision making is critical to Ørsted's ability to meet scheduled dates for projects. With this funding agreement, the Corps would be able to provide Ørsted with dedicated staff to ensure priority review, consistency, and opportunity for staff training and process improvements.

How Acceptance of Funds Is Expected to Expedite the Permit Review: Since the purpose of Section 214 is to expedite the permit review process, a funding agreement is an ideal vehicle to improve the permitting process. The Corps and Ørsted believe that using funds accepted from Ørsted to support a Corps project manager to evaluate the Ørsted permit applications would result in more efficient reviews the project. A 214 funding agreement would also improve the ability of the Corps and Ørsted to coordinate and prioritize the review of projects based on Ørsted schedules and deadlines. In addition, this would benefit the reviews of non- Ørsted permit applications since existing Corps project managers that would otherwise be working on Ørsted applications would have additional time to work on applications for other applicants.

Activities for Which Funds Would be Expended: Funds would be expended primarily for the labor and overhead of Regulatory Division staff processing Ørsted permit applications, including permit coverage and authorizations under Section 10 and Section 404. Such permit processing activities could include but would not be limited to the following: pre-application conferences, permit area determinations, application completeness reviews, jurisdictional determinations, site visits, preparation and distribution of public notices, preparation of correspondence, meetings, consultation and coordination with other agencies and consulting parties, public interest reviews, analyses of alternatives, compensatory mitigation proposal reviews, preparation of environmental assessments, preparation of documents associated with the environmental impact statement, preparation of permit decision documents, and permit compliance.

If Ørsted's funds are expended and not renewed, Ørsted's remaining permit applications would be processed like those of any other non-participant, in a manner decided by the assigned Regulatory Division project manager and his or her supervisor.

Procedures to Ensure Impartial Decision Making: To ensure the funds would not impact impartial decision making, the following procedures would be applied:

- (a) Instruments for in-lieu fee programs proposed for review by the funding entity would be signed by the District Regulatory Division Chief, an equivalent, or a higher-level position that is not funded by any funding agreement.

- (b) All final permit decisions where funds were used for the permit review process would be reviewed and approved in writing by a Corps official that is at least one level above the typical Corps decision-maker. Funds accepted under the agreement would not be expended for review of such decisions by supervisors or other Corps officials in the decision-making chain of command. Additionally, the one-level-above reviewer would hold a position that is not partially or fully funded by Ørsted for at least one year.
- (c) All applications reviewed using funds accepted under the agreement must comply with all applicable laws and regulations. The Corps would not eliminate any procedures or decisions that would otherwise be required for the type of project and permit application under consideration.
- (d) All preliminary jurisdictional determinations (JDs) and approved JDs where funds would be used to complete the JD would have documentation in the administrative record that a non-funded Corps Regulatory Program staff member conducted a review of the determination. This review would not require a field review. For those approved JDs that require coordination with the U.S. Environmental Protection Agency, additional internal review would not be required.
- (e) Funds from this agreement would not be used for enforcement activities; this includes, but is not limited to, the resolution of non-compliance issues.
- (f) The executed funding agreement and all final permit decisions where Ørsted funds are expended would be made available on the Corps Headquarters' public web page.

Impacts to the Regulatory Program: We expect that this funding agreement would have a net positive impact on the ability of the Corps Regulatory Program to evaluate other applicants' permit applications. The Corps would use the funds to support a Corps project manager(s) time to process Ørsted's DA permit applications. This would free up the time of existing Corps staff that would otherwise be used to process Ørsted applications. Further, since permit process improvements that result from the funding agreement could be applied widely to other permit applicants, the Corps anticipates that this funding agreement could result in additional time savings for other applicants in the district.

Consideration and Submission of Comments: In order to properly evaluate the proposal, we are seeking public comment. Anyone wishing to comment is encouraged to do so. Comments should be submitted in writing by the above date and should refer to the Ørsted Funding Agreement. Comments may be sent electronically to paul.m.maniccia@usace.army.mil or mailed to:

Concord, MA 01742-2751

This public notice has a 30-day comment period. Following the review of comments received, the New England District Commander will determine if acceptance and expenditure of the funds is in compliance with Section 214. If the District Commander determines, after considering public comments, that the acceptance and expenditure of the funds is in compliance with Section 214,

that the District would be able to preserve impartial decision-making, and that the timeframes of permit application reviews for other applicants in the District would not be adversely affected, the New England District may execute a Memorandum of Agreement (MOA) with Ørsted pursuant to Sections 214, and proceed to accept and expend such funds from Ørsted. Funds will be accepted only if the public interest is better served through cost-effectiveness, enhanced evaluation capability, streamlined permit application processing, or other appropriate justification. A final informational public notice will be issued regarding the District Commander's decision. If a MOA is executed by the Corps and Ørsted and later amended to change the amount of funds previously furnished or to extend the duration of the agreement, no new public notice will be issued provided that the purpose of the agreement remains the same as described in this notice.
