## SPECIAL PUBLIC NOTICE

---

The U.S. Army Corps of Engineers, New England District (USACE), Regulatory Division, has posted a special public notice to share information regarding the phased implementation of the Regulatory Request System (RRS).

USACE is pleased to announce that the new national online application portal and management platform, known as RRS, now includes an electronic submission option for permit applications. This platform has been introduced to modernize the permit application process and to address our users' expectations by providing a straightforward and transparent process for the submittal of permit requests.

RRS is a web-based platform currently in a beta version that enables users to submit pre-application meeting requests, jurisdictional determination requests, and now applications for individual and general permits. This new system aims to streamline the process, improve efficiency, and provide a more user-friendly experience for our applicants.

USACE believes that RRS will not only benefit users by simplifying the application process but will also enhance our ability to effectively manage and review permit requests. We are confident that this modernization initiative will lead to improved customer satisfaction and greater overall efficiency within our Regulatory Program.

We encourage users to explore and utilize the new Regulatory Request System to take advantage of its benefits and features. Visit [rrs.usace.army.mil](https://rrs.usace.army.mil) today!

You may direct questions to our general email boxes provided under "Contact Information" at <https://www.nae.usace.army.mil/Missions/Regulatory>.
