In response to additional requests and in order to more coincide with the Public Notice comment periods of both the RI Coastal Resources Management Council and the RI Department of Environmental Management, the District Engineer has extended our Public Notice comment period to February 10, 2013.

APPLICANT: Deepwater Wind Block Island, LLC and Deepwater Wind Block Island Transmission System, LLC (collectively "Deepwater Wind").

The BIWF will consist of five 6-MW wind turbine generators (WTGs), a submarine cable interconnecting the five WTGs, and a 34.5-kilovolt (kV) submarine transmission cable from the northernmost WTG to an interconnection point on east-central Block Island where the cable will go ashore to a new substation built at the existing Block Island Power Company (BIPCO) property. In connection with the BIWF, Deepwater Wind Block Island Transmission, LLC proposes to construct the Block Island Transmission System (BITS), a 34.5-kV alternating current bi-directional submarine transmission cable from Block Island to the Rhode Island mainland. The original Public Notice for the proposed BIWF and BITS facilities including plans along with a more detailed description of the project is at the Corps website at the following address:
