## Table of Contents

<b>1.0 Study Area .....</b>	<b>1-1</b>
1.1 Introduction .....	1-1
1.1.1 Study Purpose .....	1-1
1.1.2 Funding .....	1-1
1.1.3 Authority .....	1-1
1.1.4 Coordination Information .....	1-1
1.2 Description of Study Area .....	1-4
1.2.1 Geography .....	1-4
1.2.2 Geology and Topography .....	1-6
1.2.3 Bathymetry .....	1-6
1.2.4 Demographics .....	1-6
1.3 Historical Hurricane Activity .....	1-9
1.4 Major Analyses .....	1-14
1.4.1 General .....	1-14
1.4.2 Hazards Analysis .....	1-14
1.4.3 Vulnerability Analysis .....	1-14
1.4.4 Behavioral Analysis .....	1-15
1.4.5 Shelter Analysis .....	1-15
1.4.6 Transportation Analysis .....	1-15
1.4.7 HURREVAC/Decision Tools .....	1-15
<b>2.0 Hazards Analysis .....</b>	<b>2-1</b>
2.1 Introduction .....	2-1
2.1.1 Purpose .....	2-1
2.1.2 Forecasting Inaccuracies .....	2-1
2.1.3 Saffir/Simpson Hurricane Scale .....	2-1
2.2 Storm Surge .....	2-3
2.2.1 Introduction .....	2-3
2.2.2 Factors Affecting Surge Height .....	2-3

# Table of Contents

---

2.2.3 Total Flood Elevation .....	2-4
2.3 The SLOSH Model.....	2-5
2.3.1 General .....	2-5
2.3.2 SLOSH Grid Configuration.....	2-6
2.3.3 Verification of the Model.....	2-8
2.3.4 Model Output .....	2-8
2.4 Modeling Process.....	2-9
2.4.1 Simulated Hurricanes.....	2-9
2.4.2 Maximum Envelopes of Water (MEOWs).....	2-9
2.4.3 Maximum of the MEOWs (MOMs).....	2-10
2.5 Other Hurricane Hazards .....	2-10
2.5.1 Freshwater Flooding .....	2-10
2.5.2 Hurricane Winds and Vulnerability.....	2-11
<b>3.0 Vulnerability Analysis .....</b>	<b>3-1</b>
3.1 Purpose .....	3-1
3.2 Hurricane Surge Inundation and Mapping.....	3-1
3.3 Hurricane Evacuation Scenarios and Zones .....	3-25
3.4 Vulnerable Population .....	3-53
3.5 Possible Evacuation Obstacles .....	3-64
3.6 Evacuation Route Flooding.....	3-129
3.7 Emergency Transportation Needs.....	3-129
3.8 Mobile Homes.....	3-129
<b>4.0 Behavioral Analysis.....</b>	<b>4-1</b>
4.1 Introduction .....	4-1
4.2 Purpose .....	4-1
4.3 Objectives .....	4-1
4.4 Behavioral Analysis .....	4-2
4.4.1 Evacuation Participation Rates.....	4-3
4.4.2 Evacuation Timing.....	4-5

# Table of Contents

---

4.4.3 Type of Refuge .....	4-7
4.4.4 Destination.....	4-8
4.4.5 Vehicle Use .....	4-9
4.5 Possible Evacuation Obstacles .....	4-10
4.5.1 Households Needing Assistance to Evacuate .....	4-10
4.5.2 Other Challenges .....	4-11
4.6 Planning, Information Access, and Home Characteristics.....	4-13
4.6.1 Family Evacuation Plan .....	4-13
4.6.2 Information Awareness and Access.....	4-13
4.6.3 Housing Characteristics .....	4-14
4.7 Past Evacuation Experiences .....	4-14
4.7.1 Hurricane Sandy (2012) .....	4-14
4.7.2 Hurricane Irene (2011) .....	4-18
4.7.3 Hurricane Earl (2010).....	4-22
<b>5.0 Sheltering Analysis.....</b>	<b>5-1</b>
5.1 Purpose .....	5-1
5.2 General.....	5-1
5.3 Shelter Vulnerability.....	5-1
5.4 Shelter Demand .....	5-2
5.5 Shelter Capacities and Inventories .....	5-5
<b>6.0 Transportation Analysis .....</b>	<b>6-1</b>
6.1 Introduction .....	6-1
6.2 Analysis Objectives .....	6-4
6.3 Transportation Analysis and Input Assumptions.....	6-5
6.4 Traffic Analysis Zones .....	6-6
6.5 Housing Unit and Population Data .....	6-32
6.6 Behavioral Assumptions of the Evacuating Population.....	6-43
6.6.1 Participation Rates.....	6-43
6.6.2 Response Rates.....	6-52

# Table of Contents

---

6.6.3 Destination Percentages.....	6-53
6.6.4 Vehicle Usage.....	6-56
6.7 Transportation Modeling Methodology .....	6-56
6.7.1 Introduction .....	6-56
6.8 The Transportation Model.....	6-57
6.9 Transportation Modeling Process .....	6-60
6.10 Model Results.....	6-97
6.10.1 Evacuating People and Vehicles .....	6-98
6.10.2 Shelter Demand and Capacity Considerations .....	6-113
6.10.3 Traffic Volumes and Critical Roadway Segments .....	6-113
6.10.4 Estimated Evacuation Clearance Times.....	6-125
6.10.5 Evacuation Impacts from New York City .....	6-132
6.11 Traffic Control Measures .....	6-137
6.11.1 General Recommendations .....	6-137
6.11.2 Specific Recommendations .....	6-138
6.13 Report Summary .....	6-139
<b>7.0 HURREVAC/Decision Tools.....</b>	<b>7-1</b>
7.1 Decision Tools.....	7-1
7.1.1 Purpose .....	7-1
7.1.2 Background .....	7-1
7.2 HURREVAC .....	7-2
7.2.1 History.....	7-2
7.2.2 Overview for Using HURREVAC .....	7-3
7.3 Using HURREVAC: The Basics .....	7-5
7.3.1 Workspace Layout .....	7-5
7.3.2 Map Tools .....	7-6
7.3.3 Context Menu and Shortcut Keys.....	7-7
7.4 HURREVAC Program Setup .....	7-9
7.4.1 Download Schedule Tab .....	7-9

# Table of Contents

---

7.4.2 Local Areas Tab .....	7-10
7.4.3 Points of Interest .....	7-11
7.4.4 Timeline .....	7-12
7.4.5 Time Zone .....	7-13
7.4.6 Default Map Settings .....	7-13
7.5 Wind Forecast – Timing and Probability Reports .....	7-14
7.5.1 Opening the Wind Timing and Wind Probability Reports .....	7-14
7.5.2 Wind Timing for Single Area/Point of Interest Report .....	7-15
7.5.3 Wind Timing All Affected Areas/Local Areas/All Affected Points of Interest Report .....	7-15
7.5.4 Wind Probabilities Single Area Report .....	7-15
7.5.5 Wind Probabilities All Affected Areas/Local Areas Report/All Affected Points of Interest Report .....	7-16
7.5.6 Inland Wind Decay for Areas/Points of Interest.....	7-16
7.6 Evacuation Timing Features .....	7-17
7.6.1 Opening the Evacuation Timing Reports .....	7-17
7.6.2 Evacuation Timing Single Area Scenario.....	7-17
7.6.3 Evacuation Timing All Affected Areas/Local Areas.....	7-18
7.6.4 Clearance Time Arc .....	7-18
7.7 Other Forecast Data .....	7-19
7.7.1 Doppler Radar Observations .....	7-19
7.7.2 Rain Forecast .....	7-19
7.7.3 River Data and Forecasts .....	7-19
7.7.4 Tide Gages.....	7-19
7.7.5 Probabilistic Storm Surge Data .....	7-20
7.8 Browsers/Utilities .....	7-22
7.8.1 Evacuation Clearance Time Browser .....	7-22
7.8.2 Export to GIS .....	7-22
7.8.3 Storm Summary PDF .....	7-22
7.9 Accessing and Interpreting Important Decision Making Functions.....	7-23

# Table of Contents

---

7.9.1 Determining the Relative Risk of Experiencing Landfall in a Community over the 120 Hour Forecast Period .....	7-23
7.9.2 Determining Which Community Has the Highest Forecasted Peak Wind .....	7-26
7.9.3 Determining the Projected Wind Speed Forecast for Nantucket, MA at Each Hour in the Forecast Period.....	7-26
7.9.4 Determining the Evacuation Start Time for Wareham, MA, Based on a Cat 2 Direct Hit Scenario .....	7-27
7.9.5 Determining the Evacuation Start Time for Newport, RI, Based on a Cat 1 Using the Clearance Time Arc Method .....	7-31
7.10 Other Features of HURREVAC.....	7-32
7.11 Obtaining HURREVAC.....	7-34
